

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ### SEVENTH ANNUAL REPORT

## THE BOARD

op

OP.

# GAS AND ELECTRIC LIGHT COMMISSIONERS.

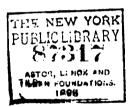

Commonwealth of Massachusetts.

OF THE

**JANUARY**, 1892.

BOSTON:
WRIGHT & POTTER PRINTING CO., STATE PRINTERS,
18 POST OFFICE SQUARE.

1892.

## Commonwealth of Massachusetts.

The Board of Gas and Electric Light Commissioners respectfully submits its Seventh Annual Report.

There was a change in the membership of the Board in July last at the expiration of the term of Hon. A. B. Coffin, who declined a re-appointment. His associates desire to express their appreciation of the fidelity, ability and integrity with which for four years he discharged the important duties of Chairman.

There are now one hundred and thirty-one companies under the supervision of the Board, twenty-six of which supply both gas and electric light, fifty-eight only electric light, and forty-seven only gas.

It is apparent that the province and work of the Board is becoming better understood by the public, and during the last year, in addition to the duties imposed by the statute, it has been frequently consulted by city and town committees, managers and investors in regard to questions concerning gas and electric lighting. Those interested in these matters have come to consider it the most convenient source from which to obtain reliable information as to the standing and financial operations of the companies and their relation to the local authorities, as well as in regard to many of the technical features of the business.

The Board is compelled to again call attention to the failure of many of the companies to make their returns within the time fixed by statute and to urge the passage of an act imposing a suitable penalty in such cases. It is evident that the time now allowed is ample, since the largest companies, whose accounts are the most complex, find no serious difficulty in obeying the law. Of one

hundred and thirty-one returns due on the second Wednesday of September, only forty-five had reached this office on that day.

The Board cannot better express its present view of this matter than by the following words from the report of last year: "The present remedy is by reporting the delinquency to the Attorney-General, who proceeds before the courts with the request that the companies be enjoined from doing business until they shall have made report. A fine for each day's delay, as in the case of railroad companies, would doubtless be effective, and thus allow the time needed to correct and tabulate the numerous details of the returns. If the returns were promptly filed, the time left for compiling and printing the data would be sufficient; but, with the tardy practice of the companies, the Board is now, as formerly, unable to have its annual report seasonably printed for the use of the Legislature."

The Spencer Gas Company, to which particular reference has been made in previous reports as supplying the same gas for lighting and for fuel at \$1.25 per thousand feet, with special attention to the latter use, has been compelled after continued losses to advance its rate to \$1.60.

A new departure in this Commonwealth is the Framingham Gas Fuel and Power Company which began in January last to supply non-illuminating water-gas to consumers in South Framingham for from fifty to seventy-five cents net per thousand feet.

This gas is made from steam and Cumberland coal, by what is known as the Loomis process, with sufficient enricher added to give it a perceptible odor, and passes through lime and oxide of iron for the purpose of purification. Although designed primarily for fuel purposes, the gas is used for lighting in combination with what is known as the Fahnehjelm burner, consisting of a magnesia comb which is heated to incandescence by the gas. The company has about one hundred customers. The Cottage City Company also makes only non-illuminating water-gas by a similar process.

A consolidation of the two companies in Middleborough has been effected by the purchase of the Middleborough Electric Light and Power Company by the Middleborough Gas and Electric Company. An extended reference to the history of these companies is contained in the report of the Board for 1889.

The Gardner Electric Light Company has succeeded to the business and property of the Gardner Electric Company, paying therefor the amount of the mortgage notes of the latter and assuming its debts.

The property and franchises of the Miller's River Gas Light Company were sold by the mortgagees under foreclosure and the purchasers have been incorporated as the Athol Gas and Electric Company.

A similar course was pursued by the mortgagees of the Stoughton Light, Heat and Power Company, incorporated under the laws of Maine, and the purchasers have become a Massachusetts corporation under the name of Stoughton Gas and Electric Company.

The Holliston Gas and Electric Company of Holliston, with \$8,000 capital, and the Consumers' Gas Company of New Bedford, with \$15,000 capital, are the only other lighting corporations chartered during the year.

The Easthampton Gas Company made the only application which the Board received during the year under chapter 385 of the Acts of 1887.

Proceedings have been begun in the Supreme Judicial Court during the year by the Attorney-General against the Walworth Light and Power Company, to compel the removal of numerous wires running over streets in the central portion of the city of Boston and used for the supply of electric light. These wires were erected and maintained without permission from the city, and in the face of a formal rejection by the aldermen of the petition of the company asking leave to construct and maintain them.

The company admitted the existence and use of the wires as stated, but contended that there was no violation of the statute because all the wires involved were either originally built and ever since owned by certain of its customers, or if built by the company, the portions over the streets had been sold to certain customers prior to the suit, and that the wires which the company now owned were not constructed by it but purchased from a former owner. The case was heard before a single justice in September, but no decision has yet been rendered.

The fact that such a contention can be seriously made calls strongly for a careful examination of the statute, to discover

whether it fully expresses what was intended at the time of its enactment, and whether it ought not, in the interest of the public, to be made more definite and clear in its terms.

If the respondent's claim can be maintained, no power now exists in the authorities of state or city to check the indiscriminate and needless multiplication of electric wires in the public streets, and the legislation passed in response to a general demand for the suppression of a well recognized evil will prove of doubtful value.

#### ELECTRIC METERS.

The use of electric meters for ascertaining the quantity of incandescent light supplied to consumers is becoming more general, and the sale of such light by the contract system somewhat less common. There is some diversity of opinion among managers as to the expediency of using meters, and customers often find their bills largely increased when changing from the contract to the meter method of purchase. In most of the cases which have come to the attention of the Board, the increase has been because the customer had received his lights under a contract which brought an appreciable loss to the company.

There are two types of meter now upon the market. In neither of these does the entire current pass through the meter, but only a portion which is shunted out or divided from the main current and maintains a constant relation thereto. In one type this shunted current passes through two plates of chemically pure zinc. and a solution of zinc sulphate in which they are suspended. current decomposes the solution, deposits a certain quantity of zinc on one plate and dissolves an equal amount from the other. these amounts varying as the quantity of the current passing through. These plates are weighed before and after use and the quantity of electricity used is computed from the differences in weight. In the other type the shunted current is used to excite an electro-magnet, which causes a small armature to revolve whenever the electric current passes through. The speed of the armature varies with the strength of the magnet, and this varies again as the quantity of the current. The armature is connected by toothed wheels with dials similar to those in a gas meter so

contrived as to record the quantity of current supplied to the consumer in ampere-hours or watt-hours.

The former type is known as the Edison meter and is sold for use only with that system. The latter is adapted to the alternating system of distribution. The weight of opinion seems to be that either kind will give satisfactory results when properly set up and free from external disturbing influences.

The increasing use of meters has called attention to the possible necessity for a new basis for charges for incandescent electric lighting service. With many companies the difference between average and maximum load is very great, and the largest demand lasts but a short time. This is most marked in those companies where a large share of the business is for manufacturing or mercantile establishments which close early and require lights for only a portion of the year. Until some method of storing electric energy in large quantities which shall have greater commercial value than any now upon the market is devised, both the generating and distributing plant of a company must be capable of maintaining a satisfactory standard of light at the time of maximum load.

For these reasons machinery which is much of the time idle represents a considerable portion of the investment seeking dividends, and the question arises whether the necessary charge for this should be distributed among all the consumers of the company, or be borne by those for whose benefit the investment is made. In other words, should the entire income of the company be derived from a uniform price per watt-hour or per ampere-hour for energy supplied, or should a portion come from a fixed charge based upon the size and character of the installation and its use, in addition to the regular meter rate, which would thus be lower than under the first method.

One difficulty in the way of a satisfactory answer lies in the lack of sufficiently reliable data concerning the cost of generating and distributing electric energy. In many large stations the question is of minor importance, owing to the greater uniformity of load, but may be of great consequence where any considerable percentage of the maximum is needed for a short time only.

#### F. P. JEWETT, PETITIONER.

Mr. F. P. Jewett of Winchester filed a petition against the Arlington Gas Light Company, asking that it be required to supply him with gas at his residence.

It appeared that three years ago the company began to make a uniform charge for meter rental of \$3 per year in all cases where the customer's bill for the year was less than \$7. The meter states were taken and bills rendered quarterly, the meter rental being added to the fourth quarterly bill.

The petitioner, having paid \$3 per year meter rent for two years, refused to pay a similar charge the third year, claiming it was exorbitant, but offered to pay for his fourth quarterly bill such amount as would make the sum of his bills for the year \$7. This proposition the company refused to accept, and after notice removed the meter and shut off the supply of gas.

After the hearing before the Board the company decided to accept the petitioner's offer and replace the meter, so that no order was necessary.

#### SHEPARD, NORWELL & Co., PETITIONERS.

Messrs. Shepard, Norwell & Co. of Boston filed with the Board a petition against the Edison Electric Illuminating Company of Boston, complaining that said company had refused to supply them with light unless they would use what are known as "Edison lamps." A hearing was appointed, but before it was held an amicable arrangement between the parties was reached, and at their joint request the case was indefinitely postponed.

#### RICHARD OLNEY et als., PETITIONERS.

A petition was received from Richard Olney, Francis I. Amory and William Minot, Jr., against the Edison Electric Illuminating Company of Boston, alleging that the petitioners were owners of residences then building on Commonwealth Avenue, near Charlesgate East. in the city of Boston; that although the respondent company had obtained permission to place its wires under the said avenue, in front of said residences, yet it had refused to supply them and had declined to extend its system of wires west of West Chester Park.

The petitioners asked that the company be required to supply them with light upon such terms as might be legal and reasonable. A hearing was ordered, but before it was held the petitioners decided to accept an offer made by the Boston Electric Light Company to supply them, and so notified the Board. The petition was accordingly dismissed.

Petition of Consumers v. Boston Gas Light Company.

On Feb. 4, 1891, the following petition was received addressed to the Board:—

We, the undersigned, customers of the Boston Gas Light Company, hereby complain of the unreasonably high prices charged for gas by the said company, and petition that you will, acting under the powers vested in you by law, order the Boston Gas Company to reduce its price to one dollar (\$1.00) per thousand feet, or to such lower price as will allow the company to pay dividends not in excess of ten per cent. (10%) annually upon its capital stock of \$2,500,000.

This was signed by J. W. Estabrook & Co. and nineteen others. On this petition a public hearing was ordered, as the law requires; and, after several continuances requested by the parties interested, the case was finally heard on the respondent's motion to dismiss. In this it was claimed that the petition was not signed by twenty customers of the company, as required by law, certain of the signers not being at the time of signing, or thereafter at any time, customers of the respondent.

The ground alleged being supported by the facts presented, the motion to dismiss was allowed.

PETITION OF CONSUMERS v. CHELSEA GAS LIGHT COMPANY.

This was a petition by the mayor and other citizens of Chelsea against the Chelsea Gas Light Company. It asked that the company be required to improve the quality of the electric light, to supply such light at all hours of the day, and to reduce the price of electric light and of gas. The petition was filed Jan. 29, 1890, and a public hearing in Chelsea was ordered for February 26, but the case was continued from time to time, at the request of the petitioners, so that the hearings were not finished until near the close of that year.

At the time of filing the petition the incandescent electric lights were run only until midnight, but before the case was fully heard the company began to supply these lights from dark to daylight, and, as the Board understands, will continue so to do. The petitioners, however, urged that the lights ought to be supplied during the remainder of every twenty-four hours. To do this would require a considerable additional outlay for labor and materials. At the bearings it appeared that the desire for day lighting was limited to three or four consumers, who would require in all but few lights; one or two others desired power for small motors. current were supplied for both purposes, the income would be but a small portion of the cost. The loss from such business would probably be borne in the end by other consumers, and the Board does not feel warranted in requiring the company to incur it. It believes, however, that as soon as any substantial demand for electric power appears, the company ought to make special effort to encourage its use, and to begin its supply as soon as it can be furnished at only a moderate loss. The small number of lights desired in the day-time might then be supplied at but little expense.

In the opinion of the Board no general order under this petition. concerning the quality of the incandescent light, seems to be demanded by the facts presented. Out of a large number of witnesses but few complained of poor lights; by far the greater number expressed satisfaction with them. The complaints, when carefully considered, seemed to be founded in fact, but to be due to a variety of local causes, such as overloading of converters, inadequate wiring, lights too few or too small, and bulbs blackened with long use. In some of these instances the remedy is in the hands of the consumer alone. In the other cases it did not appear that the complaints had ever been made at the company's office. Upon learning of them at the hearing, the company's agents expressed their desire to remedy the troubles and any similar ones thereafter arising. It is clearly the duty of a consumer who has trouble with his light to first make complaint to the company; and to this Board only when such complaint fails to secure a remedy. The authority of the Board has been found ample for the removal of any real grievance, although affecting only a single consumer.

But little evidence was directed to the question of electric light prices. The street lights are maintained at prices fixed by a contract with the company for a term of years. It did not appear that the prices to private consumers were higher than those generally charged by other companies making only a fair profit. The company's books show that more than \$80,000 has been invested in this branch of its business, and a careful investigation shows that it has been economically and carefully expended. For this work the company has incurred a debt of about \$75,000, and its electric business, with no allowance for depreciation, has returned a profit of barely five per cent. upon this sum. In view of these facts the Board believes it would not be justified in requiring a reduction in the price of electric lights at the present time.

The evidence submitted by the petitioners about the price of gas was almost entirely drawn from the printed reports of the Board, without the assistance of persons familiar with the business. They urged, however, that the several returns made by the company, its books of account and corporate records, be thoroughly and carefully examined, and that all competent facts found therein be fully considered.

In this examination the Board has expended much time, and has found such work necessary for a fair and impartial determination of the important questions involved.

For several years the dividends paid by the company have been only six per cent., which would be generally conceded to be a low rate, being in fact below the average dividend of successful companies, while the surplus profits applied to improvements have not been exceptionally large. On the other hand, it is a fact that more than a score of companies in the State have higher dividends and lower prices for gas. It has been necessary, therefore, to carefully study the company's management in all departments, and to seek to discover whether improvements might not be introduced, beneficial to shareholders and consumers alike. The company now enjoys a monopoly of the supply of gas and electric light. To

preserve this, it must keep fully abreast with the times, and must employ all suitable methods and appliances for the economical manufacture and distribution of its product; its management must be no less efficient and no more costly than that of others, and the charges for depreciation, improvements and profits must be no larger than in other similar and successful companies. If, however, there are local conditions, peculiar in their character, which impose exceptional burdens, these are to be estimated at their full value, and the company should not be required to supply at a lower price than any other corporation, well equipped and managed, would reasonably demand for the successful conduct of a like business in the same territory.

It was urged by the petitioners that if the works were upon the water front a considerable saving would be made, and that their present location imposed upon the public a needless burden. It does not appear, however, that any such location is now available, except at a price much too high. If such land had been secured when the works were built, it would now be so valuable that the interest on the larger investment, and the additional taxes, would more than offset any saving in handling of coal, which is now carted to the works at a net cost of possibly two cents for each thousand feet of gas.

Gas in the holder costs the Chelsea company but little more than the best companies charging lower prices. The excess is not large enough to be an important factor in justifying the difference in rates, and would probably nearly or quite disappear after needed improvements in the retort house.

In other departments of the company's work the same closeness of expenditure does not seem to exist. The cost for taxes is exceptionally high. For every thousand feet of gas sold the company pays, from seventy-five to one hundred per cent. more for taxes than almost any other company selling at a lower price. The expenditure for this purpose is greater than the entire cost of distribution or management. Whether this is due to an excessive valuation or high rate is immaterial. The fact exists, and becomes important in any attempt to fix the price. While this expense may be assumed to be without the company's control,

the same cannot be said of the cost of distribution, management or capital; especially the two former. These are unusually large in the Chelsea company, and in the opinion of the Board may well be reduced in the interest of the consumers.

The principal objection to an earlier reduction of the present price by the company is found in the fact that to pay dividends upon the present capital, even at the low rate named, has required an amount from every thousand feet sold that is larger, with but few exceptions, than that required by any other company in the State. The responsibility for this does not rest upon the present conservative management: it has come to them from a former administration. An injudicious conversion of profits, or supposed profits, into stock imposes in the end certain loss upon consumers or future holders of stock. The original issue of capital was larger than the fair cash value of the plant secured, and twice in the company's history it has distributed among its shareholders new capital. for which it has received no equivalent in permanent improvements; and although neither increase was large, the total has become burdensome. Only by a steady adherence to an opposite policy are the best companies in the State now able to maintain liberal dividends and low rates for gas.

In the opinion of the Board the amount per thousand feet required of consumers in Chelsea for dividends ought to be reduced. The price suggested is based upon these considerations, and, in view of the entire history of the company, seems fair and just to all concerned. If, in maintaining this price, it shall become necessary to reduce the rate of dividend until the consumption of gas shall be increased, or cost in holder and leakage loss be reduced through improvements in plant, such course will, nevertheless, give added strength to the corporation and greater permanency and steadiness to the value of stock.

The Board recommended that, from and after the first day of July, 1891, the price of gas in Chelsea be so reduced that the net rate charged shall not exceed \$1.75 per thousand feet to customers using not less than four hundred thousand feet per year, and \$1.80 per thousand to all others.

This decision was communicated to the company on May 6, and

on May 13 the directors voted to adopt the recommendations of the Board and to fix the price of gas in accordance therewith.

#### EASTHAMPTON GAS COMPANY, PETITIONER.

This was an application of the Easthampton Gas Company for authority to engage in the business of generating and furnishing electricity for light and power.

A public hearing was held at Easthampton, Feb. 6, 1891, in accordance with the notice published in the local newspaper, and served on the town, the petitioner and the People's Electric Company. The companies were represented by their presidents, and the town by one of the selectmen, who made no objection to the granting of the petition on the part of the town. A considerable number of citizens were in attendance, one or two of whom were heard in opposition to the proposed consolidation. The opinion generally expressed by those present was in favor of it, and all showed a desire for the continuance of the electric lights in the streets.

By the evidence it appeared that the capital of the petitioning company was over \$30,000, and that of the People's Electric Company \$5,000. The latter company was supplying about thirty-five arc lamps for lighting the streets of the village, which comprised a population of about 3,000. The Electric Company owned no land or steam plant but hired its power.

Both companies have the same clerk, and the same men constitute a majority of the directors in each. The belief expressed by them that the gas company could more economically manage the electric lighting rests, in the opinion of the Board, on a sound basis. The electric business is small and inadequate for the proper support of a separate company. From inspection of the premises it appeared that the gas works were suitably situated with vacant land adjacent available for an electric plant.

Some fear was manifested that, in case the petition should be granted, the price of electric light would be raised, and that the gas company would not be willing to supply incandescent lights. It will be remembered that the petitioner gave assurance at the hearing that the price would not be increased; and the Board can

see no reason why the price should be raised as the result of consolidation. If it believed such to be the end sought, the petition would be dismissed. Attention was called to the statutes which enable the Board to fix the price of light, and to the provisions under which it would have the power to require the consolidated company, as it can now the separate companies, to supply gas, and incandescent as well as are lights, to those justly entitled to them.

There was some difference of opinion among the directors of the gas company upon the advisability of increasing the capital stock in case of consolidation. It was admitted that the credit of the company was good, and that it could borrow at a low rate of interest. Its last dividend was eight per cent. Well aware that an undue enlargement of capital in such cases is likely to obstruct the benefits which otherwise might result from a union of the companies, the Board intimated that its action would depend, in some degree, upon the amount of capital proposed, and requested more . definite information after further deliberation on the subject by the company. The votes of the stockholders, which were put in evidence, in reference to engaging in the electric business and obtaining authority so to do, were faulty and not sufficiently explicit to meet the requirements of the statute. Furthermore, the companies had entered into no agreement in writing, such as the Board in previous cases had deemed an essential condition, setting forth the terms of consolidation, although it appeared that they had come to a verbal understanding.

The hearing was formally closed, but the consideration of the case was postponed to allow the companies time for such further action as they might deem expedient.

The stockholders of the gas company have held another meeting and passed the requisite votes. The directors have decided that it is inexpedient to increase the capital stock, and have authorized the treasurer to borrow the funds necessary to purchase the existing electric plant. A binding contract was also executed for the sale and transfer of the franchises, property and shares of stock of the People's Electric Company to the gas company.

In view of these additional facts, and under all the circumstances

of the case, the Board believed the petition should be granted, and so ordered.

#### METHUEN.

The petition of the Lawrence Gas Company for authority to engage in the business of furnishing electricity for light and power in the town of Methuen, the appeal of the Methuen Gas Light Company from the refusal of the selectmen to grant it permission to erect poles and run wires in the streets of Methuen, and the appeal of the Lawrence Gas Company from the decision of the selectmen of Methuen giving permission to George H. Drew and others to dig up the streets for the purpose of laying pipes for gas and erecting poles for electric wires, were heard together at the town hall in Methuen.

Notice of the hearing was published in the "Methuen Transcript," and mailed to all the parties named. The selectmen were present and the Lawrence Gas Company was represented by counsel. No one appeared for the Methuen Gas Light Company, or for George H. Drew and associates.

It is important to note the order of events to which the attention of the Board was directed.

By chapter 49 of the Acts of 1877, the Lawrence Gas Company was authorized to extend its pipes and to supply gas in Methuen, and was engaged in so doing at the time of the application of Messrs. Drew and others to the selectmen.

Nov. 12, 1887, the Board authorized the Lawrence Gas Company to supply electric light in Lawrence, and on June 17, 1889, the company applied for authority to supply electric light in Methuen.

June 22, 1889, George H. Drew and others, who stated it as their intention to organize the Methuen Gas Light Company, were granted permission by the selectmen, without a public hearing, to do all things necessary to conduct in said town the business of supplying gas and electric light; but, upon the condition expressed in the grant, the works were to be constructed and ready for operation within one year. From this grant the Lawrence Gas Company took the appeal referred to above.

Sometime prior to July 3, 1890, the Lawrence Gas Company

1892.7

petitioned the selectmen of Methuen for authority to erect and maintain poles and wires for electric lighting, and to lay pipes for supplying gas, the former permission having been lost and no record of its issue appearing upon the records of the selectmen. After a public hearing on this petition on July 22, the selectmen on August 2 granted permission to the company to lay and maintain pipes for gas, and September 6 permission to erect and maintain poles and wires for electric lighting, each grant being subject to certain conditions.

July 15, 1890, the Methuen Gas Light Company, composed apparently of persons other than those mentioned above, having completed its organization, applied to the selectmen for leave to erect and maintain poles and wires for electric lighting. On September 6 the application was refused, and the petitioners appealed to this Board.

It was shown that, up to the time of the hearing, nothing had been done by George H. Drew and associates toward complying with the conditions of their permit, and the selectmen unanimously expressed a wish that the grant should not stand.

An examination showed that the Lawrence Gas Company had surplus electrical apparatus ample to supply the present needs of Methuen, that no additional outlay would be needed except for line construction, and that there would be no necessity for any new capital stock. The wires of the Lawrence company already extended to the Methuen line, and but a short extension would be needed to supply all the lights which were likely to be demanded. The company had fully complied with the conditions accompanying the grant to lay gas mains, and would be easily able to do the same with those in the grant to construct electric lines.

No appeal was taken from either grant to the Lawrence company, and the right of this company to lay gas mains in Methuen had thereby become vested, and the Board had no power to overrule or defeat it.

It was conceded that no second company could successfully compete with it in the supply of gas or electricity in this territory. Upon a full examination, the Board was satisfied that the Lawrence company possessed every facility for supplying the people of Methuen with electric lights of superior quality, and at lower rates

than could reasonably be expected of a small company operating only in Methuen.

It was accordingly voted to grant the petition of the Lawrence Gas Company, to dismiss the appeal of the Methuen Gas Light Company, and that the appeal from the decision of the selectmen upon the petition of George H. Drew and others be sustained, and the authority thereby granted be revoked.

NORTHAMPTON ELECTRIC LIGHTING COMPANY, APPELLANT.

This was an appeal by the Northampton Electric Lighting Company from permission given by the mayor and aldermen of Northampton, March 20, 1891, to H. C. Hawks, as follows:—

"Voted, To grant permission to H. C. Hawks of Boston, Mass., to use the streets of the city for the erection of poles and stringing electric wires, both for city and commercial uses."

The appeal was filed March 23, 1891, notice issued March 31, and the case was heard April 17, in Northampton. The appellant and Mr. Hawks, the appellee, were represented by their respective counsel, and the city solicitor appeared in support of the action of the mayor and aldermen.

The city contains about 15,000 population, and has a gas company and one electric light company, the appellant, incorporated in 1886. Since the electric lighting company began business it has lighted the streets with arc lamps. Its last contract having expired April 1, 1891, it is now supplying the same, 93 in number, temporarily at the request of the city. It has also furnished commercial lights, both arc and incandescent, to all desiring the same.

In response to an invitation by the city, proposals were made, in the early part of the year, to do the public lighting on the basis of supplying 90 to 110 arc lamps of 1,200 nominal candle power, for a term of five years, burning from dark to midnight according to the moon schedule, so-called, or about twenty-five nights each month. The appellee, by proposal dated Feb. 19, 1891, offered to supply them at \$58.50 each, the firm of J. E. Lambie & Co. of said city, for about the same price, and the appellant for \$70 each.

But the offer of the appellee was based on the further express

consideration that he should receive, according to his understanding of it, a valid and perpetual franchise to use the streets of the city for the erection of poles and stringing wires for the supply of electric lights to private customers as well as to the city. And such, it is evident from the broad language of the vote above quoted, the city intended to give. A contract, bearing date April 17, 1891, the day of the hearing, was executed by the appellee and the city, acting through its committee, in substantial conformity with his offer, the lights to be supplied within six weeks "after the acceptance of said contract by said city-government."

Although the committee by the vote put in evidence was authorized to contract with a "company," it will be assumed that the city would accept the contract should such further action be deemed necessary.

For the purpose of considering the wisdom and legality of the grant to the appellee, the evidence in the case should be carefully examined. To persons familiar with the history of electric lighting, the difference in price between the bids of the appellant and the appellee would seem a low estimate of the value for all purposes, commercial and speculative, of such a franchise. appellee testified that he should retain an interest in the plant during the five years, but would not operate it personally, as he should continue in his present business; that other parties were to own it with him and furnish the capital. The names or residence of these parties he declined to give, though earnestly requested to do so. He stated that he expected to supply both arc and incandescent lights to private consumers, and that without the right to do so he would be unwilling to accept the contract for the public lighting. There are reasons, some of which have been stated by the Board in a former case, why the permission to the appellee is unwise. Admitting, what is extremely doubtful, that the statutes ever intended that an individual should be given the right to occupy the streets for the purpose of doing a general lighting business, he certainly ought not to transfer his license. The permission is personal to him. Such rights should be held and exercised by persons whose names and residence are known, so that they can readily be found if need be. The names should appear in the grant. The real persons in interest, the actual owners, should be

declared, as they are the ones who are and ought to be held responsible for negligence or misfeasance. Once admit that the right is assignable by sale, levy, devise or inheritance, it may then pass into the possession of persons wholly unreliable and unfit to perform the duties pertaining to it. Permanent grants of such a nature are best vested in some corporate continuing body.

It is difficult to consider the accepted proposal apart from the purchase of the franchise, but it may be due the parties and the public to examine the case in its general bearings.

As appeared by the evidence, the plant of the appellant company is not only sufficient for its present work, city and commercial, but is capable of supplying 1,000 additional incandescent lights and 25 more arc lights. It was not seriously alleged at the hearing that its equipment was faulty, that its price for incandescent light was too high, that its management had been extravagant, or its dividends excessive.

The appellee proposed to erect and equip a new plant adequate for all the street lighting, and for the commercial lighting so far as he may obtain it, using water power, and charging private consumers the same price as the city for arc lights. It did not appear that his price for incandescent light would be less than that paid to the appellant. While it is true that electrical apparatus can be bought more cheaply now than in 1886, it is believed that a plant capable of doing the street and commercial lighting would cost considerably above the estimate of the appellee. Although he had made no contract therefor, the appellee testified that he could obtain water power, supplemented with steam, for a term of five years, at the rate of \$25 per horse power a year. Even on this basis the estimate of operating expenses submitted to the Board by the appellee assures no adequate profit on the street lighting, omitting as it does real estate or rent of premises, insurance, cost of superintendence, taxes and other expenses, and some of the items included are much smaller than are found in actual practice.

There being so many resident stockholders of the electric lighting company it is evident that the appellee would at best get but a share of the incandescent business. There would then be two plants, each doing a portion of the lighting, and neither

yielding its owners a fair profit, if any. The saving of \$5,000 or \$6,000 in the expenses of the city during the five years life of the contract, while a considerable sum, is of little importance when compared with the waste and loss which must follow the unnecessary duplication of plants and a profitless contest for that period. It is a just principle, clearly acknowledged in the recent statute authorizing municipal lighting, that capital wisely expended for the purpose of supplying the public needs is entitled to be protected against destructive competition, even by a municipality. The rights and interests of the city, the stockholders and the citizens ought to be considered together, and the consumers in the end are thereby the gainers.

The history of electric lighting in Northampton, as shown by the evidence, is instructive. About five years ago there were two rival electric plants in operation in that city. After a few months of sharp competition, low prices and no profits, some of the stockholders of the appellant company, at their own expense, and presumably to give value to their stock, bought and removed the other plant. A like result would probably follow a similar experi-The Board believes that the Legislature intended, by the recent acts, that all the reasonable and permanent advantages of competition are to be gained through the regulating powers thereby conferred upon it. The statutes assume that cities and towns. as well as private citizens, are entitled to light at reasonable The only avowed object in granting the franchise appealed from was to secure a reduction in rates. The mayor alone or twenty customers, if the price is thought too high, may bring petition before the Board, asking that the price be reduced. This remedy ought to be invoked, if the existing company has suitable equipment and is well managed, before the community is subjected to the danger and inconvenience of a second system of poles and wires. Any lack of apparatus, or waste in the methods of business, any unnecessary cost of power, - indeed, everything relating to the economy and quality of the work of a company are rightfully taken into account in fixing the price.

If it is clearly made to appear that, by different manipulation or by the use of other kinds of power, machinery or materials, a considerable saving can be effected, and that these improvements

might be adopted by a new company, it would compel the inquiry whether the present one might not fairly be expected to acquire them, or submit to prices based on their possession.

In reviewing the facts in this case, the Board could discover no just ground for establishing another plant in the city at the present time. The Board therefore sustained the appeal, and revoked the permission granted by the mayor and aldermen.

#### MUNICIPAL OWNERSHIP.

Chapter 370 of the Acts of 1891, entitled "An Act to enable cities and towns to manufacture and distribute gas and electricity," commonly called the municipal ownership law, will be found in the appendix.

The Board has endeavored, by the means at its command, to ascertain what action has been taken throughout the Commonwealth in respect to the business contemplated by the act.

There are 210 towns and cities in the State with a population of 1,500 or more, and official information has been received from 205 of these. It appears that 180 towns have taken no action.

The towns of Framingham, Norwood, Hingham, Plymouth and Wellesley have appointed committees to investigate the subject.

In the city of Malden an order was adopted by the common council Oct. 15, 1891, for the appointment of a committee "to ascertain if it be expedient for Malden to adopt municipal lighting," but this order was tabled in the board of mayor and aldermen.

The city council of *Brockton*, by concurrent votes, passed the following resolution which was approved by the mayor Sept. 15, 1891:—

Whereas, Under the provisions of chapter 370 of the Acts of 1891, cities have been authorized, after certain prescribed municipal action, to establish plants for the manufacture or distribution of gas or electricity for furnishing light for municipal use or for the use of such inhabitants as may require and pay for the same; and

Whereas, In our opinion this city should not delay in the taking of the preliminary steps prescribed in said act, toward, what we think will prove of great benefit to the city and its inhabitants:—

Resolved, That, in the opinion of the city council of the city of Brockton, it is expedient to exercise the authority so conferred in said chapter

Both branches of the city council of *Chicopee*, by concurrent votes, Nov. 23 and 30, 1891, passed the following:—

Voted. That it is expedient for the city of Chicopee to construct, purchase or establish and maintain within its limits, one or more plants for the manufacture and distribution of electricity for furnishing light for municipal use, and for the use of such of its inhabitants as may require and pay for the same.

The town of *Everett* has had a series of adjourned town meetings where one of the articles to be acted on was the question of the establishment of an electric plant, but a final adjournment was had without acting on that subject. A warrant for a new town meeting on Jan. 26, 1892, has been ordered, which contains an article calling for a vote upon this question.

At a meeting of the legal voters of *Marblehead*, June 22, 1891, it was voted, 180 to 8, "that it is expedient to exercise the authority conferred by the act," and a committee was elected "to consider the requirements of the town, in the matter of an electric plant, and to report as to cost of the same with recommendations as to the system to be adopted." This committee is to report at the annual meeting in March, 1892.

At the last annual meeting in *Methuen*, there was an article in the warrant to see what action, if any, the town would take towards the establishment of an electric light plant, but it was voted, 113 to 50, to pass over the article. No other action has been taken.

At a town meeting in North Attleborough, June 30, 1891, the warrant contained an article relative to adopting the provisions of the act, which was acted upon favorably by a vote of 206 to 35.

At a special town meeting in *Reading*, Oct. 2, 1891, it was voted, 94 to 14, that "it is expedient for the town to exercise the authority conferred by the act."

In Spencer, at a meeting, July 21, 1891, the following article was in the warrant: "to see if the town will vote that it is expedient to exercise the authority conferred by the act." Under this article the matter was referred to a committee, and no further action taken until October 6, when on a similar article the vote was 3 yes to 283 no.

At the annual meeting in Weymouth, March 4, 1889, the subject of the establishment by the town of an electric light plant was considered but "indefinitely postponed."

In Fall River, a committee having reported on Oct. 5, 1891, against the advisability of establishing a municipal plant, the city council adopted the recommendations of the committee.

At a town meeting in Whitman on Dec. 30, 1891, it was voted, 57 to 5, that it was expedient for the town to exercise the authority conferred in section 1, chapter 370 of the Acts of the Legislature of Massachusetts for the year 1891, "to purchase, establish and maintain within its limits a plant for the manufacture and distribution of electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same," as provided for in said chapter. A committee was also appointed to consider the question and report at a future meeting.

At a town meeting in *Hudson* on July 1, 1891, it was voted, 30 to 7, to exercise the authority conferred by the act, and on Sept. 2, 1891, a similar vote was passed, 60 to 11. At a meeting on September 16, a committee was appointed "to investigate relative to the entire subject of municipal lighting by gas or electricity." On November 11 a majority of this committee reported, "recommending to the citizens of this town that as a corporate body their best interests demand that they do not embark in the business of electric lighting," and it was voted, 84 to 60, to adopt this report.

In Wakefield, March 6, 1891, the selectmen were instructed to petition the Legislature "for authority to build a gas or electric light plant, or both, with authority to manufacture light for public use and also to sell light for private use." On July 9 it was voted, 216 to 26, "expedient for the town to exercise the authority conferred by chapter 370 of the Acts of 1891." On Nov. 3, 1891, the selectmen were instructed "to petition the Legislature to enact a special law empowering the town of Wakefield to erect a plant for the purpose of generating electric light for municipal, commercial and individual purposes, without purchasing any existing plant." At a meeting November 3, the selectmen were made a committee "to confer and negotiate with the Citizens' Gas Light Company to ascertain for what amount and upon what terms said company will sell its gas and electric light plant, or any part thereof, to the town and what it will cost the town." At an adjournment of this meeting on November 17, the selectmen reported that they had conferred with the Citizens' Gas Light Company and that "the town could purchase its plant for \$140,000." No further action was taken.

In Melrose, at a meeting March 3, 1890, a committee was appointed to investigate "in relation to establishing an electric light plant." At an adjournment, March 24, the committee reported favorably, and were directed "to investigate farther with the special view of ascertaining what legal objections, if any, existed." The committee petitioned the Legislature for a special act giving the town "authority to establish or build a gas or electric plant, or both, and sell light for public and private use;" and at a town meeting on Feb. 16, 1891, this action was approved, and a committee appointed to urge the passage of the bill. The town also by unanimous vote endorsed the legislative petition for a general law. The committee previously appointed has not been discharged but has made verbal report favorable to the project. At a meeting, June 8, it was by vote of 11 to 1 "declared expedient for the town to exercise the authority" conferred by the municipal ownership act, and "the committee on electric lighting was directed to inquire and report whether, in their judgment, it is expedient and desirable for the town to erect and maintain a plant for the generation and distribution of electricity for public and private lighting; also, what will be the probable cost of a complete electric light plant suitable for the necessities of the town." At the meeting of Nov. 3, 1891, under an article (No. II.) in the warrant, "to see if the town will accept the provisions of chapter 370, Acts of 1891, and pass any votes in connection therewith which may be deemed expedient," the following votes were passed: -

That further consideration of Art. II. be postponed to an adjourned session of this meeting, to be held the same evening as the next town meeting shall be held for the transaction of town business;

That this meeting be adjourned until the evening when the next town meeting shall be held for the transaction of town business, said meeting to be called to order thirty minutes before the time designated for the next town meeting held in the evening for the transaction of town business:

That the selectmen be instructed to insert in the warrant for the next meeting called for the transaction of town business, an article covering such action of the town as may be necessary to carry into effect an ac

entitled: "An Act to enable cities and towns to manufacture and distribute gas or electricity."

The Board is informed that these votes were passed to give the committee time to investigate still further and report a plan; also to make sure that, having placed the article in the warrant and before the people, it might not be construed as a failure to act under the law.

March 27, 1890, the city council of New Bedford adopted an order appointing a committee "for the purpose of investigating as to the cost of establishing, maintaining and operating an electrical plant in this city, for the purpose of supplying the several departments, including the streets, with electric lights; also to obtain information regarding the experience of other cities, and any other knowledge relating thereto." Sept. 11, 1890, they made a report from which it apeared that they were not prepared to recommend the construction of a plant by the city. The report was received and filed, in concurrence, and no action has since been taken.

The town of Peabody voted on June 18, 1891, 614 to 87, and again on Aug. 20, 1891, 551 to 22, that it was "expedient for the town to exercise the authority conferred in section 1, chapter 370 of the Acts of 1891, to construct, establish and maintain within its limits a plant for the manufacture and distribution of electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same, as provided in said chapter." On the latter date a committee was appointed to "investigate what further action should be taken by the town for the purpose of establishing in the town a plant for the manufacture and distribution of electricity for use in lighting the streets and public buildings of the town, and to report a suitable location for such plant, and the cost of establishing, maintaining and operating the same." At a meeting Sept. 29, 1891, the committee reported, recommending "that the sum of \$47,000 be appropriated for the purpose of establishing an electric-light plant; that a committee of five be appointed with full power; that the town authorize them to buy land, set poles, string wires in the streets, to take stone and material for grading from the gravel pit owned by the town, and do all other acts necessary to be done; that the town treasurer be authorized, with the approval

of the selectmen, to hire for this purpose the sum of \$47,000 in such manner and on such terms as they deem best for the town." It was voted, 225 to 10, to adopt the recommendations. The matter of incandescent lighting was referred to the same committee, to report thereon at the next annual meeting.

The town of Danvers, at a special meeting on April 16, 1888, voted, 221 to 9, to appropriate \$15,000 for the purchase of an electric-light plant. Chapter 378 of the Acts of 1891, entitled "An Act to legalize the action of the town of Danvers in establishing an electric light plant, and to authorize said town to generate and distribute electric light and power," was accepted by the town by a vote of 60 to 6 at a meeting on the 20th of October, 1891. Since 1888 this town has maintained and operated an arc-light plant for the purpose of lighting the streets, but has done no commercial lighting. No return or report of any kind has been received from the town of their lighting operations and it is doubtful if any is yet due the Board. The special act for the benefit of Danvers was passed after the general municipal ownership law and did not include the important provisions of the latter respecting accounts and returns. The course of this town has aroused extended interest on the part of private corporations and other towns in the question of municipal ownership of lighting plants, and definite and reliable information will undoubtedly prove of great value to the public. It is respectfully suggested, therefore, that the provisions applying to other towns engaged in this business respecting accounts, returns and the jurisdiction of this Board be extended to Danvers.

Chapter 370 above referred to imposes important duties and powers upon this Board whenever a town assumes to exercise the authority conferred. The Board would be greatly aided in its work by a provision requiring any action by the town under this chapter to be communicated to it.

#### VIOLATION OF LAWS.

Notices have been sent to the attorney-general, in compliance with the statutes, of the alleged violations of the laws:—

The Gardner Gas Light Company, by not having an office in Gardner, where its works are located, and by having refused to

submit its books to the Board on application, in violation of section 1, chapter 346, Acts of 1886.

The Citizens' Gas Light Company of Quincy, Gardner Gas Light Company, Natick Gas Light Company, Electric Light and Patent Flooring Company of Amesbury, Framingham Electric Company, Milford Electric Light and Power Company, Nantucket Electric Light Company, Natick Electric Company, and the Suburban Light and Power Company of Boston, in not making returns to the Board, as required by law.

#### ACCIDENTS.

The statute in relation to accidents caused by gas or electricity, section 2, chapter 350, Acts of 1888, is as follows:—

All companies and individuals engaged in the business of manufacturing and selling gas or electricity for light or fuel, shall make a written report within twenty-four hours to the board of gas commissioners of every accident caused by the gas or electricity manufactured or supplied by them, whereby an employee or any other person shall suffer bodily injury, or loss of life, or be rendered insensible, stating the time, place and circumstances of the accident, and such other facts in relation thereto as the board may require; and the board shall present in its annual report an abstract of all such cases. The board shall personally investigate all cases which it may deem to require investigation.

During the year 1891, there have been five persons injured by electricity from electric light wires, one of them fatally. Thirty persons have been injured by illuminating gas, sixteen of them fatally. Of the latter number, two committed suicide. The following is an abstract of the cases:—

#### Accidents from Electricity.

John Tierney, an employee of the Consolidated Hand Method Lasting Machine Company, was killed shortly after 3 o'clock P.M., Jan. 10, 1891. The plant of the above-named company is a private one, owned by Bradley & Woodruff, who arranged with the Boston Electric Light Company to connect their system of wiring with the circuit of the electric company, so that when the Bradley & Woodruff dynamo was not running, current could be had from the electric company. At the time of the accident the current of the electric company had been switched on to the wires of the machine company. Tierney was at work at an iron lathe on the top floor

of the premises, 234 Congress Street. Over the lathe was susnended by an insulated wire, an incandescent lamp socket, out of which the lamp had in some way been broken. Before screwing in a new lamp. Tierney touched the socket with his fingers to see if he could feel any shock or current, and getting none he took hold of the socket firmly with his right hand. The muscles of his hand closed upon the socket so hard that to release it a fellow workman struck it from his grasp with a hammer. Tierney fell to the floor, apparently lifeless. A physician and the medical examiner said that death must have been instantaneous. upon which Tierney stood seemed to be thoroughly soaked with oil, and under his machine was a piece of zinc or other metal upon which he was probably standing at the time. Whether his left hand was in contact with the machine at the time when he took hold of the lamp with his other hand is not certain. When these lamps were run from the electric light company's current it was by an alternating current, which entered the building through a transformer. After the accident the transformer was removed, and a test made showed a contact between the primary and the secondary coil, due to the expansion caused by the heating of the internal parts. The many expansions and contractions had removed the insulation on the wires. The latest style of transformer has remedied and removed former defects in construction by a change in form and in the leading-in wires, and will prove safe if properly installed and connected.

John Todd, an employee of the North Attleborough Steam and Electric Light Company, attempted, while standing on a very wet earth floor, to hang an iron lamp-holder on a projection of the bed-plate of a one horse-power arc motor that was placed six feet from the ground, and received a portion of the current which passed through him into the earth, burning his hand quite badly. He had been repeatedly warned of the danger arising from the motor.

R. H. Parker, employed as a trimmer by the Worcester Electric Light Company, received a slight burn on his hand while running a ground on one of the Company's line wires. The accident was so slight as to cause Mr. Parker no loss of time or serious inconvenience.

The Lowell Electric Company reports that, on May 16, at 5.30 P.M., an accident occurred, due to the crossing of an unused telegraph wire with their arc light wire. This cross caused the iron front of a building to become charged with electricity and the line men were notified. A telegraph man cut the unused wire, but failed to notice that the stretch between himself and the cross was not tied to the pins. This stretch of wire fell into the street and struck a horse, killing it instantly, and slightly injuring Frank Burns who went to its assistance.

The Boston Electric Light Company reports that, on December 24, at about 4.45 P.M., William A. Roust, twenty years of age, a trimmer of arc lamps, employed by them, while endeavoring to fix a lamp located opposite 315 Dorchester Avenue, South Boston, fell from the post to the sidewalk. Examination showed that Roust having finished his days work was passing the lamp and thought that it was not working properly, so mounted the post to fix it. He was noticed by Messrs. Kelly and Finnegan, wood dealers at 328 Dorchester Avenue, to start the lamp, and put it out and start it again, making a motion as if to reach for the switch, and to immediately fall to the sidewalk. He was taken to the City Hospital, where an examination showed both hands superficially burned in the palms, and two cuts on the right elbow as large as half dollars. Mr. Roust said that he had no distinct recollection of what he was doing, or where he was at the time of injury, but was hurt, he thinks, while putting up a globe. Some ten years ago he had a sunstroke. He was discharged from the hospital, well.

## Accidents from Gas.

The Fall River Gas Works Company reports that John J. Finnegan, aged thirty-two and unmarried, who was employed by the Fall River Water Works, was found dead on January 13, at about 9 A.M., in a pit near the gasometer, owned by the Fall River Gas Company at the corner of Davoll and Turner streets. It was part of the duty of the deceased to read the water meter placed there. There was no sign of an explosion, and no gas leakage could be discovered. An autopsy made gave no indication as to the cause of the death. An examination of blood made by Professor Wood of the Harvard Medical School showed that death

resulted from gas poisoning. Water gas was being made at the time.

The Northampton Gas Light Company reports that Joseph L. Myers, a guest at the Mansion House in the city of Northampton, committed suicide by inhaling illuminating gas from the burner in the room occupied by him during the night of March 3. Examination showed that Myers was a commercial traveller. about thirty-five years of age, who came to Northampton from Springfield, March 2, and registered at the above hotel as J. L. Myers, New York, and was assigned to room 53. After his return from visiting a business house in search of employment he spent the greater part of the evening writing letters to friends and chatting with the landlord and guests. At about nine o'clock, he visited a store in the vicinity of the hotel and purchased some five feet of half-inch rubber tubing, returned after a short time to the hotel, and retired to his room about midnight. At eight o'clock the next morning, a strong odor of gas was discovered in the hall, and an investigation by the night clerk showed that the odor came from room 53. The door was forced open and Myers was found in bed, covered up and dead. He had wheeled his bed as near the gas jet as possible, placed one end of the rubber tube over the opening of the burner, and, taking the other end in his mouth, turned on the gas. The contents of letters written to friends and the deliberate preparations made it clear that this was a case of suicide.

The Dorchester Gas Light Company reports that on April 2, Thomas Duran, an employee of the water department of the city of Boston on general repairs and services, was rendered unconscious from foul air and the escape of gas from a gate box, while attempting to shut off water. It appeared from examination that Duran crawled into the gate box before ventilating it, after being advised by a fellow workman not to do so. He remained unconscious for an half-hour, but recovered from the effects of the gas in a few days.

Miss Bertha Everett, twenty-two years of age, arrived at the Parker House, Boston, about 11.20 p.m., April 27, in company with friends, who shortly left her. She was assigned to a room, leaving an order to be called at 6.30 in the morning, as she

intended to continue her journey to Haverhill, Mass., where her relatives resided. On calling at her room at the above hour, no answer being received an entrance was effected by breaking open the door. She was found lying upon the bed, the body rigid, but warm. Life had been extinct probably an hour. There was a strong odor of gas in the room; the burner, a three-foot tip, in good condition, was fully open. The room has a capacity of thirteen hundred feet. It is believed that death was accidental, probably caused by blowing out the gas.

Charles Oltsch, aged thirty-five, stopping at the boarding-house of Mrs. F. A. Barringer, Pittsfield, was found in his room, at about 9 o'clock on the morning of August 23, groaning, breathing heavily, and unconscious. The gas burner was partially opened and gas escaping. The room contains about twelve hundred cubic feet and has one window, partially open at the time; also one door, fitting loosely. A physician was summoned, and Oltsch removed to another room, where windows were opened and hypodermic injections administered. At about 4 o'clock P.M. he had sufficiently recovered to converse. He was a delicate man, but fully recovered from the effects of the gas in a few days.

Janos Greskovitz, a native of Poland, aged thirty, was found insensible in his room at the Burbank Hotel, Pittsfield, at 6 o'clock A.M., July 9. The gas was flowing from a partially open burner. The keyhole was stopped with paper, and the window tightly closed. Greskovitz explained, after his recovery, that he stopped the keyhole in order to prevent a very bad smell coming in from the hall, as he supposed. The room contains about sixteen hundred cubic feet. He was sent to the House of Mercy (hospital) at about 9 A.M., and discharged July 10.

Michael McNamara and Thomas Hamilton, day foreman and laborer, employed at the works of the Worcester Gas Light Company at Worcester, were suffocated from inhaling gas in the valve house of said company on the 16th of May. The men were sent by the superintendent to make a small connection for a jet photometer on the outlet pipe of the No. 1 gasholder to test the quality of the gas. For this purpose it was necessary to drill a three-eighths inch hole, as the plug in the pipe formerly used had become rusted. For this work the foreman sent Thomas Hamilton into the cellar of

the valve house, but without an assistant as is usual. return of the foreman to look after the work, he found Hamilton overcome by gas and called out for Patrick Ryan, another workman. McNamara at once jumped into the cellar of the valve house and tried to pull Hamilton out, without taking the precaution to stop the flow of gas through the newly drilled three-eighths inch hole, although soap was found near which had been taken by the man sent to do the work. On the arrival of Ryan, in answer to the call, he found McNamara trying to pull Hamilton out and fast being overcome. Rvan then endeavored to assist McNamara but became unconscious in a few moments and was discovered by Superintendent Wetherbee and the clerk of the works. After filling the hole with soap, the three men were immediately removed to the surface, but McNamara and Hamilton were dead. Ryan was sent to the hospital and soon recovered. Superintendent Wetherbee was rendered partially unconscious while assisting in removing the men. Foreman McNamara was thoroughly conversant with his work and had been in the employ of the company for some eighteen years. Water gas was being made at the time of the acci dent.

Henry S. Taylor, aged sixty-three years, a clothing merchant of Pittsfield, was found dead in his bed at the house of his son on Wendell Avenue, on Sunday morning, September 6, having been asphyxiated by illuminating gas. He retired to his room at about 11.45 p.m., and was found soon after eight the next morning. The room contains about nine thousand cubic feet. There are two windows and one door in the room, all of which were tightly closed. The fixture was of the candle type and operated by electricity, and according to statements of the family had never worked perfectly. It is supposed that in using the attachment to extinguish the light the gas was not shut off. Water gas was being made at the time of the accident.

Edward Burgess, aged about thirty-five, registered at Hotel Columbus, 112 Commercial Street, Boston, at 11.40 P.M., May 30, 1891, from Marlborough, Mass., and was shown to room 12 on the third story. He was found in the forenoon of June 2, lying in bed, dead. An odor of gas in the house was traced to room 12, which was found full of gas, the cock half turned on.

The gas fixture was in good condition, having a burner marked "two-foot;" a half turn of the cock shut off certainly half the flow of gas, allowing two or possibly three feet to escape. The physicians who were called said that he had been dead two days or more. The man, who paid in advance for one night's lodging, appeared sober, and was given no liquor at the hotel. The death was probably accidental. The room contains about seven hundred and seventy cubic feet, with one window fitting loosely and one door fitting tightly.

Euginio Gallo and Giorgio Niccolo, sailors, registered at the Hotel Columbus, corner of Richmond and Commercial streets. Boston, at 10.30 o'clock P.M., July 8. The next morning at 6 o'clock when the door of their room was opened, Gallo was found unconscious and Niccolo slightly affected by inhaling illuminating Gallo was removed to the City Hospital where he remained two days and was discharged, well. Niccolo remained about the hotel for a few hours and returned to his vessel, apparently all right. The room occupied has two beds, two windows and two doors, and contains about nine hundred cubic feet. There was one three-foot burner fully open. It appeared that Niccolo got out of bed after midnight and after smoking blew out the gas and retired. Gallo was a delicate man, about forty-four years Niccolo was very robust and about twenty-five years of old. age.

On the night of July 12, H. S. Stron and Axel Janssen, sailors on the U. S. S. Newark, took a room at the Hotel Eastern, Causeway Street, Boston, and retired, asking to be called at 5 A.M. At that time they answered the call but remained in their room. About 10 o'clock the men were found by the wife of the proprietor, the room being filled with gas. Janssen was lying on the bed, dead, and Stron was on the floor gasping for breath. Stron was removed to the Massachusetts General Hospital and was discharged well on July 14. The room contains about eighteen hundred cubic feet, and has two large windows and two doors all closed tightly. The burner was a three-foot one in good condition. In the room a half-empty bottle of liquor was found, but the night clerk says that the men were sober when they registered.

July 8 about noon a woman registered at the Victoria Hotel, corner of Dartmouth and Newbury streets, Boston, as Mrs. J. Clifford, Charleston, S. C., and was assigned to room 58. At about 10 o'clock A.M., July 11, the chambermaid, finding the door of the room locked, and being unable to open it, notified the office. The door was opened and the occupant found dead, upon the bed. The room was filled with gas, both burners being wide open. A lace handkerchief had been crowded into the kevbole of the door leading to the adjoining room, and pieces of cloth had been put into the keyhole of the door leading into the hallway. Cloth had also been crowded closely under the doors with some thin instrument like a knife, and especial care had been taken, by crowding in newspapers, to stop all ventilation around the windows. The physicians said that the woman had been dead since the evening before the discovery of the bod v.

John F. Lynch of Attleborough registered at the City Hotel, Taunton, August 4, and at 2 o'clock in the morning was discovered suffering from the effects of inhaling gas. He was cared for by the night clerk of the hotel, and in a few hours was all right. On retiring he had blown out the gas instead of turning it off.

James G. Ryan of Salem was made seriously ill by illuminating gas on Sunday afternoon, September 27. It appeared that Mr. Ryan went to his chamber and took with him a young son. Both lay down on the bed and quickly fell asleep, the child, sleeping but a short time. On waking, the child took hold of the gas stop-cock and began turning it backward and forward, but soon got off the bed, leaving the burner open, and went into another room. Over an hour afterward Mrs. Ryan detected a strong odor of gas, and, opening the door of the chamber, found her husband on the bed, face downward, his body rigid. She immediately opened the windows, turned off the gas and summoned a physician, who worked over Mr. Ryan for some time and succeeded in restoring him to consciousness, but he suffered from the effects of the gas for several days.

James Reardon and Michael Lordon were found about 6.30 A.M. on October 27, the former in bed, dead, and the latter on the floor unconscious, in the room occupied by them at 199 Harrison

Avenue, Boston. They went to bed, as near as can be ascertained, about 11 o'clock. Failing to answer when called by the keeper of the boarding-house at the usual hour, 6.30 o'clock, the door was forced open and the men found. Both were laboring men; Reardon about seventeen years old, of slight build, and Lordon about thirty, of rugged physique. When the room was entered the gas burner was found about one-third open and the room filled with gas. The door and window both fitted tightly. The room contains about six hundred cubic feet. Lordon was removed to the City Hospital, and was discharged from there October 31, well.

Daniel McElligeth, aged forty, a fruit peddler, roomed at 7 Briggs Place, Boston, and was found by the lessee of the house about 1.30 p.m. on Saturday, November 14, lying on the floor of his room, partially unconscious and suffering from gas poisoning. It was found that McElligeth went to his room about 9 p.m. on Friday, November 13, and being missed by his friends, an inquiry at his boarding-place led to an investigation. The room contains about fifteen hundred cubic feet and has two large windows and a door fitting loosely; there are two five-foot burners, one of which was fully open. McElligeth cannot account for the gas having been left flowing. After a few days' treatment at the hospital he was discharged well.

On the night of December 10, after midnight, C. H. McDowell of Swansboro', N. C., arrived at the United States Hotel, and registered as John Williams, Providence. The next morning about 10 A.M., after repeated calls, a failure to respond awakened the suspicions of the hotel porter, who looked through the transom and saw the man lying upon the bed. The room was forcibly entered, and a three-foot gas burner found fully open and the room filled with gas, rendering McDowell insensible. He was removed to the Emergency Hospital, and thence to the City Hospital, where he remained until December 18, when he was discharged, well. The room contains about eight hundred and fifty cubic feet. McDowell says that he probably blew out the gas on retiring.

On the night of Dec. 24, at about 11 o'clock, a young man about twenty-one years of age registered at the Hotel

Marion, corner of Pleasant and Eliot streets, Boston, as Tom Holt, and was assigned to a room on the fourth floor. On the afternoon of the 25th, about 3.30 o'clock, the son of the proprietor noticed a strong smell of gas, and traced the same to Holt's room. An entrance was effected and the occupant found insensible, with the burner wide open. A physician was summoned and finding a slight movement of the heart endeavored to restore consciousness, but was unsuccessful, and the man died shortly afterward. From information obtained it appears that the name of the young man was Thomas Herbert, and that he came from Providence, R. I. The medical examiner believes the case to be suicide. The young man was well dressed, and evidently in good health.

The Brockton Gas Light Company reports that on the evening of Dec. 25, two girls, aged ten and eight years, occupied room 6 at the Hotel Elmore. Before retiring one of the girls turned off the gas: the other tried to lock the door of the room, but was unable to do so on account of a defect in the lock. then turned on the gas, under the impression that it would light by so doing. Not feeling the effects of the escaping gas The night porter both girls retired and were soon asleep. in his rounds about eleven o'clock discovered an odor of escaping gas, and notified the proprietor (the father of the girls) who, failing in his attempts to get an answer from the occupants of the room to his repeated calls, opened the door and removed the girls to another room; the effects of the gas were but temporary, and the girls soon recovered. The room contains about fifteen hundred and fifty cubic feet.

On January 18, George Clark, Margaret Clark and Mary E. Gillis were found dead in bed in the basement of 21 North Grove Street, Boston. Clark was about twenty-six years of age, Margaret Clark about thirty-five and Mary E. Gillis not over five. The discovery of escaping gas was made by Officer Glawson of the third division while patrolling his beat, and traced to the above house. Entering, he aroused the inmates of the house above the basement, two of whom were in such a stupefied condition from the effects of gas that they had to be carried to the street. The other inmates reached the street without assistance, and

on breathing the fresh air fully recovered. The escaping gas came from a drain pipe running from a sink in the room occupied by the Clark family and connected with an old drain constructed of planks, used as a part of the former sewage system of Parkman Street. A break was found in the gas main in Parkman Street, about one hundred feet from the house, and about one foot above the so-called surface sewer connected with the house, at a point where by decay the sewer had fallen in. This removed the necessary support for the gas main and caused the break. The old so-called surface sewer had been placed there before 1836. The gas main was laid more than fifteen years ago, but no defect or break had occurred at that point before, so far as known, and no smell of gas had been noticed in the house. The dwelling is old fashioned and had three tenants.

The Fall River Gas Works Company reports that on March 1 several persons were slightly affected by an escape of gas from a broken main, one man having been made insensible for a short time. The main, which was a six-inch one, was probably broken by the passage of a heavy engine some weeks before. The smell of gas had been noticed for some days and the freezing of the ground probably caused the gas to pass into the houses, on the line of the main.

Peter Jones, a bootblack, occupying the basement of the fourstory brick building 22 Chapman Place, corner Bosworth Street, Boston, entered the building on the 7th of December a little after 7 o'clock A.M., and detecting the smell of gas opened the windows in the basement. Satisfied that the room had been freed from gas he lighted a match, causing an explosion. He was thrown against the wall and after being assisted to the sidewalk was sent to his home. Just before Jones entered the building William Haynes, the occupant of a room in the fourth story, went in, and noticing a strong odor of gas, opened the windows on each landing as he went up. Shortly after opening the windows he heard the explosion and at once started for the street which he reached in time to see Mr. Jones coming from the basement. glass in the front of the first floor occupied by John Mack & Co. was completely shattered, the floor torn up and the walls badly

torn. The basement occupied by Mr. Jones was also damaged. The gas came into the building under the front wall on Chapman Place from a broken gas main. The break in the pipe was caused by a settling in the street in front of the building.

The following cases, which were omitted from the report of 1890, have been furnished the Board by Dr. S. W. Abbott, Secretary of the State Board of Health, and are here inserted in order to make the report of these cases as complete as possible.

John S. Fuller of Wareham, aged 61, took a room at the hotel No. 41 Kneeland Street, Boston, at 11.30 P.M. on Jan. 4, 1890, and was found dead in bed at 10 A.M. on January 5, with the room full of gas, the cock being half open. The man was just recovering from a spree and the medical examiner made a return of accidental death.

August Jno. Mulsen, aged 27, was found dead in his room in Boston on Aug. 10, 1890, with the gas turned on and all the windows and transoms shut. He had no money and the medical examiner reported the case as one of suicide.

The total number of deaths caused by inhaling illuminating gas in the United States during the year 1891, as reported to the Board from various sources, was two hundred and eleven. In the reports thus given, it appears that of this number thirty-three were cases of suicide, and one hundred and seventy-eight are supposed to have been accidental. The accidental deaths from illuminating gas, omitting those in this State, occurred in the following cities and towns:—

New York City, 32; Chicago, Ill., 34; San Francisco, Cal., 16; Baltimore, Md., 6; Washington, D. C., 10; Philadelphia, Pa., 7; Sioux City, Ia., and Omaha, Neb., 4 each; Toledo, O., Minneapolis, Minn., Brooklyn, N. Y., and Milwaukee, Wis., 3 each; Hartford, Conn., Terre Haute, Ind., Norfolk, Neb., Hoboken, N. J., Detroit, Mich., Providence, Pa., Poughkeepsie, N. Y., and Des Moines, Ia., 2 each; St. Joseph, Mo., Wellsville, Newport, and Columbus, O., Joliet and Urbana, Ill., Los Angeles and Sacramento, Cal., McKeesport, Carlisle and Reading, Pa., Woonsocket and Pawtucket, R. I., Plainfield, Atlantic City, Asbury Park and Long Branch, N. J., Yonkers and Albany, N. Y., Marquette, Mich., Waterbury and Bridgeport, Conn., Memphis, Tenn.,

Lincoln, Neb., Burlington, Ia., St. Paul, Minn., and Superior, Wis., 1 each.

Following is the number of fatal accidents occurring in each month during the year: January, 23; February, 17; March, 17; April, 17; May, 17; June, 21; July, 11; August, 8; September, 19; October, 22; November, 21; December, 18.

Of the fatal accidents from gas two occurred where oil gas is made, six where coal gas only is made, seventy-one in places where there is only water gas and ninety-nine where both coal and water gas are used.

The following table shows the corporate name, the localities supplied, the capital and the par value of the shares of the companies in active operation on the thirtieth day of June last:—

Seven of the companies appear not to have earned expenses, and twelve others have not earned sufficient to warrant the declaration of any dividend.

The receipts for gas sold by meter show an apparent increase of about \$608,000; but the sales made by various Boston companies to one another, and thus counted twice as sold, reduce this amount to about \$8,000. Receipts from public lamps continue to fall off, this year showing a decrease of about \$35,000.

In the appendix will be found, under date of June 30, 1891, the separate balance sheets of the companies, as taken from the annual returns, with corrections as made by the Board after examination and correspondence with the officers of the several companies.

Aggregates from these balance sheets and those in the returns of 1890 show the following facts:—

## PRICE OF GAS.

The following companies have reduced the price of gas during the year ending June 30, 1891:—

Brookline, Citizens' (Wakefield), Dorchester, Malden, Roxbury, South Boston, Springfield.

At Spencer, the price of gas has been raised from \$1.25 to \$1.60.

The following pages show the price charged by the several companies, June 30, 1891; the average candle-power as shown by the tests made by the State inspector of gas; and the average price, per thousand feet sold by meter, received in the two years ending June 30, 1891.

The gas made is coal-gas, except where otherwise noted.

Roxbury, .	Sulem, .	South Boston, Southbridge,	Spencer, Springfield,	Stoughton,	Trunton, .	Ware,	Webstield,	Williamstown, .	Wohnrn, . Worcester,

The average price to consumers for coal gas, of twenty-five companies making annually more than 30,000,000 feet each, is \$1.3110 per thousand feet. The average price of the remainder of the coal-gas companies is \$1.9645, making an average for all of \$1.3557 per thousand. The average price for oil gas is \$3.7568 per thousand feet.

The average price for coal gas in 1886 was \$1.72; in 1887, \$1.66; in 1888, \$1.56; in 1889, \$1.45; in 1890, \$1.39; and in 1891, \$1.31, — a steady gain for the consumer.

The following table shows the amount of gas made in the year ending June 30, 1891, and in the year ending June 30, 1890; the amount sold by meter and to public lamps in both these years; the amount used at works and offices; and the amount of gas unaccounted for during the year ending June 30, 1891, and the percentage of unaccounted-for gas in both years:—

- 1 28 tons of screenings, cinders and anthracite used for generating steam.
- <sup>2</sup> 747 tons coke and screenings from generator used for steam.
- \$ 306 chaldrons coke used in generator; steam obtained from electric-light boilers.
- 4 Steam taken from electric-light boilers. Non-illuminating gas made.
- <sup>5</sup> For generating steam, 314 tons pea coal, 19 tons buckwheat coal, 3 tons coke, 51 tons screenings, 22 tons slack.
- <sup>6</sup> 24 tone Cumberland used for generating steam. Non-illuminating gas made. In operation from Jan. 13, 1891.
  - 7 Steam taken from electric-light boilers.
  - 8 4,837 bushels of coke used in generator. Coke used for steam; quantity not given.
  - <sup>9</sup> Coal and coke breeze used in generating steam. Quantity not given.
  - 10 Made in works and not measured. 90 tons of coal used for generating steam.
  - 11 46,763 bushels coke used in generator, and one-sixth of a bushel per M used for steam.

### STREET MAINS.

The returns by the various companies of their street mains are still somewhat deficient in detail. During the year fifty-one companies laid about forty-nine miles of mains, varying in the several cases from less than one hundred feet to nearly eight miles.

The following table shows the lengths and sizes of the mains, as returned by the companies:—

METERS.

The total number of meters in use June 30, 1891, was 110,778, representing a nominal capacity of 796,302 lights, being an increase over the previous year of 6,272 meters, and 36,809 lights.

The following table shows the details concerning numbers and sizes.

(Boldface figures show decrease.)

### PUBLIC LAMPS.

The number of public gas lamps supplied by the companies shows a decrease of 1,384 for this year.

The oil-gas companies show a loss of 2 for the year.

The following table shows the number of lamps supplied June 30, 1891, the net increase or decrease during the year, the average price per thousand feet received from gas used in street lamps, and also the cost per thousand feet of the care of the lamps when this is done by the companies:—

Public Lamps - Coal-gas.

#### PERITY OF GAS.

The law provides that when the gas of any company is found on three consecutive inspections to give less light than fifteen standard English candles, or to contain more than twenty grains of sulphur or ten grains of ammonia per hundred cubic feet of gas, or more than ten per cent. of carbonic oxide or any sulphuretted hydrogen, a fine of one hundred dollars shall be paid by such company to the city or town supplied by it. (Pub. Stats., chap. 61, sect. 14.)

By chapter 252 of the Acts of 1890, the provision of the Public Statutes relating to carbonic oxide was stricken out, so that it is no longer illegal to manufacture gas containing more than ten per cent. of this substance.

The following table shows the amount of impurities found on the given dates, and the whole number of inspections during the year, of the gas of the several companies therein named, as reported to this Board by the State Inspector of Gas:—

Kind of Impurities.	NAME OF	CO3	(PANY	•		Amount of Impurity.	Date when found.	Total Number of Inspections during the Year.

Of the inspections for ammonia cited above, the two at East Boston, the two at Quincy, and the three at Taunton were consecu-

tive; as was also the case with the two for sulphuretted hydrogen at Plymouth and Spencer. At Salem, two were consecutive; and then after two inspections, where no sulphuretted hydrogen was found, the next two were consecutive.

A comparison of the inspections made during the five years from 1887 to 1891, inclusive, shows the following results:—

	1887.	1888.	1889.	1890.	1891.
Number of inspections made, .	445	458	451	443	483
Number of companies subject to					
inspection,	59	60	59	59	58
Number of companies showing					
deficiency in candle-power, .	1	1	4	2	1

### ELECTRIC LIGHT.

The following table gives the names of those companies in active operation on June 30 last, together with the localities supplied and the amount of capital stock:—

NAME OF COMPANY.	Localities supplied.	Capitat.
Adams Electric Light and Power Co,	Adams,	\$8,500
Amherst Gas Co.,	Amherst,	20.000
Andover Electric Co.,	Andover,	30,000
Beverly Gas Light Co.,	Beverly,	-
Blue Hill Electric Co	Canton,	20,000
Boston Electric Light Co.,	Boston,	1,076,000
Bridgewater Electric Co,	Bridgewater,	15,000
Brookline Gas Light Co.,	Brookline, Boston (Brigh-	10,000
	ton),	-
Cambridge Electric Light Co	Cambridge,	200,000
Charlestown Gas Co	Charlestown,	<b>_</b>
Chelsea Gas Light Co.,	Chelsea,	-
Chicopee Electric Co.,	Chicopee,	10,000
Citizens' Gas Light Co.,	Wakefield, Reading,	_
Clinton Gas Light Co.,	Clinton,	
Cohasset Electric Co.,	Cohasset, Scituate,	30,000
Cottage City Gas and Electric Light Co., .	Cottage City,	-
Dedham Electric Co.,	Dedham,	60,000
Easthampton Gas Co.	Easthampton,	1 002 500
Edison Electric Illuminating Co. of Boston, Edison Electric Illuminating Co. of Brock-	Boston,	1,263,500
ton, Edison Electric Illuminating Co. of Fall	Brockton,	92,500
River, Edison Electric Illuminating Co. of Law-	Fall River,	90,000
rence,	Lawrence,	65,000
Electric Light and Patent Flooring Co., .	Amesbury,	42,400
Fall River Electric Light Co.,	Fall River,	120,000
Friehburg Gas Co.,	Fitchburg,	80,000
	Framingham, Ashland, . Turner's Falls,	10,000
Gardner Electric Light Co	Gardner,	30,000
Gloucester Electric Co.,	Gloucester,	38,700
Great Barrington Electric Light Co.,	Great Barrington,	23,800
Greenfield Electric Light and Power Co., .	Greenfield, Deerfield,	30,000
Haverhill Electric Co,	Haverbill,	85,000
Holyoke Water Power Co.,	Holyoke,	-
Hudson Electric Light Co,	Hudson,	9,125
Hyde Park Electric Light Co.,	Hyde Park,	100,000
Lawrence Gas Co.,	Lawrence, No. Andover,	•
	Methuen,	-
Lee Electric Co.,	Lec	·
Leicester Electric Co.,	Leicester,	4,000
Leominster Electric Light and Power Co., .	Leominster,	50,000
Lowell Electric Light Corporation,	Lowell, Dracut, Tyngsboro',	274,600
Lynn Gas and Electric Co.,	Lynn, Swampscott,	-
Malden Electric Co.,	Malden, Melrose, Medford, Everett, .	145,100
Marlhorough Electric Co.,	Marlborough,	30,000
Middleborough Gas and Electric Co.,	Middleborough,	40.000
Millord Electric Light and Power Co.,	Milford, Hopedale,	40,000
Millbury Electric Co.,	Milibury,	15,000
Milton Light and Power Co.,	Milton,	50,000
Nantucket Electric Light Co.,	Nantucket,	25,000
Natick Electric Co,	Natick, Wayland, New Bedford, Fairbaven, .	40,000
Newburyport Gas and Electric Co.,	New Bedford, Fairbaven, . Newburyport,	-
	l	

NAME OF COMPANY.	LOCALITIES SUPPLIED.	CAPITAL.
Newton and Watertown Gas Light Co., .	Newton, Watertown, .	_
North Adams Gas Light Co.,	North Adams,	-
Northampton Electric Lighting Co.,	Northampton,	\$58,700
North Attleborough Steam and Electric Co.,	Attleborough, North Attle- borough, Wrentham,	80,000
North Shore Electric Co	Revere, Winthrop,	125,000
Orange Electric Light Co.,	1	25,000
Palmer Electric Co.,	Palmer, Monson,	30,000
	Pittsfield	100,000
Plymouth Electric Light Co.,	Pittsfield,	40,000
Quincy Electric Light and Power Co.,	Quincy.	67,500
Salem Electric Lighting Co	Salem, Peabody,	140,000
Somerville Electric Light Co.,		•
,	mont,	161,400
Southbridge Gas and Electric Co.,	Southbridge,	´-
South Hadley Falls Electric Light Co.,	South Hadley,	7,000
Spencer Gas Co.,		_
Stoughton Gas and Electric Co.,	Stoughton,	_
Suburban Light and Power Co.,	Boston,	83,000
Taunton Electric Lighting Co,	launton,	40,000
Union Electric Light Co,	Franklin,	20,000
United Electric Light Co,	Springfield,	372,700
	Uxhridge, Northbridge, .	34,200
Waltham Gas Light Co.,	Waltham,	-
Walworth Light and Power Co.,	Boston,	15,000
Ware Electric Co.,	Ware,	20,000
Ware Electric Co.,	Webster, Dudley,	-
Westborough Electric Light and Power Co.,		25,000
Westfield Gas Light Co.,	Westfield,	-
Weymouth Light and Power Co.,	East Weymouth, Wey-	50,000
Whitman Plastria Co	mouth, Hingham,	20.00
Whitman Electric Co.,	Whitman,	12,300
Walnum Placeria Light Co.	Winchendon, Winchester,	12,000
Woburn Electric Light Co.,	Stoneham,	120,000
Worcester Electric Light Co.,	Worcester,	200,000

In the case of the several gas companies doing electric lighting, the capital will be found in the table of gas companies.

The following companies have bonds and notes outstanding: -

Adams,							<b>\$</b> 9,875 00
Blue Hill (Canton),						•	16,000 00
Boston,							388,078 62
Bridgewater, .						•	12,000 00
Cambridge,							155,878 50
Chicopee,							<b>2,30</b> 0 00
Cohasset,							500 00
Dedham,		•					81,448 02
Edison (Boston),							713,000 00
Edison (Brockton),							111,511 07
Edison (Fall River),							23,000 00
Edison (Lawrence),							42,500 00
E. L. & Patent Flooris	ng C	o., ( <i>i</i>	lmes	bury)	), .		62,600 00

Fall River,								\$2,000	00
Framingham							•	54,466	
Franklin (Tu		s Fal			•			400	
			•				•	43,900	
Gloucester,								4,674	
Great Barrin	gton.					•	•	4,500	-
Greenfield,	_						•	10,000	
Haverhill,					•			35,500	
Hudson,		•						7,000	
Hyde Park,								54,277	
Leicester,								21,209	45
Leominster,								38,775	
Lowell, .								140,090	
Malden,								136,099	17
Murlborough	۱,							27,500	
Middleborou	gb,							80,000	00
Milford,	_							14,500

### APPENDIX B.

[CHAP. 360, ACTS of 1891.]

An Act authorizing the commissioner of corporations to change the names of corporations.

Be it enacted, etc., as follows:

Section 1. The commissioner of corporations may authorize any corporation subject to the provisions of chapters one hundred and six, one hundred and seven, one hundred and eight, one hundred and nine, one hundred and ten, one hundred and twelve, one hundred and thirteen, one hundred and fourteen, one hundred and fifteen, one hundred and sixteen, one hundred and seventeen, one hundred and eighteen and one hundred and nineteen of the Public Statutes, and acts amendatory of any of said chapters, to change its name, upon notice and hearing, as hereinafter set forth: provided, such corporation shall, previously to its application to the commissioner of corporations for change of its name, at a meeting called for that purpose have voted, by a vote of two-thirds of the stockholders present and voting at the meeting, to change its name and adopt a new one.

- SECT. 2. Before authorizing a change of name, as provided in section one, the commissioner shall require public notice of the application therefor to be given, that all persons may appear to show cause, if any they have, why the application should not be granted.
- SECT. 3. When such change of name shall have been authorized by the commissioner of corporations, a certified copy of his authorization of the same, together with a certificate setting forth the vote of the corporation to so change its name and adopt a new one, signed and sworn to by the president, treasurer and a majority of the directors, shall be filed in the office of the secretary of the Commonwealth. And the commissioner shall require public notice to be given of the change so authorized; and on receipt of proof thereof the secretary of the Commonwealth may grant a certificate of the name which the corporation shall bear, and which shall thereafter be its legal name, subject however to the provisions of

chapter two hundred and fifty-seven of the acts of the year eighteen . hundred and ninety-one.

- SECT. 4. A corporation under its new name shall have the same rights, powers and privileges, and be subject to the same duties, obligations and liabilities as before such change, and may sue and be sued by its own name; but any action brought against it by its former name shall not be defeated on that account, and, on motion of either party, the new name can be substituted therefor in the action.
- SECT. 5. The secretary of the Commonwealth shall prepare and submit to the general court, together with the abstract of certificates required by section two of chapter one hundred and six of the Public Statutes, a statement of all names of the corporations changed under the provisions of this act.
- SECT. 6. In the case of corporations not having a capital stock, a two thirds vote of the persons legally qualified to vote in meetings of the corporation, and present and voting on the question of change, shall be sufficient, in lieu of the vote of the stockholders required by section one of this act; and in the case of corporations not having a president, treasurer and directors, the certificate of the vote of the corporation required by section three of this act shall be sufficient if signed and sworn to by the presiding and the financial officer and a majority of its other officers having the power of directors, by whatever name called. [Approved May 28, 1891.

[CHAP. 370, ACTS of 1891.]

AN ACT TO ENABLE CITIES AND TOWNS TO MANUFACTURE AND DISTRIBUTE GAS AND ELECTRICITY.

Be it enacted, etc., as follows:

Section 1. Any city or town may, under the limitations of this act, construct, purchase, lease or establish, and maintain within its limits one or more plants for the manufacture or distribution of gas or electricity for furnishing light for municipal use, and for the use of such of its inhabitants as may require and pay for the same as herein provided. Such plants may include suitable land, structures, easements, water privileges, stations, gasometers, boilers, engines, dynamos, tools, machinery, pipes, conduits, poles, conductors, burners, lamps and other apparatus and appliances for making, generating, distributing and using gas or electricity for lighting purposes.

SECT. 2. No city shall exercise the authority conferred in section one until a vote that it is expedient to exercise such authority

shall have passed each branch of its city council by a two thirds vote and received the approval of the mayor in each of two consecutive municipal years, and thereafter have been ratified by a majority of the voters present and voting thereon at an annual municipal election. When such a vote has failed to secure such ratification no similar vote shall be submitted for ratification until after the expiration of five years thereafter.

SECT. 3. No town shall exercise the authority conferred in section one until after a vote that it is expedient to exercise such authority shall have been passed by a vote of not less than two thirds of the voters present and voting at each of two legal town-meetings duly called for the purpose, of which meetings the second shall be held at an interval of not less than two nor more than thirteen months after the first. At such meetings such vote shall be taken by written or printed ballot and by the use of the checklist. When such a vote has failed of passage as hereinbefore provided at the second of said meetings, no similar vote shall be passed until after the expiration of two years thereafter.

Any city or town establishing or purchasing a plant within its limits as provided in this act, or reconstructing, extending or enlarging the same as provided in section five, may pay for the same by the issue of bonds, payable in a term not exceeding thirty years and bearing interest at a rate not exceeding five per cent., which shall not be disposed of for less than par and accrued interest, and the indebtedness thereby created shall not be included in the limit of indebtedness of such city or town provided by law; but such bonds shall not be issued until a vote authorizing the same has been passed by the vote required by section seven of chapter twenty-nine of the Public Statutes, and the whole amount of bonds so issued by a city or town, and outstanding, shall not exceed at their par value the amount of five per cent. of the total valuation of estates therein in the case of a town, or two and one half per cent. of such valuation in the case of a city according to the last preceding state valuation. The interest on such bonds and a sinking fund to meet the same at maturity shall be provided for as required by section nine of said chapter twenty-nine. indebtedness shall be incurred by any city or town in connection with such plant except as aforesaid, and excepting further that money may be borrowed under the provisions of section six of said chapter twenty-nine as amended, to pay the operating expenses thereof. All receipts from the sale of gas or electricity shall be paid over to the treasurer of such city or town. expenses of running such plant and conducting such business of supplying gas or electric light, including interest on such bonds

and requirement of the sinking fund as aforesaid, shall be included in the appropriations made annually or from time to time by such city or town, and shall be paid out of the treasury thereof.

- SECT. 5. Any city or town owning a plant for the manufacture or distribution of gas or electricity may reconstruct, extend or enlarge the same, but no such reconstruction, extension or enlargement beyond the necessary and ordinary maintenance, repair and replacement thereof, except such increased appliances for the distribution of gas and electricity as may be necessary to furnish the same to new takers, shall be undertaken or made except by the vote provided by section four in case of the issue of bonds.
- SECT. 6. Any city or town obtaining a plant may provide by ordinance, if a city, or by by-laws, if a town, for the equitable assessment upon the owner or occupant of any premises of any part or the whole of the cost of laying and maintaining upon such premises, pipes, conduits, conductors or other appliances for the distribution of gas or electricity to the occupants thereof. Payment of such assessments shall not be obligatory, but shall be made a condition precedent to the supply of gas or electricity to the occupants of such premises, and may be exacted before providing any such appliances for such distribution.
- Sect. 7. Any city or town having obtained a plant for the purpose, as provided in this act, may manufacture, generate and distribute gas or electricity for furnishing light for municipal use or for the use of its inhabitants, under such regulations as it may establish. No city or town shall be compelled to furnish gas or electricity to any person or corporation except upon order of the gas and electric light commissioners and after payment of any assessment provided for in section six. Any person or corporation aggrieved by the refusal of any city or town supplying gas or electricity under the authority of this act to furnish the same may appeal to such commissioners, setting forth in such appeal what is required of the city or town, in such detail as the commissioners may require.
- SECT. 8. Whenever any city or town shall obtain a plant as provided in section one, the operation, control, management and repair thereof, the manufacture, generation and distribution of gas and electricity thereby, including the purchase of supplies, the hiring and discharge of employees, and all business relating to such manufacture, generation and distribution, to the methods, amounts, times, prices and quality of the supply to each person and corporation, the collection of bills, the keeping of accounts and custody of moneys received for gas or electricity or otherwise, and the payment of bills incurred in said business, shall be entrusted,

subject to any ordinances established by the city council in a city. or the by-laws or regulations established in a town, to one officer, who shall be appointed and may be removed by the mayor in a city, and by the selectmen in a town. Such officer shall be known as manager of gas, manager of electric light, or manager of gas and electric light, according as a plant for one or both may be under his charge. In cities, the compensation of such officer shall be annually fixed by the city council, and in towns by the select-Before entering upon the duties of his office he shall give bond to the city or town for the faithful performance of his duties in such sum and form and with such sureties as the mayor or selectmen shall approve. He shall at the end of each municipal year render to the mayor or selectmen such detailed statement of his doings and of the business and financial matters in his charge as the gas and electric light commissioners may prescribe. shall also at any time, when required by the mayor or selectmen, make to him or them a statement of his doings, business, receipts, disbursements, balances, and of the indebtedness of the city or town in his department, in the detail required; and he shall pay over to the treasurer of the city or town all receipts collected.

The books and accounts pertaining to the business authorized by this act shall be kept in a form to be prescribed by the board of gas and electric light commissioners, and the accounts shall be closed on the thirtieth day of June in each year so that a balance sheet of that date can be taken therefrom and included in the return to said board, which return shall be for the year ending the thirtieth day of June. The mayor or selectmen and manager shall annually, on or before the second Wednesday of September in each year, make a return to said board in a form prescribed by it, setting forth the financial condition of said business, the amount of indebtedness authorized or existing on account thereof, a statement of income and expenses in such detail as the board may require, with a list of salaried officers employed in said business and the amount of salary paid to each. Said return shall be signed and sworn to by the mayor or a majority of the selectmen, and in both cities and towns by the manager. The mayor of a city or the selectmen of a town may direct, in addition, any additional returns to be made at such time and in such detail as they may order. The mayor or selectmen and manager shall also at all times, on request, submit said books and accounts for the inspection of said board, and furnish any statement or information required by the board concerning the condition, management and operation of said business.

Sect. 10. The price to be charged for gas or electricity to per-

sons and corporations shall be fixed, and shall not be changed oftener than once in three months. Any change shall take effect on the first day of a month, and the new price adopted shall, before the change shall take effect, be advertised in some newspaper published in the city or town where the plant is, if any is published therein. Such price shall not, except with the written consent of the gas and electric light commissioners, be fixed at less than cost, in which shall be included in addition to all operating expenses, interest on the net investment in plant made by the city or town, less assessments collected under section six, at the rate paid upon the bonds above provided for, together with the requirements of the sinking fund established to meet such bonds, and also depreciation of the plant, to be reckoned at not less than five per cent. per annum of its cost, and losses; but any losses exceeding three per cent. of the investment in plant may be charged in different years at not more than such three per cent. per annum. Such price shall not be greater than shall allow above such cost a profit of eight per cent. per annum to the city or town upon its net investment. In fixing such cost to establish the price to be charged to persons and corporations the gas and electricity used by the city or town shall be charged to it at cost. deposit to secure the payment for gas or electricity for three months may be required in advance from any taker, and the supply may be shut off from any premises until all arrearages for gas or electricity furnished thereon, to whomsoever furnished, shall be paid. After three months default in the payment of such arrearages all appliances for distribution belonging to the city or town on such premises may be removed, and after such removal shall not be restored except on payment of all such arrearages, and a sufficient sum to cover all expenses caused by removal and restoration.

SECT. 11. Any city operating a plant under this act may pass ordinances, and any town operating a plant under this act may, subject to the approval of the superior court, adopt by-laws imposing penalties not exceeding fifty dollars to protect its plant, control its use, prevent accidents from gas or electricity supplied by such city or town, and govern consumers in their use thereof.

SECT. 12. When any city or town shall decide as hereinbefore provided to establish a plant, and any person, firm or corporation shall at the time of the first vote required for such decision be engaged in the business of making, generating or distributing gas or electricity for sale for lighting purposes in such city or town, such city or town shall, if such person, firm or corporation shall elect to sell and shall comply with the provisions of this act, pur-

chase of such person, firm or corporation before establishing a public plant such portion of his, their or its gas or electric plant and property suitable and used for such business in connection therewith as lies within the limits of such city or town. If in such city or town a single corporation owns or operates both a gas plant and an electric plant, such purchase shall include both of such plants, but otherwise such city or town shall only be obliged to purchase the existing gas plant or plants if it has voted only to establish a gas plant, and shall only be obliged to purchase the existing electric plant or plants if it has only voted to establish an electric plant. If the main gas works, in the case of a gas plant, or the central lighting station, in the case of an electric light plant. lie within the limits of the city or town which has voted to establish a plant as aforesaid, such city or town shall purchase as herein provided the whole of such plant and property used in connection therewith, lying within its limits, and the price to be paid therefor shall be its fair market value for the purposes of its use, no portion of such plant to be estimated, however, at less than its fair market value for any other purpose, including as an element of value the earning capacity of such plant based upon the actual earnings being derived from such use at the time of the final vote of such city or town to establish a plant, and also any locations or similar rights acquired from private persons in connection therewith, plus the damages suffered by the severance of any portion of such plant lying outside of the limits of such city or town, and minus the amount of any mortgage or other encumbrance or lien to which the plant so purchased, or any part thereof, may be subject at the time of transfer of title; but such city or town may require that such plant and property be transferred to it free and clear from any mortgage or lien, unless the commissioners aupointed under the provisions of section thirteen of this act shall otherwise determine. Such value shall be estimated without enhancement on account of future earning capacity, or good will, or of exclusive privileges derived from rights in the public streets. When any capital has been paid in, in property instead of in cash, the valuation placed upon such property in estimating it as paid in capital shall not be conclusive in estimating its value under the foregoing provisions, but may be disputed by a city or town, and if shown to have been excessive may be reduced by the authority fixing the price of the plant and property as hereinafter provided. If the main gas works or central lighting station of such a plant do not lie within the limits of the city or town which has voted as aforesaid, then such city or town shall only purchase that portion of such plant and property which lies within its limits,

paying therefor upon the basis of value above established, but without allowance of damages on account of severance of plant. No city or town shall be obligated by this section to buy any apparatus or appliances covered by letters patent of the United States or embodying a patentable invention unless a complete right to use the same and all other apparatus or appliances necessary for such use within the limits of such city or town to such extent as such city or town shall reasonably require such right, shall be assigned or granted to such city or town at a cost as low as the cost of such right would be to the person, firm or corporation whose plant is purchased.

SECT. 13. Any person, firm or corporation desiring to enforce the obligation of any city or town under section twelve to purchase any property shall file with the clerk of such city or town, within thirty days after the passage of the final vote whereby such city or town shall have decided to establish a plant, a detailed schedule describing such property and stating the terms of sale proposed. If the parties fail to agree as to what shall be sold, or what the terms of sale and delivery in accordance with the provisions of this act shall be, either party may within sixty days after the filing of the schedule apply by petition to the supreme judicial court, or any justice thereof, setting forth the facts and praying an adjudication between the parties, and thereafter such court or justice shall, after giving both parties an opportunity to be heard, appoint a special commissioner or commissioners, who shall give the parties an opportunity to be heard, and shall thereafter adjudicate what property, real or personal, including rights and easements, shall be sold by the one and purchased by the other, in accordance with the provisions of this act, and what the price, time and other conditions of the sale and delivery thereof shall be. Such commissioner or commissioners shall file his or their award in the supreme judicial court for revision or confirmation by said court.

SECT. 14. Any party aggrieved by the award of the commissioner or commissioners may within fourteen days after its filing, or within such longer time as the court may allow, file objections thereto, and apply to the court for a hearing on such award relative to any matter of fact or law pertaining to the same, and thereupon the court shall order a trial to be had before said court or a justice thereof, after due notice to all parties interested in the matter of said award, in the manner of hearings in equity. The decree of the court upon said award shall be final and binding and said court shall have jurisdiction in equity to compel compliance therewith, and may also issue and enforce such interlocutory decrees and orders as justice may require.

SECT. 15. Whenever the existing gas plant or electric plant of any person or corporation shall have been acquired by any city or town pursuant to the provisions of this act, the powers and rights of such person or corporation in relation to the manufacture and distribution of gas or electricity within the limits of such city or town shall, from and after the date of such acquirement, cease and determine.

SECT. 16. Any city or town owning or operating a plant or plants for the manufacture or distribution of gas or electricity for furnishing light under this act, shall be responsible for any injury or damage to persons or property, happening or arising by reason of the maintenance or operation of the same, in the same manner and to the same extent as though the same were owned and operated by an individual or private corporation; but nothing in this act shall be construed to include damages to any existing gas or electric plant in a city or town by reason of the establishment of a competing line or plant under authority of this act.

SECT. 17. All general laws of the Commonwealth, and all ordinances or by-laws of any city or town availing itself of the provisions of this act, relative to the manufacture, use, generation or distribution of gas or electricity, or the quality thereof, or plant or the appliances therefor, shall apply to such city or town, so far as the same may be applicable and not inconsistent with this act, in the same manner as the same apply to persons and corporations engaged in making, generating or distributing gas or electricity therein.

SECT. 18. Nothing herein shall be construed to take away. restrict or impair any rights of any city, town or other authority which may now exist to revoke locations of wires, poles, conduits or pipes in, over or under their streets or ways: provided, however, that no city or town having within its limits the main gas works, in the case of a gas plant, or the central lighting station, in the case of an electric light plant, or the major portion of the wires, poles, conduits or pipes used in connection with any such works or plants, shall, except for a violation of the terms or conditions upon which the same were granted or for a violation of law respecting the exercise thereof, revoke any rights heretofore granted, or which may hereafter be granted, to any person or corporation engaged in the business of making, generating or distributing gas or electricity for sale for lighting purposes, after the first passage by the city council, in the case of a city, of the vote provided for by section two, or while such vote is pending in either branch thereof, or in the case of a town, after the passage of the first vote provided for in section three, or after the calling of a town-meeting at which the passage of such vote is included in the warrant: provided, however, that in case in either a city or town the second vote provided for by this act shall fail of passage or in a city shall fail to receive the approval of the mayor or the ratification of the voters in accordance with this act, then such city or town may exercise all rights of revocation, if any, which it possessed prior to the passage of such first vote until such first vote is again passed, or pending or included in the warrant as above provided. And after the passage and ratification of both votes as provided in section two, by a city, and after the passage of both votes as provided by section three, by a town, no such city or town shall, except as hereinbefore provided, revoke any rights, locations or licenses granted to any such person or corporation. The provisions of this section shall apply, in the case of a city, whether such revocation shall be made by both branches of the city government or by either branch thereof.

SECT. 19. This act shall take effect upon its passage. [Approved June 4, 1891.

AST TILDEN TO STUMBLE THE STUDENT TO STUMBLE TO STUDENT 
## Commonwealth of Massachusetts.

OFFICE OF THE SECRETARY, BOSTON, Jan. 31, 1893.

Hon. WILLIAM E. BARRETT, Speaker, House of Representatives.

Sir:—I have the honor to transmit, for the use of the Legislature, the eighth annual report of the Board of Gas and Electric Light Commissioners.

Very respectfully,

WM. M. OLIN,

Secretary.

### Commonwealth of Massachusetts.

The Board of Gas and Electric Light Commissioners respectfully submits its Eighth Annual Report.

Another change occurred in the membership of the Board in July last, Col. J. W. Coveney, after a year of valuable service, having resigned to assume other public duties. Mr. Walter S. Allen, the clerk of the Board, resigned his position in the same

fewer delinquent companies than ever before, and eighty-seven returns were filed in the office within the time fixed by law. Of the forty-four others, twenty-eight were filed within seven days and all but one within thirty days thereafter. This has enabled the Board to present its report earlier than would have been otherwise possible.

But few changes of importance in the affairs of the companies have taken place during the year.

The property of the Gardner Gas Light Company has been sold under foreclosure by the mortgagees, and was purchased by Mrs. Maria L. Ruggles of Worcester. Since the sale, the company has supplied no gas, has held no visible property, and the plant has been managed and the business conducted in the name of Mrs. Ruggles.

The consolidation of the Lawrence Gas Company and the Edison Electric Illuminating Company of Lawrence has been completed, and on June 30, 1892, only the former corporation was engaged in business. The plants of both companies up to that date, however, were managed as distinct properties, with separate accounts, and separate data concerning them is frequently given in the statistical portion of this report.

Reference was made in the last report to the case against the Walworth Light and Power Company, which was then pending in the supreme judicial court. A decision has since been given, and the court held that the prohibition in the statute extended to all the wires involved in the case, and ordered an injunction to issue against the use of them by the Walworth Company. As this decision has an important relation to the work of the Board, and is of general interest to the companies and the public, the opinion of the court is given in full in the Appendix. In consequence of this decision the company has transferred its plant and business to the Suburban Light and Power Company of Boston, which since July 1, 1892, has operated its plant.

During the year, by change of corporate title, under chapter 360, Acts of 1891, the Beverly Gas Light Company has become the Beverly Gas and Electric Company, the Charlestown Gas Company, the Charlestown Gas and Electric Company, the Palmer Electric Company, the Palmer and Monson Electric Company. The two former changes occurred prior to, the last since, June 30.

New corporations with authority to distribute electricity for light have been organized during the year as follows: Quinsigamond Electric Power and Light Company of Worcester, capital \$10,000; Hull Electric Light and Power Company of Hull, capital \$10,000; Eliot Falls Electric Light Company of Natick, capital \$30,000; Hawks Electric Company of Boston, capital \$12,000.

The Lexington Gas Light Company made the only application which the Board received during the year for leave to engage in the supply of electric light under chapter 385 of the Acts of 1887.

During the year covered by the returns the companies in New Bedford, Haverhill and Chicopee have erected water-gas apparatus, and have begun to distribute a mixture of coal and water gas. The Athol company has returned to its former practice of distrib-

uting only water gas. During a portion of the year the company in Marlborough has manufactured gas from wood enriched with oil, but it has recently abandoned that process. The Millis Company has added to its other business the supplying of electric lights in Millis.

The works of the Roxbury and Dorchester companies remain closed. For most of the year ending June 30, 1892, these companies distributed a gas which they purchased of the Boston Gas Light Company, but since March, 1892, they have bought directly from the Bay State Gas Company. Extensive alterations have been made at the North end station of the Boston Gas Light Company, and a water-gas plant of large capacity is nearly ready for use. It is understood to be the intention of this company to distribute only water gas in the near future. During the year the Bay State Gas Company has begun to supply private consumers with gas directly from its own mains, but the output for this purpose has not been large.

### WAKEFIELD PETITION.

Early in the year the Board received from the selectmen of Wakefield a complaint that the Citizens' Gas Light Company of Reading, South Reading and Stoneham was distributing to its consumers gas of an impure and inferior quality, and a request that such orders be made as would secure its improvement. An investigation was begun immediately, and a public hearing was given in Wakefield.

The usual analysis of the gas and test for candle-power and impurities revealed no extraordinary conditions, and no violation of the statutory requirements except in the presence of sulphuretted hydrogen. The gas had an unusually strong and offensive odor, which upon further examination appeared to be due to a particularly poor and sulphurous lot of coal which the company had been using, without fully appreciating its troublesome qualities. In view of the fact that immediately upon notice of the complaint the company arranged to abandon the use of this coal and of the further fact that the cause of the complaint soon afterward disappeared, no order upon the petition was considered necessary.

APPEAL OF WAKEFIELD ELECTRIC LIGHT AND POWER COMPANY.

This was an appeal by the Wakefield Electric Light and Power Company from the decision of the selectmen of Wakefield, refusing it permission to erect poles and run wires in the streets. No steps were taken to bring the case to a hearing, and upon suggestion by the appellants the appeal was dismissed.

### APPEAL OF PHEBUS H. ALEXANDER et al.

This was an appeal entered by Phœbus H. Alexander and Fred. P. Barnes from the decision of the selectmen of Peabody, refusing them permission to erect poles and run wires in the streets of said town. Since the appeal was taken the town has constructed its own plant. With the consent of the appellants the appeal has been dismissed.

APPEALS OF THE CONSUMERS' GAS COMPANY OF NEW BEDFORD.

These were appeals from the mayor and board of aldermen and from the board of public works of the city of New Bedford.

The Consumers' Gas Company, regularly organized under the laws of this Commonwealth, applied to the mayor and aldermen of New Bedford for leave to open about five miles of the principal streets for the purpose of laying gas mains. That board declined to grant the petition, on the ground that it did not have jurisdiction in the matter, and referred it to the board of public works, which after a public hearing dismissed the petition.

The Consumers' Gas Company, assuming the action of the board of aldermen to be a refusal, appealed from the decisions of both boards. The hearings which were held in New Bedford occupied several days, and the city, the appellant, and the New Bedford Gas and Edison Light Company were represented by counsel. The latter company has alone had the right to supply gas in New Bedford since 1853. In 1888 it began to supply electric light, having purchased the property and rights of the New Bedford Electric Light Company; and in July, 1890, it was consolidated with the Edison Electric Illuminating Company of New Bedford, under authority of a special act of the Legislature.

Since that time it has been the only company selling gas or electric light in that city.

The consumers of the present company were numerously represented among the witnesses, and were encouraged to describe as fully as possible their grievances. Their testimony showed a general satisfaction with the quality of the gas, but a considerable desire to secure it at a lower price, and much complaint about the administration of the electric department and the prices charged for the incandescent light.

The petitioners claimed that if their request should be granted they could supply a gas much superior to that of the existing company, and at a lower price.

The shareholders in the petitioning company were interested in the ownership of a patented process for making gas from oil, water and air, and it appeared from the evidence that it was their intention to use this particular process if their request was granted. Upon the value of this their case principally rested. The Board endeavored to ascertain whether this process gave reasonable promise of fulfilling the expectations and intentions of the petitioners.

Plans and the evidence of experts were submitted and carefully considered, and an examination of a plant in actual operation was made by the Board. The process does not differ essentially from that in common use in many small towns where oil gas is distributed, except in the introduction into the retort with the oil of a nearly equal amount of water, and in the mixing of the gas and air in the heated retort, instead of in the holder. It was proposed also to filter the oil before using through a "vegetable compound consisting of ground corn cobs and ashes from the wood and bark of the white ash tree," and also to pass through the retort a certain amount of the aqueous extract of potatoes; but no explanation of the value of these to the gas was attempted, and no particular consideration given to it by any of the parties interested.

A test of the apparatus and process was made under the supervision of the inventor and in the presence of experts selected by the two companies interested, and these agreed in their testimony before the Board in all material points. This test afforded a good illustration of the value of the process, as the experimental bench was of the full size for commercial use. Crude oil, coal, pine wood, potato extract, corn cobs and ashes were used as directed, and gas was made at the rate of about 445 feet per hour. The result of the operation showed that to make 1,000 feet of this gas in the holder, ready for use, would require 9.12 gallons crude oil, 81.3 pounds coal, † cord foot of wood, 1 pint potato extract, † bushel ground corn cobs, and † wine pint wood ashes, costing in that locality about 70 cents. To these figures must be added labor, which may fairly be estimated at not less than 13 cents in a large works of this kind, making at least 83 cents for the cost in the holder. Although these figures include nothing for repairs or depreciation, they much exceed the cost of manufacturing the gas of the company now in operation.

The specific gravity of the gas is .790, and that of the present company's about .600, from which it appears that the proposed gas is nearly 25 per cent. heavier than that now used. To distribute the same amount of the former, unless at greatly increased pressure, would require larger mains, a larger investment and therefore greater cost for distribution. It would also require interior pipes and fittings of larger capacity.

Several tests of the candle-power of the gas showed an average of 17.29, which is from .18 to 1.70 candles lower than the average of the present company's gas. The analysis of the gas made by the experts referred to above showed the following results, the figures indicating the relative volumes of each constituent:—

Carbonic acid	l, .					2.30
Illuminants,	•					21.85
Oxygen, .						2.45
Carbonic oxi	de,			•	•	6.90
Hydrogen,						3.40
Marsh gas,		•				13.61
Nitrogen, .						49.49
Ü						
						100.00

It will be seen from this that more than half of the entire volume consists of carbonic acid and nitrogen, gases which neither burn nor aid combustion, but seriously diminish the flame temperature of any gas of which they form a part. The gas has, then, a low value for heating or cooking purposes, this peculiar composition

and result being due to the large amount of air used in its manufacture.

From these facts it appears that the gas of the process proposed is of lower candle-power, of less heating capacity and more expensive to produce than that now used in New Bedford.

The petitioners stated, however, that, if they found after trial that this gas was for any reason unsatisfactory as to quality or cost, they should abandon its use, and should adopt some process which would produce the best possible quality at the lowest possible cost. Had they been able to make this offer more definite, it would have deserved more extended consideration; no other process was, however, mentioned or alluded to.

For these reasons the Board was unable to see that any advantage could come to the citizens or gas consumers of New Bedford by granting the prayer of the petitioners, which might not be readily secured from the present company.

A strong and general feeling of hostility to the company and certain peculiarities of its administration was a prominent feature of the hearing. The Board regrets exceedingly that any foundation for this existed in fact. Very much of this sentiment was doubtless due to changes inevitable upon a consolidation of the companies, but more to the methods pursued in dealing with consumers, as illustrated in the manner of advancing the electric rates to a living basis, and in the arbitrary and monopolistic spirit pervading the printed regulations or rules issued by the company.

The company has, it is true, a practical monopoly of the lighting business; but the extensive privileges and concessions which it has received as a free gift from the public impose upon its managers an imperative duty to conduct its affairs with the same effort toward the public convenience and in the same spirit as the successful merchant employs to attract and retain his trade.

In considering this case, it was not intended to pass upon the absolute value of the particular process considered, but only upon its value in the locality considered. Neither was an opinion expressed as to the fairness of the price charged by the present company for its gas; such question was not necessarily within the scope of the inquiry, nor could any order affecting it be based upon the proceedings. The Board, however, noted with approval the fact that the company had voluntarily reduced the price of gas since the hearing upon this appeal had begun.

Most of the complaints by the witnesses were either of the quality or price of the electric light. The Board took no formal action in reference to these, for the reasons cited above. It did, however, make a careful examination of both of the electric plants, studied their management and conferred with the company concerning them. As a result of this it received satisfactory assurance that all the changes needed to secure the best possible electric service would be made, and that the company would soon make a considerable outlay in this department.

Upon a careful review of the whole case, the Board was of the opinion that the appeal could not be sustained, and the following was adopted:—

Ordered, That the appeal of the Consumers' Gas Company be dismissed, and the decision of the board of public works be affirmed.

The same reasons afforded ample ground for a refusal to sustain the appeal from the board of aldermen, and it seemed unnecessary to rule upon or discuss the legal questions raised as to the relations of that board to the petition or to the board of public works.

Both appeals were dismissed.

### LEXINGTON GAS LIGHT COMPANY.

The Lexington Gas Light Company applied for leave to engage in the business of electric lighting.

A public hearing was given upon the petition, at which the company was represented by its president and clerk, and the town by a majority of its selectmen; no one appeared in opposition.

The petitioner has supplied gas in Lexington since 1875, and the requisite number of stockholders voted to engage in the business of electric lighting. It appeared that in 1888 the Woburn Electric Light Company was granted certain privileges in the streets of Lexington, upon the expectation that it would supply electric lights in the town. Prior to that year the company had erected a line of poles from the Woburn line to the centre of the town, but never owned any wires nor attempted to

ı

run any lights in the town, and prior to the hearing it had sold these poles and assigned all its rights and privileges to the petitioner. There is no other company organized for or engaged in the business of supplying electric lights in Lexington. The selectmen expressed a wish to have the petition granted, and an opinion that such a course was generally desired and would benefit the town; they also stated that they knew of no opposition.

The Board has frequently expressed the opinion that in small towns like Lexington it may be to the public interest that one company, rather than two, should supply both kinds of light. The facts in this case are essentially the same as in those towns where similar petitions have been granted. Evidence satisfactory to the Board was furnished of the company's willingness and ability to proceed at once to supply the town and its inhabitants with all the electric lights which might be demanded. The following was adopted on November 16, 1892:—

Ordered. That said Lexington Gas Light Company is hereby authorized to engage in the business of generating and furnishing electricity for light in the town of Lexington, and that said company, within six months from this date, erect and equip a plant for generating and distributing electricity for light with a minimum capacity of not less than ninety horse-power, and dynamo capacity to convert the same into electric lights.

#### BOSTON GAS LIGHT COMPANY.

On June 4, 1892, the following petition was received, addressed to the Board: —

We, the undersigned customers of the Boston Gas Light Company, hereby make complaint that the price charged by said company for gas is excessive; and we ask that said price be fixed at one dollar per thousand cubic feet, or such other sum as your Board may deem just and proper.

This petition was signed by Messrs. Sinclair and Mann and about fifty other consumers, mostly proprietors or managers of hotels, and persons using large quantities of gas.

As the statute requires, a public hearing was ordered and advertised in several of the daily papers in Boston, September 14, being assigned therefor, by request of the petitioners. On that day the petitioners and the company were represented by counsel,

and by request of both parties the hearing was adjourned to October 5, and again to October 13.

No evidence was presented by either party, and no other persons expressed a desire to be heard. On the last date named the petitioners offered what they stated was a more explicit presentation than the petition contained of the advantages which they wished to secure, as follows:—

- 1. That on and after Jan. 1, 1893, or as soon thereafter as the new water-gas works in process of erection at the north end station are finished, the candle-power of the gas supplied by the company be twenty-five candles.
- 2. That on and after Jan. 1, 1893, the price of gas used for cooking, heating and power purposes be fixed at one dollar per thousand feet, measured through an independent meter supplied by the company free of rent.
- 3. That on and after Jan. 1, 1893, the price of gas to all those who burn for lighting purposes one thousand dollars' worth and upwards per annum be fixed at one dollar and twenty cents per thousand feet.

It appeared at that time, as a result of negotiations between the company and the petitioners, after the petition was filed, that the company might be willing to make these concessions. The petitioners then asked that, if the company should formally accept the three propositions named, the case be closed without further investigation or consideration by the Board.

Soon after this, a duly attested transcript of the records of the board of directors of the company was filed with this Board, from which it appeared that all the propositions had been accepted. The case was accordingly closed, as requested.

In March, 1892, the Board made a special report to the Legislature then in session, replying to certain specific inquiries concerning the Boston Gas Light Company and other companies located in Boston. A copy of that report is given in the Appendix.

APPEAL OF THE GAS LIGHT COMPANY IN MARLBOROUGH.

This was an appeal by the Marlborough Gas Light Company from the decision of the selectmen of Marlborough, granting permission to the Citizens' Gas Light Company to open the streets of that town for the purpose of laying and maintaining gas mains.

An extended public hearing was given at the town hall in Marlborough. Both companies appeared by counsel, but the town

(now a city) was not represented. A careful and thorough study of the history and general management of the company was made, and particular attention given to its technical and financial affairs. The fact that a majority of the board of selectmen from whose decision the appeal was taken were named as incorporators of the company to which the franchise was granted, prevented the action of the local authorities from receiving that consideration to which it is often entitled.

To open the streets to the extent contemplated by the license to the new company would inevitably impose upon the municipality directly and indirectly much expense, and bring great inconvenience to a large number of its citizens. This ought not to be allowed unless some substantial public advantage were to be gained. The Board therefore endeavored, by a study of all the circumstances and a careful consideration of the grievances presented, to ascertain whether there was reasonable ground to believe that such advantage would be obtained through the permission appealed from. The claims of the parties interested, and the facts important in the case, are contained in the suggestions that follow.

The gas plant in Marlborough was originally established chiefly as an adjunct to certain large manufacturing establishments and to supply the residences of its owners. In 1865 these owners became incorporated as the Marlborough Gas Light Company, which since that time has continued to supply gas to the town and its inhabitants.

A study of the company's history satisfied the Board that for a portion of the time its service was neither creditable to the owners nor satisfactory to the public; neither skill nor enterprise was displayed in its management; the gas was of poor quality, the works were neglected, and no effort was made to extend the business. By this course the company lost the public confidence, and we have reason to believe that much of the interest and zeal on behalf of the new company was due to these facts. The testimony at the hearing showed, however, that a wide distinction was to be made between the management in recent and that in former years. It was conceded, and without dispute, that, if the management and policy more recently adopted should be continued, the company would be in most respects free from special criticism.

It was urged by the representatives of the Citizens' Company that they would be able to supply gas at a less price than the present company. That this was the real desire and expectation of certain persons connected with the organization was apparent; but, beyond the mere assertion of the intent, no effort was made to show that they would be able to do this. No member of the new company had had any experience in the manufacture or supply of gas; no witness with experience in the business appeared in favor of the claim; and there was hardly a pretence that any particular facilities were possessed or to be acquired for reducing the cost of either production or distribution. The process used by the Marlborough Company is one generally approved by engineers, and under the conditions existing there the Board has no knowledge of any process which by its introduction would appreciably lessen the cost to consumers. Particular reference was made to a small company in a town of similar size where gas was much lower than in Marlborough, and the promoters of the new enterprise seemed confident that through the adoption of the peculiar process there used their expectations would be met. But the company referred to has for years been supplying gas at a large loss, and since the hearing in this case has been compelled to make a large advance in its price.

The consumption of gas in Marlborough has been low, considering the population; this is due in part to the narrow policy or lack of policy in the company's former management, and in part to the peculiar characteristics of the town itself. It has seemed to be a difficult field for exploiting the business. In the twenty-seven years of the company's existence the total dividends have been less than one per cent. per annum; for several years the works were run without a profit, and, with the exception stated, all the profits of the enterprise have been put into the plant.

The principal hope for a reduction of price in this place lies not in the introduction of new processes or methods of manufacture, but in the increase of the consumption. Marlborough ought to consume a much larger quantity of gas, and with a liberal and progressive management of the company will doubtless do so.

It was agreed by all parties at the hearing that the field was not large enough to support two companies, and that one would soon absorb or consolidate with the other with only the powers and opportunities possessed by the present company.

One objection to the present company strenuously urged was that its works were centrally located, and so near the thickly settled residence portion as to be a constant annovance to a large number of citizens and a hindrance to the growth of the city. This objection seemed to be supported by the facts; but it was not easy to see how the existence of a second company would afford a remedy. In the judgment of the Board, the admission of a rival company would be likely to result in the improvement of the works of the existing company in their present location, and the probable postponement of their removal for many wears. It must be recognized, too, that certain equities exist in favor of the company, since when the works were first built no objections to their location existed, as the vicinity was used only for manufacturing, instead of mercantile and residential purposes as now. The Board, however, agreed with the opinion expressed by the promoters of the new company that the time had come when the present company should prepare to move its works to another and less populous section. The value of its land and the condition of its plant make such removal entirely feasible. This view was urged upon the officers of the company, and was adopted by them; land was secured in a favorable location, and ample assurance was given that the works would be removed there at as early a date as could be reasonably and economically done. The present company will then have it in its power to render to the public all the advantages as to quality of service which any advance in gas engineering or any increase in consumption may make possible, with none of the burdens and evils which the temporary existence of a rival company would be sure to

Very soon after the hearing upon this appeal, negotiations in which representatives of the new company were understood by the Board to be interested, looking to a change in the ownership or control of the old company, were entered upon and have been but recently abandoned. The Board thought it unwise to interfere in

these, and for that reason its decision of the appeal was unusually delayed.

The following was adopted in the appeal: -

Ordered, That the appeal of the Marlborough Gas Light Company be sustained, and the decision of the selectmen be reversed and annulled.

### MUNICIPAL OWNERSHIP.

As the statute (chapter 370, Acts of 1891) allowing municipalities to engage in the supply of gas and electric light imposes important duties upon this Board whenever the provisions of the act are accepted, the effort to learn precisely what action has been taken toward municipal ownership of plants throughout the Commonwealth has been continued.

Official reports have been received from one hundred and seventy-nine towns and cities, including all those in which the population exceeds two thousand. It appears that one hundred and forty-six have never considered the subject.

The report of last year showed the action taken by the cities of Brockton, Chicopee, Fall River, Malden and New Bedford, and the towns of Danvers, Everett, Framingham, Hingham, Hudson, Marblehead, Melrose, Methuen, North Attleborough, Norwood, Peabody, Plymouth, Reading, Spencer, Wakefield, Wellesley, Weymouth and Whitman. Of these, Fall River, Malden, New Bedford, Framingham, Methuen, Plymouth, Spencer and Weymouth have taken no action during the year 1892.

The towns of East Bridgewater, Needham, Stoughton and Winchester, and the cities of Woburn and Springfield have acted in reference to a municipal plant for the first time during 1892. A recital of the action of the city of Haverhill, and of the towns of Braintree, North Attleborough and Brookline prior to 1892, received too late for insertion in the last report, is given below.

East Bridgewater, Hingham and Winchester have appointed committees during the year to investigate the subject.

In the town of *Braintree*, on June 2, 1891, a committee was selected "to consider the whole matter of electric lighting, so far as it is likely to concern the town." At a meeting on Aug. 25, 1891, this committee reported in favor of establishing an electric plant for lighting the streets, and estimated the cost of its instal-

1893.7

lation complete at \$25,000. This report was recommitted, with instructions to consider the advisability of establishing a plant for commercial and street lighting. At the same meeting, a ballot being taken upon the question, "Is it expedient for the town to exercise the authority conferred in section 1 of chapter 370 of the Acts of the Legislature of Massachusetts for the year 1891, to construct, establish and maintain within its limits a plant for the manufacture and distribution of electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same, as provided for in said chapter?" the vote was: yes, 122; no, 3.

At a meeting on Oct. 29, 1891, upon the same question, the vote was: yes, 146; no, 5. At this meeting the committee chosen June 2 made a supplementary report, recommending only a street-lighting plant, and that \$28,750 be appropriated therefor. This report was tabled.

At a meeting on March 21, 1892, the following votes were passed: "That the electric lighting committee appointed at the town meeting of June 2, 1891, be given power and authority to proceed to establish a plant for the manufacture and distribution of electricity, subject to the further instructions of the town." "That the town proceed to establish an electric lighting plant under the provisions of chapter 370 of the Acts of the Legislature of 1891." "That the committee proceed to establish an electric lighting plant in accordance with the report of the committee on electric lighting as made to the town." It was also voted, 124 to 3, "to issue notes of the town for the aggregate principal sum of thirty thousand dollars for the purpose of establishing an electric light plant, each of said notes to be in face value two thousand dollars, and to run one, two, three, four, five, six, seven, eight, nine, ten, eleven, twelve, thirteen, fourteen and fifteen years, respectively, and to bear interest at a rate not to exceed five per cent. per annum. And that the selectmen be instructed to raise by taxation each year the sum of two thousand dollars, together with a sum sufficient to pay the accrued interest on all the notes remaining unpaid until all of said notes are paid." Thirty-five hundred dollars was appropriated for maintenance of the plant.

Under these votes land was purchased and a brick building and

plant constructed. It comprises one 125 horse-power engine and boiler; two Thomson-Houston dynamos, with a total capacity of 100 lights of nominal 1,200 candle-power each; 710 poles in about 17 miles of streets, carrying 25 miles of wire; 75 arc lights and seventy-two 25 candle-power incandescent lights have been in use, all for street lighting. \$30,853 has been expended for construction. The plant was started on Oct. 15, 1892.

In the city of *Brockton* the board of aldermen, Dec. 27, 1892, and the common council on December 29, by unanimous votes in both branches, adopted the following:—

Resolved, That it is expedient for this city to exercise the authority conferred in section 1 of chapter 370 of the Acts of 1891, in relation to the construction, purchasing, leasing or using and maintaining within its limits a plant for the manufacture and distribution of electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same.

This resolution, being essentially different from the resolution adopted by the city council of 1891 under said chapter, is not to be regarded as a final but as a first action thereunder, and is to be null and void unless the city council of 1893 shall adopt a like resolution.

This received the approval of the mayor on Dec. 30, 1892.

At the adjourned annual meeting of the town of Brookline, April 16, 1890, the selectmen were instructed "to inquire into the subject of the town's procuring and establishing a plant for lighting its streets and public buildings with electricity, and report thereon at a future meeting." At a special meeting on Jan. 29, 1891, the selectmen were instructed "to appear in behalf of the town before any committee of the Legislature having the matter in charge, to urge the passage of a law which shall give to cities and towns the right to establish and maintain plants for the purpose of furnishing their own municipal lighting."

At the annual meeting in 1891, the selectmen reported "that after a careful investigation of the matter they should not recommend the town to enter upon the establishment of any lighting establishment at the present time," which report was accepted, and no further action has been taken.

Both branches of the city council of *Chicopee*, on Dec. 12 and 16, 1892, voted unanimously, "That it is expedient for the city of

Chicopee to construct, purchase or establish and maintain within its limits one or more plants for the manufacture and distribution of electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same." This was approved by the mayor December 19, and is in the same form as the vote passed unanimously by both branches and approved by the mayor on Nov. 30, 1891.

The town of Danvers has been operating an electric plant exclusively for street lighting since Jan. 2, 1889. The original appropriation for construction was \$15,000; since that time \$75 was appropriated for real estate construction and \$600 for extensions of lines and new lamps; the latter appropriation was overdrawn \$19.32. Special appropriations for extraordinary repairs to the amount of \$275 have also been made. The appropriations made annually in March or April for maintenance and operation of the plant have been as follows: 1889, \$3,500; 1890, \$2,960; 1891, \$2,750; 1892, \$3,450. That for 1891 was overdrawn to the amount of \$72.35. In 1889 \$15,000 was borrowed for construction, and \$1,500 of this sum becomes due annually. The plant consists of one boiler of 80 horse-power, one engine of 60 horsepower, two dynamos (Brush system), with a total capacity of 90 arc lights of nominal 1,200 candle-power each. It has 425 poles set in the streets, which, with about 40 trees, carry 1,214,360 feet of wire with 6 single and 76 double carbon lamps. Two men were employed and 80 lamps were lighted throughout the year ending June 30, 1892, for an average of 53 hours per night and 23 nights per month. One hundred and ninety-six tons of coal, two cords of wood and 23,500 carbons are reported as used during the vear.

At a town meeting in *Everett*, on Jan. 26, 1892, upon the question, "Is it expedient for the town to exercise the authority conferred in section 1 of chapter 370 of the Acts of the year 1891, authorizing cities and towns to construct, purchase, lease or establish and maintain within their limits, one or more plants for the manufacture or distribution of gas or electricity for furnishing light for municipal use and for the use of their inhabitants as specified in said act?" the following was the result of the vote: yes, 367; no, 273; not the necessary two-thirds in favor. At

the meeting of March 1, 1892, upon the same proposition, the vote was: yes, 317; no, 131.

The city of Haverhill, by concurrent votes of both branches of the city council, on Dec. 30, 1891, and Dec. 6 and 8, 1892, adopted the following:—

That it is expedient for the city of Haverhill to exercise the authority conferred by section 1 of chapter 370 of the Acts and Resolves of the year 1891, being an "Act to enable cities and towns to manufacture and distribute gas and electricity," and conferring upon the city, under the limitations mentioned in said chapter, the authority to construct, purchase, lease or establish and maintain within its limits one or more plants for the manufacture or distribution of gas or electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same as provided in said chapter.

That the city of Haverhill, under the authority conferred by the aforesaid chapter, purchase, lease or establish and maintain within its limits one or more plants for the manufacture and distribution of gas and electricity for furnishing light for municipal use and the use of such of its inhabitants as may require and pay for the same as provided in said chapter.

This resolution received the approval of the mayor in each year; in 1891 less than two-thirds of the members in each branch voted in favor of it, but in 1892 it was passed unanimously in both branches.

At the town meeting in Hudson, on Dec. 31, 1891, the warrant contained an article "to see if the town will construct, purchase, lease or establish and maintain one or more plants for the manufacture or distribution of gas or electricity under chapter 370, Acts of 1891." An effort to indefinitely postpone action on this was defeated, and at an adjournment of this meeting, on Jan. 8, 1892, a committee was appointed to investigate the whole subject, and report in print at the annual town meeting. On March 8, 1892, which was an adjournment of the annual meeting, this committee reported at length, and in concluding expressed the opinion "that in the face of all the evidence it will be inadvisable for the town to go into the business of manufacturing electric light." They recommended "that, in case the town does not desire to operate its own plant, it pass a vote that it will take no action toward the establishment of a plant before May 1, 1897: provided, the owners of the existing plant will within sixty days of the passage of such vote file in the town clerk's office a waiver and renun-

ciation of all rights, if any, acquired by them under chapter 370, Acts of 1891, by reason of the passage, by the town, of the two votes provided for in section 3 in said act; and provided, further, that the present company or its successor continue the production of electric light in accordance with the laws of this Commonwealth." On March 15, at an adjournment of the annual meeting, a resolution "that the committee's report be rejected, and that the town deems it expedient to buy and put in an electric plant," was rejected by a vote of 79 to 73. A motion to accept and adopt the report of the committee was then carried by a vote of 80 to 72. It was then voted to "indefinitely postpone the further consideration of the question of municipal lighting." At a meeting on April 4, under an article in the warrant in the same form as cited above, it was voted 66 to 56, "to indefinitely postpone the consideration" of the article. The Electric Light Company has made no such waiver as the committee's report suggested, but has begun proceedings to compel the town to buy its plant.

At a town meeting in Marblehead, June 15, 1892, it was voted, 231 to 8, "that it is expedient to exercise the authority conferred by the act." As a similar vote was passed June 22, 1891, the act was declared accepted. The committee appointed June 22, 1891, submitted a printed report containing a plan for the establishment of a municipal electric lighting plant and estimating the expense of its installation at \$40,000, but made no recommendations. No other action was taken during the year.

In the town of *Melrose*, the committee of investigation, acting under the vote of Feb. 16, 1891, published its report in February, 1892; they favored the acquisition of an electric lighting plant, and placed the probable cost at about \$75,000.

On March 21, 1892, at an adjournment of the meeting of Nov. 3, 1891, an account of which is given in the last report of this Board, it was voted, 165 yes to 26 no, "That it is hereby declared expedient and desirable that the town exercise the authority conferred by chapter 370 of the Acts of 1891, entitled "An Act to enable cities and towns to manufacture and distribute gas and electricity." At an adjournment, held on the same day, of the 1892 annual town meeting, the same proposition was voted upon and adopted, 157 yes to 25 no.

At this meeting, upon a motion to authorize the issuing of bonds to the amount of \$75,000, the proceeds of which should be applied to the establishing of an electric light plant, the vote by ballot was 152 yes, 82 no, and was declared lost, two-thirds not having voted therefor. This vote was, however, reconsidered, 237 to 90, and the question tabled until March 28, to which time the meeting was adjourned. At the adjournment on that date the vote upon the motion was: yes, 205; no, 294. No further action has been taken.

At a town meeting in *Needham*, March 7, 1892, it was voted, 225 to 53, to accept "chapter 370 of the Acts of 1891, entitled An Act to enable cities and towns to manufacture and distribute gas and electricity." Upon the same proposition at the meeting May 31, 1892, the vote was 211 yes to 59 no. A committee of five was then appointed to investigate the subject of electric lighting, and report.

The town of North Attleborough, on June 30, 1891, under the article, "To see if the town will vote to do its own lighting, as provided by chapter 370, Acts of 1891," voted 206 yes, 35 no. Under a like article, on April 16, 1892, the vote was 151 yes, 16 no.

In Norwood, the committee referred to in the last report of this Board made a report on April 19, 1892, which was tabled, and no further action in the matter has been taken. They recommended that the town establish an electric plant for street and domestic lighting; that a committee of five be selected to earry out the recommendations; that for the purpose \$30,000 be appropriated, and that the same be raised upon fifteen notes or bonds of \$2,000 each, one maturing every year, and payable out of the regular tax levy.

At the last annual meeting in the town of *Peabody* it was voted to authorize the issue of bonds to the amount of \$40,000, to run thirty years at four per cent. By this it was intended to supply a part of the appropriation made Sept. 29, 1891, for construction of the plant. It was also voted to establish a sinking fund "to be called the 'Electric Light Sinking Fund,' for the redemption and payment of said bonds, to which fund the town shall contribute each year an amount to be raised by taxation sufficient with all

accumulations to extinguish the debt at maturity," and commissioners of said sinking fund were elected.

During the year a plant has been constructed, consisting of two boilers of 125 horse-power each, and one engine of 150 horse-power, and four Edison dynamos, with a total capacity of 192 arc lamps of nominally 1,200 candle-power. There are about 52 miles of wire extending over 24 miles of streets and supported by 1,040 poles, 600 of which belong to the electric companies which have rights in the streets. One hundred and forty-six lamps are in use, and the plant was started September 27. The entire expense for construction to date is not far from \$48,100. No commercial business has yet been undertaken.

The town of Reading, at its annual meeting, March 7, 1892, under an article in the warrant, "To determine whether or not it is expedient for the town to exercise the authority conferred in section 1 of chapter 370 of the Acts of 1891, entitled an 'Act to enable cities and towns to manufacture and distribute gas and electricity," voted: yes, 361; no, 21. A committee was selected "to ascertain and report to the town the best and most economical system of lighting by electricity, with a detailed plan of a plant such as will meet the wants of the town, with estimates of the cost and expense of maintenance of the same, and such recommendations as to the procuring of the required funds as they judge to be for the best interests of the town. Said committee to report at a special meeting of the town within six months." Up to the present date no report has been made and no further action taken.

In the city of Springfield, in the board of aldermen, on Dec. 19, 1892, upon recommendation of the committee on lighting streets, the following was proposed:—

Ordered. If the common council concur, that it is expedient for the city of Springfield to exercise such authority as is permitted by chapter 370. Acts of the Legislature of 1891, authorizing any city or town under the limitations of said act to construct, purchase, lease or establish and maintain within its limits one or more plants for the manufacture or distribution of electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same as provided in said act.

This failed to pass, the vote being: yeas, 4; nays, 4. On December 27 this vote was reconsidered and the order adopted: yeas, 6; nays, 2. In the common council, on December 27, the same order was adopted, in concurrence: yeas, 11; nays, 3. An attempt to reconsider this action on December 29 was defeated: yeas, 4; nays, 12. This order was presented to the mayor for his approval on December 30, but the term of his office and of the city council which passed said order expired on Monday, Jan. 2, 1893, and the order was not approved.

The town of Stoughton, on April 12, 1892, voted, 105 year to 8 nays, "That it is expedient for the town to exercise the authority conferred in section 1, chapter 370 of the Acts of 1891, to establish and maintain one or more plants for the manufacture and distribution of electricity and gas for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same as is provided in said act." At a meeting on June 16 a like vote was passed, 72 yeas, 5 nays. At a special meeting on August 9 it was voted, "That the water commissioners be authorized to confer with the owners of the electric light and gas plant located in Stoughton, and report at the next annual town meeting the amount it can be procured for; also to take any measures to have the statutes amended to allow a stipulated yearly payment, to cancel the indebtedness to be incurred by the purchase or construction of an electric light and gas plant in place of a sinking fund."

The town of Wakefield, on Aug. 15, 1892, voted, 179 to 45, that "It is expedient for the town to exercise the authority conferred under chapter 320 of the Acts of 1891, in the relation to the construction, purchase, leasing or establishing and maintaining within its limits one or more plants for the manufacture or distribution of gas or electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same." On September 12 the Citizens' Gas Light Company, located in the town, filed a schedule of the property which it proposed to sell to the town.

On October 3 the town voted "that the town do not agree with the Citizens' Gas Light Company of Reading, South Reading and Stoneham, to purchase the property set forth in the papers by them filed with the town clerk, dated Sept. 12, 1892, and purporting to be a schedule of the property which they desire to sell to

the town at the price or upon the terms set forth in their offer of that date." "All matters between the town and the Citizens' Gas Light Company arising under the election of said company to sell its property and plant to the town" were then referred to a committee of fifteen, including the selectmen, "with full power to act and do all things necessary in their judgment in connection therewith." A vote was then passed, declaring "that the statement and schedule filed in the town clerk's office, Sept. 12, 1892, by the Citizens' Gas Light Company, purporting to be the schedule required under chapter 370 of the public laws of 1891, is not a sufficient schedule to comply with said law, and that the town is not bound to purchase the property of said company under the provisions of said act." The selectmen were then "instructed to oppose, by all proper proceedings, legal or otherwise, any attempt by the Citizens' Gas Light Company to sell its gas and electric light plants to the town."

At a meeting on Nov. 8, 1892, the selectmen were authorized to "petition the next General Court for authority to purchase and operate that part of the property of the Citizens' Gas Light Company in the towns of Reading and Stoneham, and also to manufacture gas and electric light for said towns and the inhabitants thereof, and also for authority to supply electricity for power." The above-named gas company has applied to the courts for the appointment of commissioners to appraise its plant and to compel its purchase by the town.

At the annual meeting in the town of Wellesley, on March 7, 1892, under an article in the warrant "To see if the town deems it expedient to exercise the authority given in chapter 370, Acts of 1891, to obtain and maintain a plant to manufacture and distribute electricity for town and other uses," it was voted: yes, 210; no, 55. A committee to be known as the "electric lighting committee" was selected, "for the purpose of investigating and reporting on the best methods for the town to pursue in regard to lighting streets, to report the result of their investigations at the next regularly called meeting." At a meeting on June 8, this committee recommended "that no outside company be granted any rights in the town limits;" that electric lines be erected, "to be owned and controlled by the town;" "that 375 25 candle-

power incandescent lamps" be installed, "each 250 feet apart, lighting about 20 miles of streets," at an estimated cost of \$13,000; that for the present the electricity be purchased of a private company. The cost of maintenance of this was estimated at \$4,000 per annum. The committee was not ready to recommend commercial lighting. Then, under an article in the warrant like that of March 7, a vote being taken resulted: yes, 102; no, 14. A committee of seven was then chosen for the construction of the plant, as recommended, and \$15,000 was appropriated to pay for the same. It was also voted to raise the money by the issue of five bonds of \$3,000 each, with interest at four per cent. At an adjournment of this meeting, on June 15, the vote about bonds was reconsidered, and it was voted to issue fifteen bonds, of \$1,000 each, drawing interest at four per cent., and so payable that one bond should mature every year until all are paid.

A distributing plant has been erected, pursuant to the votes cited, which includes 39½ miles of wire, extending over 18½ miles of streets, and supported by 730 poles and 33 trees; three hundred and seventy-five 25 candle-power incandescent lamps have been installed for street lighting, and they were used for the first time December 13. The electricity is purchased from the Eliot Falls Electric Light Company, whose plant, located upon the Charles River in South Natick, is run by water power.

In the town of Whitman, on July 13, 1892, the committee on the subject, appointed in 1891, made a report which was ordered to be "placed on file." Upon the question "Is it expedient for the town to exercise the authority conferred in section 1, chapter 370 of the acts of the Legislature of Massachusetts for the year 1891, to purchase, construct, establish and maintain within its limits a plant for the manufacture and distribution of electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same as provided for in said chapter" the vote was: yes, 22; no, 46.

In the city of Woburn, on Dec. 29, 1892, the common council adopted the following: "Be it resolved, That, in the judgment of the city council, it is expedient that the city of Woburn exercise the authority conferred in chapter 370, statutes of 1891, relative to the establishing a municipal lighting plant;" and the

same resolve was adopted in the board of aldermen on December 31. In both branches all the members present voted in favor of the resolve, and it was approved by the mayor.

#### VIOLATION OF LAWS.

Notices have been sent to the Attorney-General, as required by the statutes, of violations of law in the following cases:—

By the North Attleborough Gas Light Company, a violation of sections 39 and 40 of chapter 106 of the Public Statutes, in the failure to advertise in the city of Boston the sale of new stock issued in October, 1891; and a violation of section 18 of chapter 105 of the Public Statutes, in dividing the proceeds of the sale of such new stock among its stockholders.

This notice was based upon the following facts, as found upon investigation by the Board.

In December, 1885, the capital stock of the company was stated as \$68,100, and the assets \$70,659.67. Within a few months after this a revaluation of the company's property was made, or a new computation of its cost, based upon data not shown in its books of account, by which the value of its plant appeared as \$121,083.49. A dividend was declared of one hundred per cent., payable and paid in scrip bearing interest redeemable in cash or in stock of the company at par, at the company's option. The Board was informed that this scrip was issued "for the purpose of covering construction account."

Up to September, 1891, interest upon this scrip was paid regularly, and thirty per cent. of the entire issue ratably to all holders out of the regular profits of the company in addition to the regular dividends.

In September of 1891 the company voted to issue sixty-nine shares of new stock, "for the purpose of improvement and the paying of a part of outstanding scrip." In the following October these shares were sold by auction at the company's office, but the sale was only advertised in a local paper, and forty-nine shares were taken by old stockholders. Within two days after this sale the company paid in full all scrip certificates where the balance due on a certificate did not exceed \$300, and twenty-five per cent. of all

other scrip outstanding. To do this required, in addition to funds available from all other sources, \$6,000 of the proceeds of the new stock. The Board was unable to learn that any of such proceeds were used for "improvement" of the company's property. Out of the entire sum of \$13,874.21 paid upon the scrip, all but \$1,137.50 was paid to persons who at the time of such payment and when the stock was sold were shareholders in the company. Since the complaint to the Attorney-General and notice to the company, all the certificates for the sixty-nine shares have been called in and cancelled.

By the Stoughton Gas and Electric Company and the Weymouth Light and Power Company, of section 12 of chapter 314 of the Acts of 1885, in neglecting to keep their books and accounts in the form prescribed by the Board, as required by the provisions of chapter 346 of the Acts of 1886 and chapter 382 of the Acts of 1887. Information has since been received that the books and accounts of these companies are now according to law and ready for inspection.

### ACCIDENTS.

In accordance with section 2, chapter 350, Acts of 1888, the Board presents herewith an abstract of cases wherein persons sustained bodily injury from gas and electricity manufactured and sold for light and fuel during the year 1892. There were twenty-four accidents from illuminating gas. By one of them a number of persons collectively were injured, none, however, fatally. The other twenty-three were isolated cases, in each of which a single individual was injured, and eighteen of these fatally. Four undoubtedly committed suicide. Seven persons were injured by electricity from electric light wires, four of them fatally. All but two of the injured were employees of electric light companies.

# Accidents from Electricity.

The Cambridge Electric Light Company reports an accident by which a man named Charles Hamilton was injured by contact with an electric light wire on North Avenue, Cambridge, January 16. It appears that he was engaged in setting poles on the avenue, and had climbed an iron pole to disengage a guy wire of the hoisting derrick which was in contact with a live electric wire.

While clinging to the pole he touched the live wire and was thrown head downwards toward the ground. In descending he struck the limb of a tree which turned him over so that he struck the ground on his feet.

The accident was not a serious one, and the injured man remains in the employ of the company.

The Pittsfield Electric Company reports that on February 22, an employee was injured in the following manner: while screwing a cross-arm on an iron pole, the man accidentally placed his hand upon a live alternating current wire, the other hand at the same time being on the iron pole. The foreman of the company, who was on the ground, at once telephoned to the company's office to cut out the circuit, which was done. The man's injuries were found to be a severe nervous shock and badly burned hands, but it does not appear that he sustained any permanent impairment.

Oliver P. Russell, a police officer, was injured on Neponset Avenue, Dorchester district, Boston, on the evening of Tuesday, March 1, by contact with a broken electric light wire. The end of the wire was swinging over the street when the officer touched it. He suffered a severe shock and became unconscious, in which condition he was taken to the City Hospital. He was discharged from there March 7, to receive further treatment at the medical out-patient department.

James Hayes, a trimmer in the employ of the Boston Electric Light Company, residing at No. 343 Fifth Street, South Boston, received an electric shock, which caused his death, while trimming an arc street light in front of No. 57 Dover Street, on the morning of April 11. Shortly after six o'clock A.M. he was seen to ascend the pole on the top of which was the light above mentioned, take the usual position, with feet on the wooden cross-arm below the lamp, attach his belt to the proper fixture and commence to trim the lamp. In a few moments he was observed to fall backward, his feet remaining on the cross-arm, and body suspended by

1893.]

the belt, apparently lifeless. After fifteen or twenty minutes. he was taken down and removed to the police station on Dedham Street. A physician was in attendance very soon after, but found life extinct. Examination showed that the man's hands were burned and the pupils of his eyes dilated. The lamp was provided with the usual switch or "cut out," which is designed to enable the operator at the lamp to turn aside the current from the lamp so that it can be trimmed without danger. Whether deceased neglected to take this precaution could not be satisfactorily determined. The company claimed that he was negligent in this respect, that the circuit on which he was working was cut out at the station, and that the current must have come from accidental contact of its wires with the wires of some other electric company. Deceased was about thirty years old, and had been in the employ of the company for four and a half months.

James D. Bollen, about thirty-five years of age, a boiler tender by occupation, and a resident of Northbridge, came to his death on the thirty-first day of July, in consequence of placing one of his hands on a wire charged with electricity. On the ninth day of August last an inquest upon said death was held by the justice of the second district court of southern Worcester; and the report returned in the case finds that said deceased came to his death in the manner above mentioned; that said wire was connected with an electric are light pole of the Uxbridge and Northbridge Electric Company, on Water Street, in the village of Whitinsville in Northbridge, being attached to the pole by coiling the wire about it, and from thence made fast below to a bolt in a rock in a stone wall, thus serving as a guy wire to the pole. It would appear that the current of the electric light wire was transmitted to the pole and thence to the guy wire, the presence of moisture from a recent rain rendering the conditions favorable. Two men touched the guy wire just before the deceased, and both experienced a very severe shock. These remarked the effect upon them; and it seems the deceased person, out of curiosity, stepped up to the guy wire and placed his hand upon it, and immediately fell backward upon the ground, giving no sign of life afterward. An autopsy held by the medical examiner disclosed two spots on the left temple, having the appearance of indentations of the skin; a black spot a little below and back of the right ear; and an abrasion on the forefinger of the right hand. The external vessels of the brain were congested, as was also the cerebellum. The interior of the brain was perfectly normal; the heart normal in size and condition, and deceased appeared to be in robust health.

On the morning of October 6 Peter Berthiaume, of the city of Springfield, a lineman in the employ of the United Electric Light Company, was killed by an electric current from a wire of said company. Berthiaume was an experienced lineman, having worked in that capacity three years for the long-distance telephone company, and for the four years prior to his death for said electric light company. He left the station at 7.30 o'clock A.M., the day of the accident, to transpose the wires of an overhead alternating current circuit on a pole located on the east side of Main Street, between Congress and Franklin streets.

Such transposition of live wires is attended with great danger, and the man had been cautioned a day or two before, when given this work, to shut off the current from the circuit at the switch, situated in a covered passageway in the Cooley Hotel block on Liberty Street. He had to pass by this switch on his way to the pole, but evidently neglected to shut off the circuit. He began work in the usual way, by putting up a cross-arm at right angles with the ordinary horizontal cross-arm, and had scraped the insulation from the two connections on the wire toward the sidewalk, and also the insulation from the end of the connecting wire, ready to put it on the other line on the outside, when he in some way received the shock which caused his death. As he slid off the cross-arm on which he had been sitting, the strap which held his climbing spurs to his left foot caught on an empty peg and prevented his falling to the ground. His features and general appearance indicated that death was instantaneous. There was a small deep burn on palm of right

hand, and a broad blister entirely across left palm near the fingers. Carried upon the same pole was a telephone cable and wires for arc lighting; it would seem that his left hand had grasped the cable while his right was upon the alternating current wire. The arc wires were tested for grounds promptly after the accident, but none were found. On the morning of the accident a fellow workman passing by the switch box about 9 o'clock noticed that the circuit was still on the line of the fatality. Deceased was a man of experience and good habits, and his failure to exercise his ordinary precaution must have arisen through carelessness or thoughtlessness.

James Keating, a lineman in the employ of the Malden Electric Company, was killed by an electric current from an arc light wire in the city of Malden on the afternoon of October 17. He was at work on a pole on Clifton Street, making a connection, when he was seen to fall across the stretched wires. His death was probably instantaneous, as life was extinct when he was removed from the wires a few minutes after his condition was noticed. Deceased was about twenty-six years old.

## Accidents from Gas.

S. S. Montague of Springfield went to bed in his room at the usual hour, at No. 34 Harrison Avenue in that city, on the night of January 11. Not appearing according to his habit in the morning at his place of business, parties went to his room, rapped on the door and could get no response. When the door was opened the room was found filled with illuminating gas, and Mr. Montague upon the bed unconscious. Gas was flowing from the burner, indicating that he had failed to turn off the vent. The room was about eight by twelve feet, and nine feet high; the doors and windows were shut. Under the care of a physician he was restored to consciousness, and finally recovered from the effects of the gas.

John Palmer, residing at No. 19 Indiana Place, Boston, apparently forty-five years of age, was found dead in a room formerly

used as a club room on the second floor of 104 Harrison Avenue, Boston, January 15, at about 8 o'clock P.M. He had been at work in the afternoon of that day painting the room. The occupant of the store underneath the club room had noticed the smell of illuminating gas during the evening, and finally located its source at the door of the club room, which he opened, and found Mr. Palmer on the floor dead. Three of the four burners were flowing in full force, and the doors and windows were closed. Deceased was sickly, had suffered much from rheumatism, was despondent at times, and the case was apparently suicidal.

John Schroeder was found dead in bed in his room at No. 1451 Washington Street, Boston, on the morning of February 1, under circumstances indicating that he had committed suicide by inhaling illuminating gas. The cracks around the doors and windows and the key hole had been covered with mucilaged paper. The gas burner had been unscrewed and replaced by a paper cover, to which was attached a string by which the cover could be removed from a distance, and this appeared to be the means employed by deceased to set the gas flowing. Letters written by deceased addressed to relatives and friends were found in the room, announcing his suicidal intention.

Miss Lucy Duffy was an elderly single woman, and occupied a small attic room at No. 1666 Washington Street, Boston, for several months, where she followed the occupation of dressmaker. The smell of illuminating gas emanating from her room led to the door being broken open at about 10 o'clock A.M., February 19. Miss Duffy was found dead, with her head resting on her sewing machine. Near by was a gas jet from which gas was escaping freely. Whether death came accidentally or otherwise could not be determined.

Shortly after midnight, on the morning of February 19, occupants of the tenement blocks adjoining each other at No. 112 East Canton Street and 1 Thorn Street were awakened from their sleep and noticed the odor of escaping illuminating gas. This led to an investigation, and it was discovered that gas was present in large volume in the several tenements in the buildings. The various apartments were visited, and many of their occupants found to be suffering from inhaling the gas, some being unconscious. These were relieved by the prompt application of restoratives and medical treatment, and as far as known all finally recovered. The source of the escaping gas was found to be a break in the street main laid in Thorn Street, from which the gas went into the basement and thence throughout the buildings. It was said that within a few months prior to the discovery of the break there had been considerable digging in Thorn Street, which had been followed by a settling of the earth.

On the morning of February 24, Mrs. Kate Richardson, an occupant of a room at No. 612 Tremont Street, Boston, was discovered lying dead in bed. A five-foot burner was found open, and the room was filled with illuminating gas. There was one door and a window in the room, and both were tightly closed. How long she had been dead could not be ascertained, but she had not been seen about for at least twenty-four hours. She had received visits from children and other relatives, and had recently sustained a loss by the death of one of her children. It was said that deceased acted somewhat strangely at times. She was about thirty-five years of age.

William Elsbree, a compositor, about fifty-five years old, was found lying unconscious upon the floor of his room at No. 31 Hollis Street, Boston, at 11.30 on the morning of March 6. One of the gas burners was turned partly on, as was also the supply to a gas stove. There was an empty morphine bottle upon a bureau, and the deceased had the reputation of habitually using that drug. He retired to his room about 10 o'clock the previous evening, and probably while under the influence of the drug left the fixtures in the condition found. He was removed to the Massachusetts General Hospital, where he died at 6.30 a.m., March 7. It was not quite clear whether death was caused by the gas or by a combination of that and the morphine.

Dinsmore Howe of New Salem, aged about fifty years, registered at the Commercial House, Athol, at about 11.45 o'clock P.M. on March 26, and was immediately shown to a room on the third floor. In reply to a question by the proprietor he stated that he understood the use of gas, and he was left for the night. At about eleven o'clock on Sunday the smell of escaping gas was traced to his room. The door was forced open, and Howe found dead in bed; from appearances he had been dead three or four hours. The gas cock was fully open, the gas escaping through a six-foot tip. The room was eight by fifteen feet and ten feet high, containing about twelve hundred cubic feet. There was one window and one door in the room, both tightly closed. It was uncertain whether the death was accidental or suicidal.

April 1, at about 6.30 in the morning, Joseph Foley, a pattern maker, was found dead in his room at No. 360 Dudley Street, Roxbury; in the opinion of the physician, life had been extinct for some two hours. An investigation proved that the gas was escaping through a three-foot burner, partly turned on, presumably left so by accident when deceased went to bed. He was about thirty-seven years old, and was of good weight and strong frame. He appeared to enjoy good health, with the exception of a catarrhal trouble, which may have rendered him more susceptible to injury from the gas. The room was small, nine by seven feet and eight feet high, with one window and a door, both closed at the time of the discovery.

Benjamin Jacobs, living at No. 57 East Canton Street, Boston, was discovered in his room with life extinct, April 14, at 8 o'clock in the forenoon. The gas key was open, giving a full flow from the burner, when deceased was found; the door and window of the room were shut and the key hole stopped with paper. Deceased was about forty-five years of age, had lost his wife recently, and had been despondent at times. It appeared to be a case of suicide.

On the morning of April 20, at 11 o'clock, George J. Adams was found unconscious in his room at No. 96 Chandler Street,

1893.7

Boston, where he had lived for about ten days, coming there from North Reading, Mass. He had recently been teaching school, and under advice of a physician had given it up because of failing health. He had been low-spirited at times. There were four burners in the room, one of which was turned on. There were no other indications of suicidal intent, and the opening of the gas burner may have been accidental, for the key had no guard, and turned easily. He was taken to the City Hospital, where he died April 22. Deceased was twenty-five years of age.

James Hurley registered at the St. James Hotel, Beach Street, Boston, on the night of April 16, and was accompanied to his room by a clerk, who instructed him in the use of the gas burner, and opened a transom over the door at least one-third way, and left him preparing to go to bed about 12.30 o'clock. Not making his appearance, the room was visited shortly after one o'clock the next afternoon, and he was found dead in bed, life having been apparently extinct for several hours. The three-foot burner was turned on full and the transom and windows closed. Deceased was evidently about forty-one years old, and a laborer.

Joseph D. Sweeney, aged twenty-two years, was discovered dead in his bed, at his boarding-place, No. 732 Western Avenue, Lynn, May 3, about 6.50 o'clock in the morning. During the afternoon of the day before the smell of illuminating gas was noticed about the building, and the occupants of the upper part were cautioned not to close the windows at night, as the leak had not been discovered. On opening the door of the room where deceased was found, it appeared that the precaution had been neglected, as the two windows were tightly shut. The outlet of the gas was found next morning to be the open end of a pipe located between the floor of the room and the ceiling of the store below.

E. H. Thompson of Plymouth, Mass., registered at the Plymouth House, corner South and Kneeland streets, Boston, on Sunday evening, September 4, and was assigned a room on the third floor, to which he retired about 10 o'clock. He was found

dead in bed about 8 o'clock Monday morning, having been suffocated by illuminating gas, which was escaping through a four-foot burner partly open. The room contained about five hundred and ninety cubic feet, being twelve by eleven feet and seven feet high. There was one door in the room, which was tightly closed, and one window, about two feet eight inches by four feet six inches, slightly open. The gas light was supposed to have been accidentally extinguished.

On September 1, a man registering as David Balderston of Prince Edward Island was assigned a room at Hotel Eastern, Canal and Causeway streets, Boston, engaging the same for a week. In the afternoon of September 5, about 4 o'clock, the odor of gas was noticed about the room; the door was forced open, and the man was found dead in bed. The gas was flowing from the burner, and the window was closed. Deceased appeared to be about twenty-five years old, and of regular habits, and the circumstances indicated suicide. The physician pronounced the death to be caused by gas suffocation.

James Morris, a boarder at No. 11 Warrenton Street, Boston, retired about 10 o'clock on the evening of October 15 last, and not appearing at the usual time, his room was opened by the proprietor about 9 o'clock the next morning, who found the man lying dead in bed and the room full of gas, which was escaping through a five-foot burner, fully open. The door was tightly closed, as was also a window at the opposite end of the room, curtains of which were closely drawn. The room contained about five hundred and forty cubic feet.

A. M. Ryder of Quincy, a guest at the Boston Hotel, Beach Street, registered at about 11 o'clock on the evening of October 9, and went to his room shortly after, where he was found unconscious the next morning about 8 o'clock. The key of the gas burner was open, and gas was escaping; the one window was closed, but a small aperture above the door was open. Deceased was said to have been under the influence of intoxicating liquor

the night previous, and was probably careless about the gas key. A physician was called, but death ensued before his arrival.

Mrs. Emilie Brais of Providence, R. I., was asphyxiated on the night of September 13 at No. 7 Endicott Street, Lynn, where she was visiting her daughter. She went to her room about 10 o'clock, apparently in good health, and was found there in the morning about 6 o'clock, dead. Gas was escaping from a burner, which was not entirely turned off. Deceased was about seventy-five years of age.

On the night of October 5, E. E. Jameson of North Brookfield, aged thirty-six years, registered at the Wilson House, Natick, and was given a room in the west end of the building. He had been around the town during the day, and was apparently somewhat under the influence of intoxicating liquor when he went to bed. The smell of escaping gas was traced to his room. When the room was opened, gas was escaping from a four-foot burner, and Jameson was lying on the bed. A physician came, and stated that deceased had been dead for some hours, and that the cause was suffocation from the gas.

A man registering as Luther L. Rawson of Bradford, Mass., was discovered dead in his room at the Ætna House, Haverhill, about 10 o'clock on the forenoon of December 27. He retired to his room about midnight, Saturday, December 24, which was the last time he was seen alive. On opening the door the room seemed filled with gas which was flowing from an open burner, doubtless the cause of death. Nothing peculiar in the bearing of the man had been noted; he appeared to be in comfortable circumstances, and articles of some value, besides money, were found among his effects. He was apparently about forty-eight years old. It did not clearly appear whether the death was accidental or not.

On the night of October 3, while visiting in the city of New Bedford, a resident of the adjoining village of Steep Brook, named Hewins, narrowly escaped asphyxiation by illuminating gas. He retired to his bed chamber at the house No. 96 Washington Street quite early in the evening. The next morning, when

one of the occupants of the house arose, the smell of gas was noticed, and on investigating it was found that it came from the room occupied by Mr. Hewins. All attempts to gain a response being unavailing, the door was forced open, and Mr. Hewins was found lying on the floor insensible. A physician worked on him for nearly two hours, finally restoring him to consciousness. The room was found filled with gas and the gas jet was open.

Francis A. Backus, an employee of the New Bedford Gas and Edison Light Company, while tapping a main to connect a service on William Street in New Bedford, on the afternoon of November 15, was overcome by gas from the pipe, and had to be taken from the pit where he was at work and carried to his house. He recovered sufficiently to return to his work on the morning of the next day.

Ida Alphia, sixteen years old, residing at No. 78 Cross Street, Boston, was at work on the fifth floor of the building No. 76 Prince Street, December 17. She lighted a match, and an explosion followed, and she was thrown down, slightly burned, and sustained a fracture of the skull. The cause of the explosion was the ignition of illuminating gas which came from a leak in a gas pipe.

On November 21, at about 4.15 o'clock in the morning, James Hunt, night operator of the oil gas plant of the Brockton Gas Light Company, while throwing the drippings into the tar well at the works, held a lantern in his hand which ignited the gas in the well, causing an explosion, and setting the tar on fire. His face and hands were badly burned, incapacitating him temporarily for work.

The number of deaths in the United States reported to the Board from various sources during the year 1892, caused by inhaling illuminating gas, is two hundred and fifty. Of this number thirty-seven are reported as suicides, and two hundred and thirteen are supposed to have been accidental. The supposed accidental cases, omitting those in this State, occurred in the following-named cities and towns:—

Newark, N. J., Pittsburg, Wilkesbarre and Allegheny, Pa.,

Lexington, Ky., Cincinnati, O., New Rochelle, Saratoga, Albany, Long Island City, Newburg and Binghampton, N. Y., Joliet, Ill., Janesville, Wis., Benton Harbor, Jackson and Grand Rapids, Mich., Hagerstown, Md., Bridgeport, Ct., San José, Cal., Seattle, Wash., Sioux Falls, Burlington and Dubuque, Ia., one each; Troy, N. Y., Pawtucket, R. I., Weehawken, Jersey City and Atlantic City, N. J., Hartford, Ct., Aurora, Ill., Toledo, O., and Omaha, Neb., two each; Milwaukee, Wis., St. Paul, Minn., St. Louis, Mo., and Brooklyn, N. Y., three each; Sacramento, Cal., Providence, R. I., Baltimore, Md., and Washington, D. C., four each; Philadelphia, Pa., fifteen; San Francisco, Cal., twenty-seven; Chicago, Ill., thirty-eight; New York City, forty-seven. Of this number, eight occurred where coal gas only is made, seventy where water gas is exclusively used, and one hundred and nineteen where both coal and water gas are used.

Following is the number of deaths occurring each month in the year: January, 15; February, 25; March, 15; April, 22; May, 15; June, 15; July, 13; August, 9; September, 25; October, 35; November, 22; December, 39.

#### GAS COMPANIES.

The following table shows the corporate name, the localities supplied, the capital and the par value of the shares of the gas companies in active operation on the thirtieth day of June last:—

	FOR YEAR EX	IDING JUNE 30.
	1891.	1892.
Leaving an apparent net profit on their		
gas business of	\$1,597,668 87	\$1,907,711 60
They have also received for interest, etc.,.	24,644 58	29,934 99
They have also received for rents, etc., . They have also received as profits from	211,414 51	172,394 05
electric lighting,	143,240 78	203,165 54
Making a total of	\$1,975,968 74	\$2,313,206 18
From these receipts were paid interest on	İ	
bonds and loans	\$521,885 81	\$569,667 18
Dividends	1 000 000 00	1,064,489 00
Dividends,	35,380 60	366 851 86
	\$1,584,216 41	\$2,001,008 04
Leaving a surplus for the year of .	\$392,752 33	   <b>\$</b> 312,198 14

Three 1 of the companies appear not to have earned expenses, and sixteen 2 others have not earned sufficient to warrant the declaration of any dividend.

The receipts for gas sold by meter show an apparent increase of about \$268,000; but included in this is about \$76,000 from the sales made by various Boston companies to one another, which reduces the actual increase to about \$192,000. Receipts from public lamps continue to fall off, this year showing a decrease of about \$29,700.

In the appendix will be found, under date of June 30, 1892, the separate balance sheets, profit and loss and manufacturing accounts of the companies, as taken from the annual returns, with corrections as made by the Board after examination and correspondence with the officers of the several companies.

<sup>&</sup>lt;sup>1</sup> Seven last year.

<sup>2</sup> Twelve last year.

Aggregates from these balance sheets and those in the returns of 1891 show the following facts:—

#### PRICE OF GAS.

The following companies have reduced the price of gas during the year ending June 30, 1892:—

Brockton, Citizens' (Quincy), Chelsca, New Bedford, Gloucester, Newton and Watertown, Norwood.

The following pages show the price charged by the several companies, June 30, 1892; the average candle-power, as shown by the tests made by the State inspector of gas; and the average Price, per thousand feet sold by meter, received in the two years

ending June 30, 1892.

The average price to consumers for coal gas, of twenty-five companies making annually more than 30,000,000 feet each, is \$1.32 per thousand feet. The average price of the remainder of the coal-gas companies is \$2.01, making an average for all of \$1.38 per thousand. The average price for oil gas is \$3.7546 per thousand feet.

The average price for coal gas in 1886 was \$1.72; in 1887, \$1.66; in 1888, \$1.56; in 1889, \$1.45; in 1890, \$1.39; in 1891, \$1.31; and in 1892, \$1.38.

The following table shows the amount of gas made in the year ending June 30, 1892, and in the year ending June 30, 1891; the amount sold by meter and to public lamps in both these years; the amount used at works and offices; and the amount of gas unaccounted for during the year ending June 30, 1892, and the percentage of unaccounted-for gas in both years.

Note. — The terms "coal gas" and "coal gas companies" whenever used in the report are intended, unless otherwise qualified, to include all the companies except those that make their gas entirely from oil distilled in closed retorts externally fired.

#### STREET MAINS.

The returns by the various companies of their street mains are still somewhat deficient in detail. During the year forty-six companies laid about sixty-three miles of mains, varying in the several cases from two hundred feet to nearly nine miles.

The following table shows the lengths and sizes of the mains, as returned by the companies:—

NAME OF COMPANY.         1         15         2         2         4         6         10         14         16         20         10         14         16         20         10         14         16         20         10         12         10         12         2         4         6         3         10         14         16         20         10 <t< th=""><th></th><th></th><th></th><th></th><th></th><th></th><th></th><th></th><th></th><th></th><th> </th><th></th><th></th><th></th><th></th><th></th><th></th><th></th><th></th><th></th></t<>

The following show the aggregate results of the operation of the electric light central stations in the State for the year ending June 30, 1891, and for the year ending June 30, 1892:—

	YEAR ENDIN	G JUNE 30.
	1891.	1892.
RECEIPTS.		
For light and power,	\$2,432,869 15	<b>\$</b> 2,947,199 64
From other sources,	7,481 50	23,438 30
	\$2,440,350 65	\$2,970,637 94
EXPENSES.		
For manufacture,	\$1,014,242 88	<b>\$1,156,320 69</b>
distribution,	356,332 38	386,084 45
office expenses and management, .	159,230 90	194,999 25
taxes,	82,743 77	107,291 15
miscellaneous,	122,656 20	170,707 32
	<b>\$1,735,206 13</b>	\$2,015,402 86
Leaving a balance of	<b>\$</b> 705,144 52	<b>\$</b> 955 <b>,23</b> 5 08
Of this profit, the gas companies made in their electrical departments,	143,240 78	189,225 74
Leaving for the electric light companies. To which should be added the income		\$766,009 34
from rents, jobbing, etc., amounting to,.	45,022 10	195,280 73
Making a total of	\$606,925 84	<b>\$</b> 961,290 07
Interest,	<b>\$144,678 87</b>	\$195,094 15
	262,968 00	323,581 00
Depreciation.	41,225 21	210,168 79
Dividends,	7,671 57	32,227 49
Y a sumulus to be semiled from	\$456,543 65	\$761,071 48
Leaving a surplus to be carried for ward of	\$150,382 19	\$200,218 64

Aggregates from the balance sheets of the electric companies only, taken from the returns of 1891 and 1892, show the following facts:—

	1891.	1892.
Assets:—		
Construction accounts, including pat-		
ent rights and franchises,	\$9,031,520 49	\$11,097,808 20
Cash on hand,	262,284 10	419,639 58
Due for light and power,	178,034 22	238,708 79
Other accounts due,	67,475 82	68,026 85
Materials, etc.,	240,933 02	460,153 63
Notes receivable,	84,269 09	69,229 09
Investments,	67,370 94	85,291 10
T	\$9,931,887 66	\$12,438,857 19
Liabilities: —	AF 000 000 00	******
Capital,	<b>\$</b> 5,866,300 00	\$6,539,700 00
Bonds,	1,923,125 00	2,548,050 00
Notes payable,	1,243,349 96	1,767,907 27
Unpaid bills,	374,818 77	557,947 76
Unpaid dividends,	438 07	2,462 48
Interest due and unpaid,	11,374 50	29,991 06
Other items,	37,654 81	345,831 67
	\$9,457,061 11	\$11,791,890 24
Reserved and depreciation funds, .	80,249 97	132,825 32
	\$9,537,311 08	\$11,924,715 56
Surplus,	394,576 58	514,141 68
	\$9,931,887 66	\$12,438,857 19
Of these companies —	40,001,001	<b>412,100,001</b> 11
139 show an aggregate surplus of .	<b>\$</b> 426,759 95	\$578,266 71
117 show an aggregate deficit of .	32,183 37	64,125 08
Leaving total net surplus, as shown		
above.	<b>\$</b> 394,576 58	\$514,141 68
Which, added to reserves carried as		,
liabilities,	80,249 97	132,825 32
Would show an actual surplus of .	\$474,826 55	<b>\$</b> 646,966 98
Equivalent to per cent. on capital of		
about	9	9,8

<sup>&</sup>lt;sup>1</sup> Forty in 1891.

Wiring at cost. Lamp renewals, 65 cents each.
Woburn, .		Arc lights, 7 nights per week, \$9.00 per mo.; 6 nights, \$8.00; 5 nights, \$7.00; 4 nights or less, \$6.00. Incandescent lights, 6 or 7 nights per week, \$12.00 per year; 5 nights, \$11.00; 4 nights or less, \$10.00. Renewals free; wiring at from \$1.50 to \$3.25 per outlet.
Worcester,	}	Arc lights, 1 light for 4 mos. daily, 70 cents per light; for 8 mos. daily, and Saturdays for 12 mos., 60 cents per light; 2 lights for 4 mos. daily, 65 cents; for 8 mos. daily, and Saturdays for 12 mos., 55 cents each per night; 3 lights for 4 mos. daily, 60 cents each per night; for 8 mos. daily, and Saturdays for 12 mos., 50 cents each per night. One or more lights every night in the year, 50 cents each. Incandescent lights, 6 nights per week, until 9 P.M., \$1.00 per lamp per mo.; until 10 30 P.M., \$1.30 P.M., \$1.50 per mo.; 7 nights per week, until 10 30 P.M., \$1.50 per mo.; until 12 P.M., \$1.75 per mo.; all night, \$2.00 per mo. Renewals free to stores; others at cost.

Cases pending before the Board, Dec. 31, 1892.

Appeal of the Braintree Electric Light Company from the decision of the selectmen of Braintree, granting permission to A. S. Morrison and others to run wires over certain streets in Braintree.

Appeals of the Randolph and Holbrook Electric Company, and of Edward H. Galligan and others, from the decision of the selectmen of Randolph, granting permission to the Randolph and Holbrook Light and Power Company to erect poles and wires in the streets of Randolph.

Appeal of the Bristol County Electric Company from the decision of the aldermen of Taunton, refusing to grant permission to said company to erect poles and wires in the streets of Taunton.

Appeals of the Boston Electric Light Company and the Edison Electric Illuminating Company from the decision of the aldermen of Boston, granting permission to certain parties to run wires over Summer Street.

Petition of the Natick Gas Light Company for authority to supply electric light.

Appeal of the Lawrence Gas Company from the decision of the selectmen of North Andover, granting permission to the Merrimac Valley Horse Railroad Company to erect poles and maintain electric lights in the streets.

Appeal of the Framingham Gas, Fuel and Power Company from the decision of the selectmen of Framingham, granting permission to the Framingham and Ashland Gas Light Company to lay pipes in the streets.

Appeal of the Worcester Electric Light Company from the decision of the mayor and aldermen of Worcester, granting permission to the Quinsigamond Electric Power and Light Company to erect poles and run wires in the streets of Worcester.

Petition of consumers of the Springfield Gas Light Company for reduction in the price of gas.

Petition of consumers of the East Boston Gas Company for reduction in price of gas.

Petition of consumers of the South Boston Gas Light Company for reduction in price of gas.

Petition of consumers of the Dorchester Gas Light Company for reduction in price of gas.

Petition of consumers of the Roxbury Gas Light Company for reduction in price of gas.

Petition of consumers of the Jamaica Plain Gas Light Company for improvement in quality and reduction in price of gas.

Petition of consumers of the Brookline Gas Light Company for reduction in price of gas.

Appeals of the Edison Electric Illuminating Company, and Boston Electric Light Company, from decision of aldermen of the city of Boston, granting to D. Webster King permission to run electric wires over certain streets in Boston.

Appeal of the Westborough Gas and Electric Company from the decision of the selectmen of Westborough, granting to Henry S. Jackson and others permission to lay gas mains and pipes in the streets of Westborough.

Appeals of the Boston Electric Light Company, and Edison Electric Illuminating Company, from the decision of the aldermen of Boston, granting to the Suburban Light and Power Company permission to maintain electric wires in the streets of Boston.

Petition of consumers of Citizens' Gas Light Company of Reading, South Reading and Stoneham for improvement in quality and reduction in price of gas supplied in Reading.

JAMES W. McDONALD. FORREST E. BARKER. CHARLES A. TOWNE.

Boston, Jan. 4, 1893.

#### APPENDIX B.

# SPECIAL REPORT CONCERNING THE BOSTON GAS LIGHT COMPANY.

#### Commonwealth of Massachusetts.

OFFICE OF THE BOARD OF GAS AND ELECTRIC LIGHT COMMISSIONERS, March 25, 1892.

To the Honorable Senate and House of Representatives.

We have the honor to acknowledge the receipt, on the twenty-sixth of February last, of an order, of which the following is a copy:—

Ordered, That the Board of Gas and Electric Light Commissioners be instructed to make a special report to this Legislature, within thirty days from the passage of this order, as follows:—

- 1. Whether or not the Boston Gas Company has within the past six months made any advances in its charges for gas.
- 2. At what price the Boston Gas Company can manufacture gas delivered in its holders and at the meters of its consumers and pay dividends of eight per cent. on its capital stock, and provide for all needed renewals and extensions of its plant.
- 3. To what extent the Boston Gas Company is hiring the use of pipes from another corporation at an excessive rental, and to what extent the Boston Gas Company is paying another corporation one dollar per thousand feet for gas, which it could manufacture for a less sum per thousand feet.
- 4. As to whether the Bay State Gas Company diverts the surplus earnings of the Boston Gas Company into the treasury of a foreign corporation known as the Bay State Gas Company of Delaware.

The Board of Gas and Electric Light Commissioners, for the purpose of this investigation and report, are hereby empowered to order the production of books and papers and to compel the attendance of witnesses.

In reply we respectfully submit the following: -

Nov. 11, 1887, the directors of the Boston Gas Light Company authorized three-year contracts at \$1 per thousand with all consumers whose bills had theretofore exceeded \$2,000 per annum.

Under this authority, contracts at this rate were made with

forty-two consumers, mostly managers of theatres, hotels, railroads, newspapers and large retail stores, by which, in consideration of this rate, they bound themselves to purchase gas of the Boston Gas Light Company exclusively, for the period named. All these contracts expired on or about the first day of January, 1891, but the company continued to supply them with gas at \$1 per thousand until Jan. 1, 1892, at which time the price was advanced to \$1.30 per thousand feet.

These consumers, in the year 1891, paid for 124,394,300 cubic feet of gas \$124,394.30. With the rate of \$1.30, and the same consumption, the bills would amount to \$161,712.59, an increase of \$37,318.29.

On Nov. 28, 1887, the directors voted that from and after Jan. 1, 1888, a reduction of ten cents per thousand cubic feet be given to consumers whose bills were between \$1,000 and \$2,000 per annum. On April 10, 1889, it was voted "that the rebate of ten cents per thousand feet allowed to large consumers be continued for the present." No other action has been taken with reference to this rebate. The last payments under these votes were made on March 24, 1891, for consumption of 1890, at which time fifty-four consumers received rebates amounting to \$7,569.42.

We know of no other change in rates during the period named in the order.

Referring to the first part of the third question we have to report:—

The Bay State Gas Company has laid, at their works and in the streets of Boston, 15 miles and 3,070 feet of mains, as follows:—

15,297	feet	of	30	inch.	6,553	feet	of	10	inch.
10,297	feet	of	24	inch.	26,549	feet	of	6	inch.
2,651	feet	of	20	inch.	13,373	feet	of	4	inch.
7,550	feet	of	12	inch.					

In the opinion of the Board a fair estimate for the cost of these pipes is as follows:—

For the thirty inch, \$91,800; for the twenty-four inch, \$51,500; for all the others, \$65,200, or about \$208,500 in all.

On or about July 1, 1889, the Boston Gas Company began to use the twenty-four inch and twelve inch pipes for the purpose of sending gas into the city. Late in October of the same year they began to use the thirty inch pipe from their works to Shawmut Avenue. Only a small portion of the four inch, six inch and ten inch pipes have been used by the Boston Company.

For this use they have paid as follows to the Bay State Gas Company of Massachusetts: —

Dec. 20, 1889, for the calendar year 1889,			\$100,000 00
Oct. 31, 1890, for the calendar year 1890,	•	•	100,000 00
Total			\$200,000,00

Some question has arisen in reference to this last item, and there is some confusion in reference to it in the books of the Boston Gas Light Company.

The cash book of this company shows that on Oct. 31, 1890, \$100,000 was paid to the Bay State Company for use of mains, and this amount was immediately charged to profit and loss. June 30, 1891, this entire amount was taken out of profit and loss, and charged to a new account, "rent of mains," opened for the purpose, upon the ground that the rental was for two years, and that the previous charge of this sum to profit and loss was an error. In the return to this Board, under date of June 30, 1891, the full sum of \$100,000 is included in the assets of the Boston Company, as though this payment had been made for a use to be enjoyed at some period wholly subsequent to that date, but it does not appear as a liability in the return of the Bay State Gas Company of Massachusetts. This sum also appears, in the same way, in the balance sheet of the Boston Company of Dec. 21, 1891, but not in that of the Bay State of Massachusetts of that date.

The entries of this transaction in the accounts of the Bay State of Massachusetts give no indication of the period for which the money was received, but the receipt for this sum filed with the vouchers of the Boston Company, and the records of the meetings of the directors of both corporations, state clearly that this sum of \$100,000 was in payment for use of mains in 1890.

In relation to the purchases of gas referred to in the last part of the third question, we submit the following:—

The Boston Gas Light Company has purchased from the Bay State Gas Company of Massachusetts gas as follows:—

```
1600
From Jan 1 to June 30,
                              84,285,000 feet, at $1 per M.
  $84,285
From July 1 to Dec. 31,
                          . 306,446,000 feet, at $1 per M.,
  306,446
                          . 390,731,000 feet, at $1 per M., $390,731
   Total for the year,
From Jan. 1 to June 30, . 319,038,000 feet, at $1 per M., $319,038
From July 1 to Dec. 31,
                          . 470,326,000 feet, at $1 per M.,
   470,326
                         . 789,364,000 feet, at $1 per M., $789,364
    Total for the year,
The accounts show a rebate for gas bought during the last six
   70,000
Making the cost for that period 85.7 cents per M., and the net
 expenditure for the year,
  . $719,364
```

Month of January, Month of February,	•		at \$1 per l	\$91,821 76,708
Total for two me			-	<b>\$168,529</b>
vear by	_	 		<b>\$</b> 37,181

These prices were for the gas delivered in the mains of the Bay State Company leading to the works of the Boston Company, in whose holders it was stored. If this gas had been made at the works of the Boston Company, its cost should not have exceeded 55 cents per thousand feet.

In replying to the fourth question, a strict construction of the term "surplus earnings" would probably include only that sum which remained after all the expenditures had been met, including interest and dividend charges. Upon this meaning of the term it appears that all such earnings have remained in the possession of the Boston Gas Light Company, invested in its works or employed in the ordinary conduct of its business.

The Board has assumed that the inquiry was designed to have a broader scope, and to include all those funds of the Boston Company which may have passed from it to the Bay State of Delaware through the Bay State of Massachusetts, but to exclude any sums which may have passed otherwise, directly or indirectly, to the Delaware Company.

As the income of the Bay State of Massachusetts has been derived almost exclusively from its transactions with the Boston Company, it is fair to say that practically its entire profits are from the earnings of the latter company. The Board has therefore endeavored to answer the inquiry by ascertaining what portion of these profits has been paid to the Bay State of Delaware.

Some time in the year 1885, the Bay State of Massachusetts, by authority of its directors, executed and delivered in part payment for its works, or plant, to be thereafter constructed, a bond or written obligation dated March 11, of that year, for \$4,500,000. By the terms of this obligation interest must be paid on said sum as often as once in each and every six months from its date, at a rate equal to nine-tenths of the net profits of the business of said Bay State Gas Company.

For this reason the directors have found it necessary, whenever declaring a dividend upon the \$500,000 of stock, to declare interest at the same rate on the \$4,500,000 bond.

The Bay State of Delaware is not a holder of stock in the Bay State of Massachusetts, but by assignment dated Aug. 13, 1889,

it became the sole owner of the bond, and all payments of interest have been made directly to the former corporation.

Interest has been declared on this bond as follows: -

1896. Jan. 2, 2 per cent.,	െ റെ	Dec.	20.	1889.	_		_	_		\$90,000
Oct. 30, 2 per cent.,						•	•	•	•	90,000

So far as the Board is aware, no other earnings of the Boston Company have passed through the Bay State of Massachusetts to the Bay State of Delaware.

The inquiry as to price, numbered 2 in the order, suggests a question of much difficulty, demanding for its full and fair consideration a large amount of careful investigation.

The price at which gas can be supplied, whether in the holder or at the meter, is not a fixed and obvious price, in every place the same, but many items of expense are so affected by local conditions and the volume of the business that it is impossible to exactly determine at what price a company can make and supply its gas, without an intelligent and exhaustive examination of all its affairs.

The Boston Gas Light Company disburses annually nearly two millions of dollars in many thousand transactions, and the time allowed by the order is much less than the Board has usually given to the examination of questions of a similar character, and is not sufficient for that careful study which would be necessary in a judicial determination on a petition under the statute for a reduction of price.

When it is considered that a change of one cent in the price per thousand feet causes a corresponding variation of more than \$14,000 in the income of this company, the importance of a careful study of all the conditions, before absolutely determining the price that is fair and just to all concerned, becomes apparent.

From computations based on the statements in the sworn returns made to this Board by the Boston Company, for the year ending June 30, 1891, it appears that it cost for coal 36.27 cents per thousand feet; reducing this by the amount received from residual products, 13.09 cents, leaves 23.18 cents per thousand feet for the cost of coal. The amount of the other items making up cost in the holder, including enrichers, purification, wages at works and repairs, was 36.8 cents, making a total of almost 60 cents for cost in the holder.

For the cost from the holder to the consumer's meter, including wages, main and meter repairs, directors' allowances, salaries, office expenses, taxes, claims, law expenses and incidentals, the amount was 21 cents, making 81 cents. To this sum should be added about five per cent. of the cost in the holder for gas which is used in carrying on the business, and that which is invariably lost in the process of distribution, commonly known as leakage, or unaccounted-for gas, making a total of 84 cents.

In the opinion of the Board this amount of 84 cents is too large, and may readily be reduced without embarrassment to the company.

In the spring or early summer of 1890, the Boston Company abandoned its former custom of buying coal directly from coal companies, or their regular agents, and has since then (with the exception of about 1,000 tons bought of the Dorchester Gas Light Company) purchased exclusively of the Bay State Gas Company of Delaware, at what seems to be a uniform advance over the market price, and adding, for the year to June 30, 1891, about

\$33,700 to the cost, or about 4 cents per thousand feet to the cost in the holder.

A different treatment of the residual products would probably increase the revenue from this source, and correspondingly reduce the cost of the gas. During the year mentioned, all the tar sold from the North End station was marketed by the Bay State of Massachusetts, at a profit to that company of about \$8,000, or one cent per thousand feet.

An important item in the 36.8 cents mentioned above is that of enrichers or oil. The experience of other companies would indicate that a reduction of two cents per thousand might be made in this item. No special investigation has been made of the other items looking to a reduction.

Deducting, from the 84 cents mentioned as the cost at the consumer's meter, the 7 cents just referred to, leaves 77 cents; and taking the same amount, 7 cents, from the 60 cents, leaves 53 cents as a fair estimate of the cost in the holder. The proper amount needed to provide for renewals and extensions is perhaps the most difficult of all to accurately determine, and the one concerning which opinions would differ most widely. Very much depends upon the present condition of the plant for generating and distributing, the change of population and output, and all the engineering details of the business.

Very valuable suggestions may be gathered from the recent history of the company. During the fifteen years beginning with 1877 the charges against income for extensions and improvements have somewhat exceeded \$3,300,000, or an average annual charge of about \$225,000, a little less than 16 cents per thousand feet on the present output of the company. But the period named was one of extraordinary development; it witnessed the construction of the entire works at Commercial Point, with large expenditure for new mains and a payment for a part of the land at the Point.

No such extraordinary expense seems likely to be called for in the next ten years. If the annual output should be doubled, no additional land purchase would be necessary. Fair provision could be made for extensions and renewals with one-half the sum named above, or 8 cents per thousand feet.

The capital of the company, \$2,500,000, equals \$1.77 for every thousand feet of output, and 8 per cent. on this may be stated at 15 cents per thousand. Adding these amounts to the 77 cents estimated to cover other items, we have \$1 as a fair price at which gas may be delivered at the consumer's meter upon the conditions described.

The detailed figures given are based upon an annual output of about 1,414,000,000 feet. If, for any reason, the Boston Company should find it necessary to decline to supply the Roxbury and Dorchester companies, the cost of distribution would be increased about six cents because of the reduction in output.

Neither the fact of the purchase of gas from the Bay State of Massachusetts nor the price paid that company has been considered in these estimates. If the Boston Company were to continue to supply the Roxbury and Dorchester companies without purchasing from the Bay State, it would be necessary to very soon increase the capacity of the Commercial Point station at considerable expense.

If a water-gas plant were built, for which the company now owns the rights, the cost of the mixed gas might be somewhat less than the above estimates.

Respectfully submitted,

JEREMIAH W. COVENEY. FORREST E. BARKER, CHARLES A. TOWNE.

#### APPENDIX C.

ATTORNEY-GENERAL ex rel. BOARD OF GAS AND ELECTRIC LIGHT COMMISSIONERS v. WALWORTH LIGHT AND POWER COMPANY.

SUPREME JUDICIAL COURT OF MASSACHUSETTS.

Suppols. June 24, 1892.

Injunction. — Erection of Electric Lines. — Exclusive Rights.

- 1. St. 1887, chapter 382, section 3, provides that in any city where a company is engaged in the "manufacture and sale of electric light, no other company shall lay or erect wires over or under the streets, . . . for the purpose of carrying on its business, without the consent of the mayor and aldermen." Held, in an action for an injunction against an electric light company, that the prohibition extended to wires under the streets laid by defendant's predecessor, and now belonging to defendant; to wires put up by and belonging to defendant throughout the city, even though such wires where they cross the streets were sold to defendant's customers to evade the statute; to wires put up and owned by defendant's customers with intent to evade the statute.
- 2. In such case, while the court cannot order the wires of parties not in court to be taken down, it will order defendant not to use them.

Report from Supreme Judicial Court, Suffolk County. — James M. Morton, Judge.

Application for injunction by attorney-general ex rel. Board of Gas and Electric Light Commissioners against the Walworth Light and Power Company. Injunction granted.

E. W. BURDETT and C. A. Snow for petitioner; E. R. CHAMP-LIN for defendant.

Holmes, J. This is an information by the attorney-general, under St. 1887, chapter 382, and St. 1885, chapter 314, section 13, to restrain the defendant from maintaining or using certain wires over which the defendant furnishes electricity for lighting.

The defendant was incorporated since the passage of St. 1887, chapter 382. By section 3 of that act, "in any city or town in which a company is engaged in . . . the manufacture and sale of electric light, no other company shall lay or erect wires over or under the streets, lanes and highways of such city or town, for the purpose of carrying on its business, without the consent of the mayor and aldermen," etc. There were companies in Boston engaged in the manufacture and sale of electric light at the date of the act, and the defendant has not obtained the consent required The wires in question are of three classes: First, two wires in a tunnel under Hawley Street, laid without license by a predecessor of the defendant, and now belonging to the defendant: second. wires put up by the defendant, and still belonging to the defendant throughout their entire length, except where they cross the streets; the portions which cross the streets having been sold by the defendant to its customers, or put up by the defendant for its customers in some instances, in others having been put up by the customers, these devices being intended by the parties to evade the statute; third, wires put up by customers, and belonging to them, the intent presumably being the same as in the last case. The question is, whether these wires fall within the statute.

The Legislature may think that a business like that of transmitting electricity through the streets of a city has got to be transacted by a regulated monopoly, and that a free competition between as many companies and persons as may be minded to put up wires in the streets, and to try their luck, is impracticable. Without wasting time upon useless generalities about the construction of statutes, it is enough to say that the statute before us had that consideration in view, and must be construed accordingly. We agree that we cannot supply a casus omissus. But the fair scope and meaning of the words used and the number of cases included will vary more or less according to the purpose of the To take an example a little different from those before us. we think it plain that, if somebody else put up a wire, and then the company bought it and used it for the business of furnishing and selling electric light, the case would be within the meaning of the words used, although the company did not erect the wire in a literal sense, or cause it to be erected. In other words, the reason why the statute forbids laying or erecting wires is to prevent wires being maintained in the streets. If they vanished as soon as erected, the Legislature never would have prohibited the mere act of putting them there. But when the Legislature forbids erecting wires for the express purpose of preventing their being maintained. it impliedly forbids their being maintained. We are of the

opinion that the case is not changed by the wires having been laid by a predecessor who was not within the prohibition of the statute, if that be the fact as to the wires in Hawley Street.

We are of the opinion that similar reasoning applies with greater force to the use of the second class of wires by the defendant. It seems to us quite out of the question to say that a company may escape the prohibition of the statute by turning over to a customer so much of each wire as crosses a street, and then continuing to use the wire. If it is forbidden to erect, it is forbidden to use wires which it has erected. And it is within the words of the act, as well when it erects a wire technically, as a servant of its customer, with intent to use the wire for the purposes of its business, but to evade the act, as when it erects it on its own behalf. We agree that we cannot order wires to be taken down, the owners of which are not before us. But we can order the defendant not to use them.

With much more hesitation we have come to the same conclusion about the wires put up by customers. If a use of them by the company for the purposes of its business is permitted, the statute is made nugatory by an easy evasion. It was suggested that in some of these cases the company did not sell electric light, because it did not own the device at the customer's end by which the electricity furnished took the form of light; that the company only sold electricity. We think it quite clear that the Legislature took no such nice distinctions, and that a wire which is prohibited when used to furnish electric light is prohibited equally when used to furnish electricity for the purpose of conversion into light at the end of the wire.

Injunction accordingly.

#### APPENDIX D

#### NEW LEGISLATION.

' [CHAP. 67, ACTS OF 1892.]

An Act to raise the standard of the illuminating power of gas.

Be it enacted, etc., as follows:

SECTION 1. Section fourteen of chapter sixty-one of the Public Statutes, as amended by chapter two hundred and fifty of the acts of the year eighteen hundred and eighty-six and chapter two hundred and fifty-two of the acts of the year eighteen hundred and ninety, is hereby amended by striking out in the thirteenth line of said section, the word "fifteen", and inserting in place thereof the word: - sixteen, - so as to read as follows: -Section 14. The gas of every company supplying more than fifty consumers shall be inspected at least twice a year, and one additional inspection shall be made for every six million cubic feet of gas supplied by each company; but the gas of no company shall be inspected oftener than once a week. All such inspections shall be made by the inspector or his assistant, and one fourth at least of all such inspections shall be made by the inspector. gas shall be tested for illuminating power by means of a disc photometer, and, during such test, shall be burned from the burner best adapted to it, which is at the same time suitable for domestic use, and at as near the rate of five feet per hour as is practicable. When the gas of any company is found on three consecutive inspections to give less light than sixteen standard English candles, or to contain more than twenty grains of sulphur or ten grains of ammonia per hundred cubic feet of gas, or any sulphuretted hydrogen, a fine of one hundred dollars shall be paid by such company to the city or town supplied by it. When during the test the consumption of gas varies from five feet per hour, or the candle from one hundred and twenty grains per hour, a proportionate correction shall be made for the candle power.

Sect. 2. This act shall take effect upon its passage. [Approved March 15, 1892.

[CHAP. 259, ACTS OF 1892.]

AN ACT REQUIRING CERTAIN RETURNS TO BE MADE TO THE BOARD
OF GAS AND ELECTRIC LIGHT COMMISSIONERS.

Be it enacted, etc., as follows:

- Section 1. Whenever any town, or the city council of any city, shall vote upon the acceptance of the provisions of section one of chapter three hundred and seventy of the acts of the year eighteen hundred and ninety-one, the clerk of such city or town shall forthwith forward to the board of gas and electric light commissioners a certified abstract of so much of the records of said city council or town as pertains to the acceptance of, or refusal to accept, the provisions of said section one.
- Sect. 2. Whenever in any city or town the votes contemplated by sections two or three of said chapter three hundred and seventy have been passed, and any subsequent votes are passed relative to establishing or purchasing a plant, or to reconstructing, extending or enlarging the same, or for the issue of bonds on account of the same, or concerning in any way the management or conduct thereof, or whenever any city or town shall adopt any ordinance or by-law concerning such plant, the clerk of said city or town shall within ten days after the passage of such vote, or the adoption of such ordinance or by-law, forward to the board of gas and electric light commissioners a certified copy of every such vote, by-law or ordinance.
- SECT. 3. Whenever any city or town engaged in the business of selling gas or electric light, or both, to persons or corporations, shall fix or change the price of such light, the manager of gas or electric light in such city or town shall send to the board of gas and electric light commissioners a certified copy of the notice announcing such price or change.
- SECT. 4. Whenever a clerk of a city or town, or the manager of gas or electric light, fails or neglects to comply with the provisions of this act he shall forfeit for each offence a sum not exceeding twenty-five dollars.
- SECT. 5. The provisions of this act and of section nine of said chapter three hundred and seventy, concerning books and accounts and returns, shall apply to any city or town authorized by special act to construct, purchase, lease, establish or maintain within its limits a plant for furnishing gas or electric light for municipal use or for the use of any of its inhabitants. [Approved May 6, 1892.

[CHAP. 263, ACTS OF 1892]

An Act relating to returns to be made to the board of gas and electric light commissioners.

Be it enacted, etc., as follows:

Section 1. Each gas or electric light company neglecting to make the annual return to the board of gas and electric light commissioners, as required by law, on or before the second Wednesday of September in any year, shall forfeit in each case for such neglect, as follows: for the first fifteen days or any portion thereof, five dollars a day; for the second fifteen days or any portion thereof, ten dollars a day; and for each and every day thereafter while such neglect shall continue, not exceeding fifteen dollars a day; and if any company unreasonably refuses or neglects to make such report or return it shall forfeit for every such refusal or neglect a sum not exceeding five hundred dollars.

SECT. 2. All forfeitures recovered under section one of this act shall be paid into the treasury of the Commonwealth and applied towards the payment of the expenses of said board of commissioners. [Approved May 6, 1892.

[CHAP. 274, ACTS OF 1892.]

An Act placing restrictions upon the erection of electric light wires.

Be it enacted, ctc., as follows:

Section 1. Section three of chapter three hundred and eightytwo of the acts of the year eighteen hundred and eighty-seven is hereby amended by striking out all after the word "in", in the second line of said section, and inserting in place thereof the following words: - the manufacture and sale of electric light, no other person, firm or corporation shall lay, erect, maintain or use, over or under the streets, lanes and highways of such city or town, any wires for use in conveying electricity for lighting, without the consent of the mayor and aldermen of such city, or selectmen of such town, after a public hearing and notice to all parties interested, - so as to read as follows: - Section 3. In any city or town in which a company is engaged in the manufacture and sale of electric light, no other person, firm or corporation shall lay, erect, maintain or use, over or under the streets, lanes and highways of such city or town, any wires for use in conveying electricity for lighting, without the consent of the mayor and aldermen of such city, or selectmen of such town, after a public hearing and notice to all parties interested.

SECT. 2. This act shall take effect upon its passage. [Approved May 6, 1892.

#### APPENDIX E.

## GENERAL INSTRUCTIONS REGARDING THE BOOKS AND ACCOUNTS TO BE KEPT BY TOWNS AND CITIES OWNING ELECTRIC LIGHT PLANTS.

[Adopted under the provisions of Chapter 370, Acts of 1891, and Chapter 259, Acts of 1892.]

The general books of the electric works shall consist of cash book, journal and ledger. Cash transactions may be carried through the journal or posted directly from the cash book into the ledger, at the option of the book-keeper.

Such supplementary books may be kept as shall be needed to give the information required in the annual returns.

#### ACCOUNTS.

The ledger accounts shall show: -

Cost of real estate.

Cost of steam plant.

Cost of electric plant.

Cost of lines and lamps.

Appropriations on account of the works and business.

Bonds issued.

Notes payable.

Notes receivable.

Reserved funds.

Depreciation funds.

Sinking funds.

Cash.

Interest.

Materials.

Shop (or jobbing) account.

All amounts receivable and payable on account of the works and business.

Income from all sources.

Expenses of every class.

Manufacturing account.

Profit and loss.

#### REAL ESTATE.

This account should be debited with the cost of the land and the buildings or other permanent structures thereon.

#### STEAM PLANT.

This account should be debited with the cost in place, ready for use, of the engines, boilers, shafting, belting and other appurtenances of the steam plant.

#### ELECTRIC PLANT.

This account should be debited with the cost in place, ready for use, of the dynamos, switch-boards, electric regulating and measuring devices affixed to the building, all wiring and other electric construction in the station.

#### ELECTRIC LINES.

This account should be debited with the cost of all materials and labor for construction of outside pole or underground lines, except where such construction is upon private property, for individual use exclusively.

#### ARC LAMPS.

The cost of all arc lamps owned by the town and the cost of the original installation of the same upon the street lines should be debited to this account.

#### INCANDESCENT TOWN LAMPS.

This account should be debited with the cost for incandescent lamps, fittings and labor thereon when originally installed upon the street lines and in the buildings owned and used by the town. This account must not include the cost of incandescent lamps for commercial or domestic lighting, or any expense for renewals or repairs of the lamps charged to this account.

#### INSIDE WIRING.

This account should be debited with the cost of labor and all materials used for all installations of lamps upon private property for private use, except where such cost is included in Shop (or Jobbing) account. No repairs or rearrangement of such installations should be charged to this account.

Where a town purchases an existing plant for a gross sum, each of the foregoing accounts must be opened and debited with a fair share of the total amount paid.

#### APPROPRIATION ACCOUNT.

Whenever an appropriation, to be included in the regular tax levy, is made by the town or city for new construction, it should be immediately credited to this account, and charged to Cash.

At the close of the fiscal year of the municipality if the unexpended balance of such appropriation must be covered back into the treasury for any purpose, or for any reason becomes then unavailable for the use of the electric works, such balance must be debited to this account and credited to Cash.

#### Bonds.

All bonds issued by the town or city on account of the construction or purchase of the works should be credited to this account. All amounts paid on account of such bonds will be debited to this account, so that the balance will always show the amount of bonds outstanding.

#### BOND APPROPRIATION.

Whenever an appropriation, to be included in the regular tax levy, is made specifically as a contribution to the electric sinking fund, or for the payment direct of any portion of the electric works bonds or notes, such appropriation, or any portion thereof, when used, must be credited to this account.

#### NOTES PAYABLE.

This account must include all temporary notes authorized by the town and issued for any purpose connected with the works.

#### SINKING FUND COMMISSION.

Whenever an appropriation, to be included in the regular tax levy, is made for a contribution to the sinking fund, such appropriation, when available, must be debited to this account; also the income from all investments of sinking funds and all sums paid by the electric works into the hands of the commissioners of sinking funds. When any portion of the indebtedness, on account of which the sinking fund was created, is paid, it must be credited to this account.

#### SINKING FUND ACCOUNT.

When any sum is reserved or set aside out of the profits for the benefit of the sinking fund, it must be debited to Profit and Loss and credited to this account.

#### DEPRECIATION FUND.

When it is desired to establish such a fund out of the profits of the business, any sums set aside for the purpose will be debited to Profit and Loss and credited to this account.

Whenever an appropriation, to be included in the regular tax levy, is made for extraordinary repairs, such appropriation must be credited to a special appropriation account and the cost of such repairs debited to Depreciation Fund account.

Any amounts charged off for reduced valuation of plant must be debited to profit and loss and credited to the proper construction accounts.

#### RESERVED FUND.

Any sums reserved or set aside out of profits as a reserve generally or for any purpose not embraced in the foregoing accounts must be debited to Profit and Loss and credited to this account.

#### CASH (OR TOWN TREASURY).

All appropriations included in the regular tax levy, except for sinking fund, must be debited to this account, and all unexpended balances of such appropriations, which at the close of the municipal year must be covered back into the town or city treasury, or for any reason become then unavailable, must be credited to this account and debited to the proper appropriation account.

#### INTEREST ACCOUNT.

This account should include, in detail, all interest paid or received on account of the works, directly or indirectly (except where interest on investments, as sinking funds, reserved funds, etc., is passed directly to such funds as an increase thereof). This account should be closed at the end of the year by transfer of totals to Profit and Loss account.

#### MATERIALS.

All wires, poles, are lamps, fittings and other supplies, except fuel, carbons, oil and waste, globes and incandescent lamps, should, when purchased, be charged to this account (which may be subdivided into several accounts if the book-keeper prefers). When any of the materials are used, the value thereof should be transferred to the debit of the particular account for which the same are used, and be credited to this account. When materials, either old or new, are sold, the proceeds should be credited to the account to which such materials stood charged when sold.

At the close of the year an inventory should be taken of materials on hand, and the amount thereof credited to this account and

carried forward to new account as an asset, and the balance of the account carried to Manufacturing account or to Profit and Loss.

Where supplies are purchased only as wanted for immediate use, the cost of the same may be charged directly to the account for which used, and no inventory be carried into the books at the closing of the accounts.

#### SHOP (OR JOBBING) ACCOUNT.

Where buildings are wired, fixtures put in or repaired, or other work done, to be paid for by customers, this account should be debited with the cost of all labor and materials used, and credited with all sums received from or charged to individuals for such work. The balance of the account should be transferred to Profit and Loss account.

No labor or material used in repairs of the electric plant should be charged to this account.

#### MANUFACTURING ACCOUNT.

At the close of the year the various expense accounts should be closed by transfer to the debit of this account, which is to be credited with the several items of income arising from the manufacture and sale of electric light and power. Whenever an appropriation, to be included in the regular tax levy, is made for the ordinary maintenance or operation of the plant, the entire appropriation in proper monthly instalments must be credited to this account. At the end of the fiscal year of the municipality any unexpended portion of such appropriation, not available for 'the purposes of the succeeding year, must be debited to this account. This account must be closed by the transfer of the balance to Profit and Loss.

#### PROFIT AND LOSS.

This account should show : --

Balance brought forward from previous year.

Balance of manufacturing account.

Interest paid.

Interest received.

Charges for reserved and depreciation funds.

Income from sinking funds invested.

Depreciation of plant.

Bond premiums.

Bond payments out of profits.

Items of income or expense not belonging to the operations of the current year.

Other items charged and credited, in detail.

Balance carried forward to next year.

Income from investments and reserved funds should also go tothe credit of Profit and Loss account, except when credited directly to such funds as an increase thereof.

#### BALANCE SHEET.

The annual balance sheet required by the commissioners must include, in the item of "unpaid bills," all debts incurred remaining unpaid at the end of the year. Any coupons due and not paid at the end of the year should also appear as a liability. The sheet must also include all income earned but not collected, and all other sums due the company at the end of the year.

A careful inventory must be taken of all materials and supplies on hand on the thirtieth day of June in every year, that being the date on which the statute requires the accounts to be closed.

#### INCOME ACCOUNTS.

#### Consumers' account: --

Should be debited (and manufacturing account be credited) at the end of each week, month or quarter, according as bills are rendered, with the aggregate amount of bills for electric light and power sold, and be credited, from time to time, with all sums received in settlement of such bills, so that the account shall always show the amount due for electricity supplied. When a discount for prompt payment is made, only the net rate should be entered in this account, and any excess eventually collected carried to a special account, or directly to manufacturing account.

#### Rent of motors and fixtures: -

This account should show all sums charged for the use of motors or fixtures belonging to the town or city and rented to consumers, but must not include any sums charged consumers for light or power. This account will be closed at the end of the year by transfer to manufacturing account.

#### Rent of meters: -

This account should show all sums charged for the use of meters belonging to the town or city and rented to consumers.

In order to readily and accurately answer the questions in the form adopted by the Board for the annual return, these accounts should be kept so as to show separately the amounts received from:—

Commercial arc lights.

Commercial incandescent lights.

Domestic incandescent lights.

Electric motors.

Rent of meters.

Rent of motors.

#### EXPENSE ACCOUNTS.

In order to correctly report the various items of expenses which will be called for in the annual return, they should be separated into the following accounts, viz.:—

- 1. Fuel.
- 2. Carbons.
- 3. Oil and waste.
- 4. Incandescent lamps.
- Globes.
- 6. Water.
- 7. Station wages.
- 8. Real estate repairs.
- 9. Steam plant repairs.
- 10. Electric plant repairs.
- 11. Repairs of lines and lamps.
- 12. Station tools and appliances.
- 13. Distribution wages.
- 14. Distribution tools and appliances.
- 15. General salaries.
- 16. Committee expenses.
- 17. General office expenses.
- 18. Rents.
- 19. Insurance.
- 20. Law expenses.
- 21 Claims.
- 22. Bad debts.
- 23. Incidentals.

The several expense accounts must be closed at the end of the year by transfer to debit of Manufacturing account.

Expense accounts are to be kept as follows, viz.: -

#### 1. Fuel: -

This account must be debited at the beginning of the year with the value of fuel on hand, and after that with the cost of all purchased, including freight and all other expenses incurred in the delivery of the same. At the close of the year the account must be credited with the value of the fuel on hand, so that the balance will represent the actual cost of fuel used.

#### 2. Carbons: -

This account must be debited at the beginning of the year with the value of all carbons on hand, and after that with the cost delivered at the station of all purchased, and be credited at the end of the year with the value of all on hand, so that the balance will represent the actual cost of carbons used during the year.

- 3. Oil and waste.
- 4. Incandescent lamps.
- 5. Globes: —

These accounts must be opened and kept in the manner prescribed for fuel and carbons.

Accounts 4 and 5 do not include any of the cost for original installation of street lamps.

#### 6. Water : -

To show the cost of water used during the year.

#### 7. Station wages: --

This account should include all wages for labor at the station except labor for repairs.

#### 8. Real estate repairs : -

To include all expenditures for materials and labor in the general repairs and maintenance of the real estate.

#### 9. Steam plant repairs: -

To include all expenditures for materials and labor in the general repairs and maintenance of the steam plant, including shafting and belting.

#### 10. Electric plant repairs: -

To include all expenditures for materials and labor in the general repairs and maintenance of the electrical plant at the station.

#### 11. Repairs of lines and lamps: -

To include all expenditures for materials and labor in the general repairs and maintenance of the lines and lamps outside of the station, but not to include anything for renewal of incandescent lamps.

#### 12. Station tools and appliances: -

This account should be debited at the beginning of the year with the value of all tools, apparatus, furniture and other movable appliances in use at the station and not included in the foregoing accounts; also with the cost of all purchased, and be closed and carried forward like fuel account.

#### 13. Distribution wages: —

To include all wages for the care of lights and meters, clerical labor in this department, and salary or commission for collector.

#### 14. Distribution tools and appliances: —

This account should include all tools and other appliances used in connection with the care, repairs and maintenance of the lines, meters, lamps and motors, and should be kept as required for station tools and appliances (12).

The cost of repairs and supplies for teams used by trimmers, inspectors or line men (except such portion as properly belongs to repairs of lines), should also be debited to this account. The cost of horses and wagons owned by the town or city and purchased or used solely or principally for the electric light business may be debited to this account, and should be carried forward at the closing of the books at their fair value.

If not included in this account, the cost of all such horses and wagons must be debited to a separate account, which, at the end of the year, after being credited with the fair value of those on hand, must be closed into Distribution tools and appliances account.

#### 15. General salaries: -

To include salaries of general superintendent or manager and of clerks and messengers not included in other accounts.

#### 16. Committee expenses: -

To include all travelling or other expenses and the compensation of all committees making investigation concerning electric lighting matters; also all fees paid auditors specifically for examination of accounts of the business.

#### 17. General office expenses: -

To include printing, postage, stationery and all other items of office expense pertaining to the electric business and not charged in the preceding accounts.

#### 18. Rents : -

To include rent of any real estate used in connection with the works or business and not owned by the town or city.

#### 19. Insurance: -

To include fire insurance on buildings, machinery, coal and other electric property; also boiler or other insurance.

#### 20. Law expenses: -

To include any expense in this direction incurred on account of the electric works.

#### 21. Claims . -

To include all sums paid in settlement of suits or claims against the town or city for injuries to persons or property on account of the plant or its operation.

#### 22. Bad debts: -

To include only overdue bills of the current year not likely to be paid, but not to include any sum as an estimate of what may prove bad in the future. Bad debts which have accrued in any year prior to that in which they are charged off should go directly to the debit of Profit and Loss.

#### 23. Incidentals: -

To include only such items as cannot be readily apportioned to other accounts.

#### APPENDIX F.

#### FORM ADOPTED FOR TOWN RETURNS.

#### Commonwealth of Massachusetts.

OFFICE OF THE BOARD OF GAS AND ELECTRIC LIGHT COMMISSIONERS,

No. 13 Beacon Street, Boston, June , 1892.

To the Selectmen and Managers of Electric Light in the Several Towns in this Commonwealth operating Electric Light Plants.

These blanks for the Annual Returns are sent in duplicate, one to be filled out, sworn to, and returned to this Board on or before September 14, 1892. On the other blank, a copy of the return should be made and retained by the selectmen or manager for future reference. The Returns are for the year ending June 30, 1892.

The Returns should be made in accordance with the General Instructions regarding books and accounts, and especial attention should be given to Expenses, Income and Balance Sheet, which must be an exact transcript from the books of the Company at the close of business June 30, 1892.

Read carefully the various explanatory foot-notes and General Instructions.

When, from any cause, it is not possible to answer any particular question, the space designed for the answer should be filled with a dash (——), to indicate that the question has not been overlooked.

Special attention is called to the legislation in regard to the Accounts and Returns, as printed on the third page of the cover.

Any inquiries, or other communications in relation to the Returns, should be addressed to this office.

Per order of the Board of Gas and Electric Light Commissioners.

WALTER S. ALLEN, Clerk.

What kind of wire is used?

Number of poles set in streets or public ways for electric light lines, Number of poles set elsewhere for the same purpose,

Materials used for poles,

What other means of supporting wires are used, and to what extent? Length, in feet, of streets or public ways occupied by overhead wires, Length, in feet, of underground conduit,

Length, in feet, of wire in the same,

Number of single arc lamps used,

Number of double arc lamps used,

Number of plain carbons used during the year,

Number of copper-coated carbons used during the year,

Number of customers using only arc lights.

Number of customers using only incandescent lights,

Number of customers using only incandescent lights off arc circuits,

Number of customers using both are and incandescent lights,

Number of meters in use by private consumers June 30, 1891, giving number of each size,

Number of meters in use by private consumers June 30, 1892, giving number of each size,

Number and size of lamps used at station,

How many ampere hours have been supplied during the year from alternating current dynamos?

How many ampere hours have been supplied during the year from dynamos of 110 volts potential?

How many ampere hours have been supplied during the year from dynamos (or generators) of \* volts potential?

Schedule of prices for commercial are lights,

Schedule of prices for commercial and domestic incandescent lights, Schedule of prices for electric power,

What changes have been made during the year in prices for lights, and when made?

What kinds of electric motors are used, and for what kinds of work are they employed?

Is current furnished for light during the day?

Is current furnished for operating street cars?

Does the town wire buildings? If so, on what terms?

On what terms does the town furnish incandescent lamps and renewals of the same?

Statement of coal and other fuel for year ending June 30, 1892: -

		On hand June 30, 1891.	Received during the Year.	Used during the Year.†	On hand June 30, 1892		
Coal, Other Fuel, .	:	Tons.	Tons.	Tons.	Tons.		

<sup>\*</sup> Please give number of volts potential on such machines.

<sup>†</sup> Should include shrinkage.

#### 1893.1 PUBLIC DOCUMENT—No. 35.

Average cost of same delivered at works,

Average number and wages of men employed, viz.:—

Number of Men.	How Employed.	Average Wages per Month.
	l	

What additions, alterations or improvements, not already stated, have been made to or in the electric plant during the year ending June 30, 1892?

What experiments or changes have been made during the year ending June 30, 1892, in the method of generating or distributing the electric light or in the management of the business?

What is the total amount expended for construction during the year ending June 30, 1892?

NAME AND POST-OFFICE ADDRESS OF SELECTMEN.

Manager of Electric Light.
Selectmen

#### COMMONWEALTH OF MASSACHUSETTS.

8.

1892.

Then personally appeared and severally made oath to the truth of the foregoing statement, by them subscribed, according to their best knowledge and belief.

Justice of the Peace.

## NINTH ANNUAL REPORT

OF

### THE BOARD

o**r** 

# FAS AND ELECTRIC LIGHT COMMISSIONERS

OF THE

Commonwealth of Massachusetts.

JANUARY, 1894.

BOSTON:
WRIGHT & POTTER PRINTING CO., STATE PRINTERS,
18 Post Office Square.
1894.

# Commonwealth of Massachusetts.

The Board of Gas and Electric Light Commissioners respectfully submits its Ninth Annual Report.

In November last Hon. James W. McDonald resigned from the Board. In August last Hon. Charles A. Towne retired from the Board, his term of service having expired.

There are now one hundred and thirty-four companies and individuals engaged in business under the supervision of the Board; twenty-four of these supply both gas and electric light, sixty-two only electric light and forty-eight only gas. The five towns furnish only electric light.

The corporate name of the Electric Light and Patent Flooring Company has been changed to Amesbury Electric Light, Heat and Power Company.

The plant of the Middleborough Gas and Electric Company has been purchased by the town of Middleborough.

The Berkshire Electric Light, Heat and Power Company has been organized.

The Brookline Gas Light Company has extended its mains and is supplying gas to the city and to consumers in certain parts of the city of Boston, including the whole of that part formerly Roxbury.

The Boston Gas Light Company and the Brookline Gas Light Company have during the year begun to supply water gas, and the Lowell Gas Light Company to supply water gas mixed with coal gas.

The plant of the Lexington Gas Light Company for generating electricity for light has been erected and the orders of the Board with reference thereto have been found to have been complied with.

The work of the Board, in making the computations for its report, is interfered with by the delay of certain companies in filing their reports. There were thirty delinquent companies this year, as against forty-five last. Of these twenty-one were filed in September; six in October; two in November; while that of one company has not been filed at all. The companies would help the Board if they would file their reports at as early dates as possible. There is no reason why all reports should not be in before the time limit fixed by law.

#### BAY STATE GAS COMPANY.

By the terms of the Statutes of 1893, chapter 474 (see appendix), the charter of the Bay State Gas Company of Massachusetts was annulled, unless the company should cause a certain obligation for \$4,500,000, dated March 11, 1885, and issued by said company as part consideration for a contract for the construction of its works, to be legally annulled and discharged and surrendered to the Commissioner of Corporations.

It was further provided that the company might, to secure the cancellation of this obligation, issue to its holders stock to an amount equal to the excess of the actual market value of the property of the company over \$500,000, not including any value for its franchise.

On the petition of the Bay State Gas Company to the Supreme Judicial Court, Messrs. George O. Shattuck, Thomas L. Livermore and Otis Kimball were appointed by the court commissioners to determine the value of this property, and after hearings, in which the city of Boston and the Bay State Gas Company were represented by counsel, they found on October 30 that the actual market value of the property was \$2,000,000.

The obligation was cancelled November 24, by the Mercantile Trust Company of New York, its holder, and after cancellation it was deposited in the office of the Commissioner of Corporations.

At a meeting of the stockholders of the Bay State Gas Company of Massachusetts, held on November 27, the capital of the gas company was increased to \$2,000,000, in accordance with the valuation of the commissioners.

The additional \$1,500,000 of stock was issued to the Mercantile Trust Company, trustee, the then holder of the \$4,500,000 obligation, to be held by it in trust for the holders of certain notes or bonds of the Bay State Gas Company of New Jersey under two trust deeds, the equity, after these holders are satisfied, belonging to the Bay State Gas Company of Delaware.

Effect of Reduction in the Price of Gas upon Consumers'
Bills.

The price of gas having been reduced by the different gas companies doing business in Boston, the mayor, on November 9, sent a message to the city council, from which the following extract is taken:—

Some question having arisen as to whether the citizens were receiving the full benefit of the reductions, I requested the City Engineer to enquire into the matter.

These reductions should effect a saving of half a million dollars yearly

in the gas bills of the fifty thousand gas consumers of this city.

The actual gas bills for the months of May, June, July and August, 1892, and for the corresponding four months of 1893, were procured for the following buildings, all situated in the territory formerly supplied by the Boston Gas Light Company exclusively, viz.:

American House,
Hotel Brunswick,
New England House,
Parker House,
Quincy House,
Revere House,
Tremont House,
United States Hotel,
The Vendome,
The Victoria,

Young Men's Christian Union, C. F. Hovey & Co., Jordan, Marsh & Co., Macullar, Parker & Co, United States Custom House, United States Post-Office, Young's Hotel, New York & New England passenger station.

It was found that the gas bills of these houses for the four months in 1892 amounted to \$17,820.99, while the bills for the corresponding period of 1893 were \$13,281.57; a reduction of \$4,539.42, or almost exactly twenty-five and a half per cent.

It thus appears that these particular consumers, whose experience may be assumed to have been representative of that of the people generally, received the full benefit of the reduction in the prices charged by the Boston Gas Light Company from \$1.30 to \$1 per thousand cubic feet.

The Board, deeming it advisable to make still further inquiries, asked the Boston Gas Light Company for the following information: One hundred and ninety-four names of possible consumers were selected at random by the Board, on different streets in the city, and the Boston Gas Light Company was requested to give the amount of their gas bills for the six months ending Feb. 1, 1894, and at the same time the gas bills of the same houses for the same period a year ago. Houses occupied by the same families during the two periods were selected.

The company promptly complied with this request. As almost all these accounts were quarterly accounts, it was obliged to take the six months ending Jan. 1, 1894, and compare them with the corresponding six months of the preceding year. In 28 cases the bills were found to be larger; in 144 cases, smaller. The aggregate of the 28 bills in the first period was \$1,143.48; in the second, \$1,359.16, — an increase of \$215.68. The aggregate of the 144 bills in the first period was \$6,345.37; in the second, \$4,620.71, — a decrease of \$1,724.66. (In a large number of cases, owing to the dwelling-houses being closed until fall, the company was obliged to take the period running from seven to nine months in making the comparison.)

A further test was made. This company has its territory divided into nine ledger districts, the division line being fixed so as to make the number of meters as nearly equal as possible. A list of bills of 135 customers, taking 15 from each district, was made by the book-keepers of the company, in pursuance of instructions to take out indiscriminately 15 accounts from each ledger district, and the bills of consumers of January, 1893-4, were compared. The aggregate of these bills for January, 1893, was 4,855,900 feet, sold for \$6,312.67; for January, 1894, 4,479,900 feet, for \$4,479.90. In the business part of the city there was a considerable decrease in the amount of gas consumed.

#### SPRINGFIELD PETITION.

This was an application by gas consumers in Springfield against the Springfield Gas Company. The hearings were given in Springfield and both parties were represented by counsel. It appeared that the Springfield Gas Company had been the only company engaged in the manufacture and supply of gas in that city since 1848, the date of its charter. But few facts were submitted beyond those contained in the published reports of the Board, but, in accordance with the request of the petitioners, an extended examination was made of the company's affairs as revealed by its records and accounts.

The features which it seemed most important to consider in fixing a fair price were the capitalization, the steam department, the present condition of the plant and recent profits.

In the year 1879, under the general authority granted by the Legislature, the company added to its other business the supply of steam for general distribution for heating stores and dwellings. For a considerable time afterward this branch of the business seems to have been unprofitable and a considerable amount of gas profits was used to maintain it. In the opinion of the Board such a condition ought not to exist; the money invested in the steam plant should look for its profits to the steam business alone, and this principle has been followed in fixing the price.

From an examination of the plant it is apparent that if the business of the company is to increase at its normal rate large sums must be expended in the near future for extraordinary repairs and extensions.

Throughout its history the company has been uniformly prosperous and until recent years to a greater degree than most others of its size within the State. The attention of the Board was particularly called to the capitalization of the company and the manner of its growth has been carefully studied. It appears that it has increased from time to time until from originally less than \$50,000 it has reached the sum of \$500,000; although the payment of this increase seems to have been made in cash and according to law, yet from the relation of various new issues of stock to the dividends declared it may be inferred that, directly or indirectly, a very large percentage has been paid for by the divided profits of the company. This is perhaps the most important feature for consideration in connection with a study of this case. The policy seems to have been to maintain the capital on a level with the con-

struction account by declaring dividends to the amount of its increase and issuing new stock for the same amount. It may be stated that when this was done no legal objection existed to such a course. All profits of the company, under ordinary conditions, as a matter of law, belong to the shareholders, and even when invested in plant may be divided among them if they see fit; but such a course is to-day generally recognized as against the best interests of a company and contrary to the spirit of existing legislation in this Commonwealth. By such a method the capital account inevitably becomes higher in proportion to the company's output than a sound and conservative policy can approve.

It is important to consider, however, that every dollar of the new capital issued in this manner in this company was represented by money actually put into the development of the plant and that the entire capital is fairly entitled to dividends, although at a lower rate than might be permissible under a different policy.

When gas reaches the consumer it is burdened with three obligations: first, its fair cost; second, a fair dividend on a reasonable amount of capital; and third, such excess as will give the company sufficient surplus to enable it to meet extraordinary accidents and conduct its business with the highest economy. The consumer is in duty bound to pay these charges. If he pays more and the company converts this excess into new capital, increasing it to a figure beyond the fair amount demanded by the business. the consumer is burdened with too high a price for the gas in the first instance and thereafter with a dividend charge upon his own contributions. A company which pursues this policy and to this extent fails to appreciate its obligations to its customers must sooner or later pay the penalty. The growth of the company's capital and its policy in reference thereto are recognized by this Board as facts which it is proper and necessary to consider in adjusting complaints by consumers.

In recent years the company's profits have not been extravagant, and a reduction in rates to the extent recommended can only be secured if the plant is to be maintained at its proper efficiency, either by a substantial increase of business or by a reduction in the dividends. If the latter becomes necessary, it will be for the 1894.7

reason, as suggested in a former case, that the injudicious conversion of profits or supposed profits into stock imposes in the end a certain loss upon consumers or future holders.

The Board recommended that from and after the first day of May, 1893, the net price of gas supplied by the Springfield Company should not exceed \$1.40 per thousand feet.

The vote upon this was passed by the Board on April 14, and April 24 the recommendation was adopted by the company.

#### EAST BOSTON PETITION.

This was an application by consumers of the East Boston Gas Company for a reduction in the price and an improvement in the quality of its gas.

The public hearings which the law requires were held at the office of the Board. The petitioners were represented by counsel and the company by its executive officers. But little attention was given at the hearing to the question of quality, as the particular contention of the parties seemed to be with respect to the price. The candle-power of the gas supplied by the company has been uniformly and without exception, as appears by the report of the State inspector, in excess of the limit fixed by the statute.

This company was established and began to supply gas in the year 1853, and has been the only company engaged in the business within its territory. Throughout its history it appears to have been managed with rigid economy and has never watered its stock. Its dividends have been regular, but the average dividend does not seem to have been unfairly large.

Very little criticism was made at the hearing of the company's management or its condition, but the attention of the Board was particularly directed to the size and character of the company's surplus, and opposition to such a surplus was shown by the petitioners.

It has been the policy of the company's management throughout its history to refrain from dividing among the stockholders the entire profits, as was undoubtedly their legal right, and to regularly lay aside a portion of them with the special view of creating this surplus; this policy, we believe, should be commended and

encouraged rather than condemned, since the history of the business shows that where other conditions are equal the lowest prices are afforded only by those companies that have systematically pursued it. So much of this surplus as is invested in plant or equipment gives strength to the corporation and aids in maintaining a low price, since the facilities of a company are increased thereby without a corresponding increase of capital demanding dividends. The surplus in this case amounts to not far from \$80,000, or about 35 per cent. of the capital of the company. A portion of this is invested in the plant and the personal property reasonably necessary for the conduct of its business. Something more than onehalf is invested in interest-bearing securities. It is possible that through improvements in the plant some slight reduction in the cost of gas may be made, but the grounds for any considerable reduction in price must rest in a measure upon what is a fair and proper treatment of this surplus. In this consideration it becomes an important and difficult question to determine the proper use to which these investments should be put, to discover what are the equitable interests of the stockholders and the public in them. and to determine how far and in what way the consumers may properly reap advantages for such accumulation. In view of all the relations existing between the two parties in interest the Board is unable to agree that it should be treated as the exclusive property of either. If the affairs of the corporation were to be wound up by proceedings for dissolution, this sum would unquestionably belong and be distributed ratably to the shareholders. They have to-day an undoubted legal right to convert these securities into cash and to divide the proceeds in the same manner as they would distribute any other portion of their profits. Such a course, however, would unquestionably be against the interests of the corporation and would probably prove fatal to its prosperity.

It does not appear that the prices charged by the East Boston Company during any period of its history have been notably higher than those of other companies of similar size; it may be even doubted whether they have yielded on the whole an average price so high for much of its history. Its output for street lighting has been a larger percentage of its entire consumption than in the case of most companies, and during a considerable period this part of its gas was supplied at the same price as that of its much larger neighbor in the main portion of the city of Boston.

From the public the company has received, without any consideration and at a time when it was probably not prepared to pay a consideration, a franchise which, although of doubtful value then, has proven since to be of the highest value to its owners. Very much of the company's profits has come from the natural growth of wealth and population in the territory which it supplies and to which its corporate management has directly contributed but a small share.

This surplus must, we believe, be regarded as the combined result of a wise corporate management and the contributions on the part of the public. It would seem that the company is under obligation to so use a surplus of this character that substantial advantages may accrue from it to the public, and such a course will bring added strength to the corporation itself.

From an examination of the works it is apparent that in the interest of the public there is an immediate demand for the investment in the plant of a portion of this surplus, and for a yet larger portion in the near future if the demands upon the company increase as in the past.

A reduction of price may generally be expected to secure an increased output. This expectation is not always realized, and companies are frequently unwilling to incur the risk of loss by allowing this expectation to be influential in fixing a price. But the surplus of this company may be regarded in the nature of an insurance fund against the chances of loss by such action in this case, and the Board therefore named a price somewhat lower than the figures of present cost and output might seem to warrant if they only were considered.

In view of all the facts the Board recommended that the net price of gas supplied by the East Boston Company from and after the first day of May, 1893, should be \$1.50 per thousand feet.

Notice of this recommendation was sent to the company and was adopted by them at the first meeting of the directors thereafter held. BOSTON, ROXBURY, SOUTH BOSTON AND DORCHESTER PETITIONS.

These were applications against the Roxbury, Dorchester and South Boston companies for a reduction in price by separate petitions from consumers in the districts of each company, and by the mayor of Boston against the same companies and against the Boston Gas Light Company, the latter petition being supplemented by that of a large number of private consumers. Two sets of hearings were given, as requested by the parties, and public advertisement of the same was made, as required by law.

To support their requests the petitioners relied chiefly upon the facts contained in the various returns filed with the Board as required by law, and upon the published reports of the Board itself. The petition of the mayor against the Boston Gas Light Company was by its terms based upon a special report made by this Board to the Legislature in 1892, which exhibited the relations of the Boston company to the allied companies and concluded with the statement that gas could be supplied by that company within its territory at a fair profit for \$1 per thousand feet to all consumers. At the hearing the case was rested principally upon the facts and figures which that report contained. Although this was based upon a careful examination of the company's affairs, its representatives had not been heard in reference to the findings; the investigation was entirely ex parte, and could not fairly be regarded as conclusive against the corporation, nor could a price fixed by the Board be made binding upon the company without such further hearing as the statute requires. It constituted, however, a prima facie case in support of its conclusions. At the hearings an effort was made by the company to control in some measure the facts and conclusions of the report, but, in the opinion of the Board, without success. Nor did a careful examination of the returns made by the company after the date of the report furnish sufficient ground for a modification of its conclusions. The Board, therefore, fixed the price of gas supplied by the Boston company after May 1 at \$1 per thousand feet, in accordance with its former report and the request of the petitioners.

This petition contained a further request that a special and lower rate be fixed for gas supplied to the city of Boston in its corporate capacity, but this request was waived at the hearing and was not considered by the Board.

It is to be noted that the companies named, although having a common control, are yet distinct persons in law, making separate returns of their affairs, would stand as distinct corporations before the courts, and must be treated as such by this Board.

The South Boston company has numerous shareholders who have held their stock for years, and have but little interest in common with the present management.

The Dorchester company sustains in many respects an independent relation peculiar to itself.

The Board has always taken the position that companies which have received from the public as a free gift extensive and valuable privileges by the exercise of which alone their profits become possible, are bound to return to the public the most efficient service at the lowest prices consistent with a fair profit, and for this purpose to avail themselves of all reasonable facilities and expedients known to the business in which they are engaged. If by reason of superior skill in management, or by the existence of a common control in companies supplying contiguous territories, special economies become available, while the corporation which secures these results is entitled to a liberal reward, the public should also receive, as a matter of sound business policy, some share in the benefits thus made possible. Many advantages have resulted from the intimate relations between the companies under consideration, and some share of the possible benefits has already been received by their respective consumers in the reductions in price which all the companies under consideration have made under the present management. To enable the Dorchester and Roxbury companies to do this, they have purchased their gas wholly or in part from the Bay State or Boston companies, and if the present prices are to be maintained or lower prices reached, this policy must be continued. The works at Dorchester and Roxbury are not of a character to manufacture gas of the quality now distributed within their territories, nor of a capacity sufficient to supply the

demand; neither can they be equipped therefor without a large expenditure of money, which must either be provided out of income or additional capital, with the necessary added burden upon the consumer.

The works at South Boston have nearly or quite reached the limit of their capacity, and if the candle-power there is to be increased or the consumption largely developed and the lowest reasonable prices secured, it will be obliged in the near future to purchase at least a portion of its gas from some other company.

It remained to be considered whether a fair and reasonable share of the benefits available from the peculiar relations of the several companies named had been received by the consumers through the reductions already made in price. In the opinion of the Board, such has not been the case. By the introduction of improved methods and the intimate relations existing between the companies, although prices have been reduced, the combined profits have been increased to an amount beyond what seems to be the fair and reasonable share which the company should retain. These profits have been principally derived, however, from the territory occupied by the Boston company, and but a small percentage from the suburban companies. The proper reduction of these profits must therefore be secured principally from the reduction of the price charged by that company. Even though the suburban companies - the Roxbury, Dorchester and South Boston - should purchase all their gas of the same company and at the same price, it cannot be assumed that they would all be able thereby to supply their consumers at the same price or at as low a price as is fixed for the territory of Boston proper. The cost for distribution and for a fair dividend upon the capital employed must vary with the character of each company's territory, the density of its gas-consuming population and the relation of its output to its capital. In Boston proper nearly five times as much gas is consumed per mile of main as in any other of the areas mentioned, and to pay the same rate of dividend in the Roxbury company requires twice as much, and in the Dorchester and South Boston from three to three and a half times as much per thousand feet as in the Boston company.

These facts alone are sufficient to make it impossible for these suburban companies to supply their respective territories at the same price with each other or as low as the Boston company. A fair and low price which will also be uniform throughout the territory now included in the city of Boston can legally and reasonably be required only when that territory is supplied by a single corporation in law and in fact.

In addition to the cost of manufacture or a fair price for gas purchased and a fair cost for distribution, including management and taxes, the Board believed it necessary and advisable to add a fair allowance for depreciation, and extensions or improvements. Extraordinary demands for extensions may properly be met by the issue of new capital, but the ordinary demands which a progressive management desires and is bound to meet may fairly be provided for out of income when the price of gas is not made so high as to be burdensome. This is the course which has been pursued by the best managed companies in this State for a long term of years - by those in which the prices to-day are the lowest and has probably contributed more than any other single factor to make those low prices a possibility. A study of the history of the business will show that the benefits arising from the increase of population and output are most surely secured to the consumer by an adherence to this policy. By this the capital charge is kept low, and the relation of capital to output is perhaps the most important single factor bearing upon the cost of gas to the consumer. It proves advantageous to the public by making a low price possible, and to the shareholder by adding security to his investment. An increased consumption demands added facilities for manufacture and distribution, and if the share capital remains the same, the amount per thousand feet which consumers must pay for fair and reasonable dividends rapidly decreases.

The prices fixed assume, as indicated above, that these companies will continue to buy a part or all of their gas from the Bay State company of Massachusetts. The prices heretofore charged by this company have been in excess of what is essential to a fair profit, and have imposed an unjustifiable burden upon the community. This has been due largely to an effort to secure the interest charge on a bond or obligation of \$4,500,000 which is included in the liabilities of the company. It appeared that this obligation was given in payment of a contract which was never fully performed, and that the consideration actually received by the company therefor was much less than its face value. As the rate to be paid upon this bond is dependent upon the profits of the company, its effect upon the public interest is not essentially different from capital stock issued without consideration, and is wholly contrary to the policy of the State as indicated by its legislation. Such liabilities cannot be allowed to stand in the way of fair prices by dependent companies. The Board therefore endeavored in the prices named to allow to the Bay State company a fair return only upon the actual value of the investment in its business.

Upon the foregoing considerations and a careful examination of the affairs of the several companies as exhibited in their returns and accounts, with allowance for reasonable variations in the cost of labor and materials, the Board recommended that on and after the first day of July, A.D. 1893, the net price of gas supplied by the Roxbury company should not exceed \$1.20 per thousand feet; by the Dorchester company should not exceed \$1.30 per thousand feet; and by the South Boston company should not exceed \$1.30 per thousand feet.

These recommendations were adopted by the Boston company on April 22, and by the South Boston, Roxbury and Dorchester companies on June 19.

APPEALS OF THE BOSTON GAS LIGHT COMPANY, THE ROXBURY GAS LIGHT COMPANY AND THE BAY STATE GAS COMPANY.

In the matter of permits issued by the superintendent of streets of the city of Boston to the Brookline Gas Light Company:—

These applications were based on the action of the superintendent of streets of the city of Boston in issuing to the Brookline Gas Light Company permits to open certain streets in said city for the purpose of laying gas pipes.

The city of Boston, by the corporation counsel, and the Brookline Gas Light Company, by its counsel, appeared in opposition and moved the dismissal of the appeals on the ground that the facts relied upon by the appellants did not present a case within the jurisdiction of the Board.

The several applications were framed upon similar lines, the material averments being as follows:—

#### COMMONWEALTH OF MASSACHUSETTS.

To the Honorable Board of Gas and Electric Light Commissioners :-

Respectfully represents the Company, that it is a corporation established under the laws of said Commonwealth: that it was on the 27th day of February, A D. 1893, and has been since, a gas company existing and in active operation in the city of Boston in said Commonwealth, and that the mayor and aldermen of said city, assuming to act through the superintendent of streets thereof, on the 17th day of March, 1893, gave consent to the Brookline Gas Light Company to open street in said city. by a permit similar in form to the permit hereto annexed, for the purpose of laving gas pipes therein, and likewise, on the 27th day of February, 1893, gave consent to the said Brookline Gas Light Company to open the following streets in the city of Boston, namely: by a similar permit, for the purpose of laving gas pipes therein. And further represents that said consent in each and every instance was given unlawfully, without authority, and without a previous public hearing, or any notice thereof by publication or otherwise, and if valid, is unjust and greatly to the damage of said Boston Gas Light Company and the people of said city.

Wherefore, the said Company, being aggrieved by the granting of said consent, in each of the above instances, but saving all its rights and remedies in the premises, and without admitting the validity of said consents, appeals therefrom to your Honorable Board, and prays that its appeal may be sustained and said consent revoked in each instance.

Boston, March 20, 1893.

The Board derives its authority to adjudicate in relation to opening the streets for the purpose of laying gas pipes under sections 10 and 16, chapter 314, Acts of 1885, which are as follows:—

SECT. 10. In any city or town in which a gas company exists in active operation, no other gas company, nor any other persons, shall dig up and open the streets, lanes and highways of such city or town, for the purpose of laying gas pipes therein, without the consent of the mayor and aldermen or selectmen of such city or town, after a public hearing before said mayor and aldermen or selectmen and notice to all parties interested by publication or otherwise.

Sect. 16. Any gas company which, or any person who, is aggrieved by the decision of the mayor and aldermen or selectmen of a city or town under the provisions of the tenth section of this act may appeal therefrom to said board within thirty days from the notice of said decision, and said board shall thereupon give due notice and hear all the parties in interest and its decision thereupon shall be final.

[Jan.

The following facts in evidence have a material bearing upon the question whether the conditions essential to the application of these sections to the Brookline Gas Light Company concurred at the time of issuing said permits:—

The Brookline Gas Light Company was organized under chapter 17, Acts of the year 1853, and its powers were extended by chapter 104, Acts of 1854, chapter 151, Acts of 1860, and chapter 180, Acts of 1870.

The Boston Gas Light Company was organized under chapter 41, Acts of 1822, and by chapter 74, Acts of 1837, additional powers were conferred.

The Roxbury Gas Light Company was organized under chapter 198, Acts of 1852.

The Bay State Gas Company was organized in 1884, under general law.

The works of the Brookline Gas Light Company were originally established in the town of Brookline, where it continued to manufacture all its gas until April, 1893, when the old works were abandoned and the company moved to its present works on the banks of the Charles River, in the Brighton district. Said company, at the time of granting said permits, and prior to the passage of said chapter 314, occupied with its pipes and supplied gas to consumers in that part of Boston which was before its annexation the town of Brookline, and also in the Brighton district, and it maintained a gas pipe extending from its Brookline line across the sluiceway to a point on Charlesgate East, in Boston proper. The selectmen of the town of Brighton granted, Sept. 11, 1865, permission to the Brookline Gas Light Company to open the streets of that town for the purpose of laving its pipes. In 1873 the company, by request of the superintendent of lamps of the city of Boston, laid the pipe across the sluiceway above referred to, for the purpose of supplying gas to a city lamp located at the terminus of said pipe, and the company supplied gas to this lamp until Dec. 8, 1886, when the light was discontinued by the city. The pipe remained until taken up and replaced, by the Brookline company, by another pipe, in 1893.

In 1875 the city of Boston, pursuant to an order passed by the board of aldermen, February 8 in that year, contracted with the Brookline company to supply gas for public purposes in the section of the city traversed by its pipes. Feb. 27, 1893, the city of Boston entered into a contract with said company to furnish gas in the districts known as the city proper, Roxbury and Brighton. The Boston Gas Light Company, at the time of granting the said permits and prior to the passage of said chapter 314, maintained its pipes and supplied gas to customers in Boston proper.

In 1822 the board of aldermen of the city of Boston granted to Alexander Parus, who afterwards became one of the incorporators of the Boston Gas Light Company, permission to open the streets of Boston for the purpose of laying gas pipes. In 1854 the board of aldermen of the city of Roxbury granted permission to said company to open the streets of Roxbury and lay its pipes.

The Roxbury Gas Light Company, at the time of granting the permits appealed from and prior to the passage of said chapter 314, had its pipes laid and supplied gas to customers in the Roxbury district and in the city proper. In 1854 the board of aldermen of the city of Roxbury granted permission to the Roxbury company to open the streets and lay its pipes in that city.

In 1885, prior to the passage of said chapter 314, the board of aldermen of the city of Boston granted permission to the Bay State Gas Company to open the streets and lay its pipes in Boston.

At the time of granting the permits appealed from all said companies had their gas works and their pipes laid and supplied gas to customers within the territorial limits of the city of Boston. Prior to 1885 said pipes were laid without permits from the superintendent of streets of the city of Boston; since that time said pipes have been laid under permits issued by said superintendent.

The statement of the foregoing facts, with the several appeals, was submitted to the Attorney-General of the Commonwealth, who was requested to advise the Board whether under these facts sections 10 and 16 of chapter 314 of the Acts of 1885 applied to the appeals, so as to confer upon the Board authority to adjudicate upon the questions presented by them. The following is from the reply of the Attorney-General:—

<sup>&</sup>quot;The only right of appeal to your Board conferred by sections 10 and 16 is from the decision of the mayor and aldermen of a city, or selectmen of a town, after a public hearing before them. There has been in this case no

action of the mayor and aldermen of Boston and the action appealed from is that of the superintendent of streets. If the powers of the mayor and aldermen in such cases have been transferred by the charter of Boston to the superintendent of streets, as has been claimed, it may be that his action will support an appeal; but this is, in my opinion, doubtful, and it is clear that, taking the statute as it reads, there has been no such action as to form the foundation of an appeal.

"But apart from this, it appears to me, upon the facts stated, that the Brookline company must be considered as existing in active operation in the city of Boston, in the sense of the statute, at the time of its application for and the granting of the permits appealed from. If this view is correct it disposes of the question, as the requirement of a public hearing with the right of appeal does not apply to such a company."

Acting upon this opinion, the Board ordered that all the appeals be dismissed.

APPEAL OF THE WORCESTER ELECTRIC LIGHT COMPANY.

An appeal from an order of the board of mayor and aldermen of the city of Worcester, granting permission to the Quinsig-amond Electric Power and Light Company to erect poles and run wires for the purpose of supplying electric light within the limits of said city:—

As required by the statutes, a public hearing was given upon the appeal, and sessions of the Board for that purpose were held in the city of Worcester. The Quinsigamond Electric Power and Light Company and the Worcester Electric Light Company appeared by counsel, but neither the city nor any other parties were represented either to favor or oppose the appeal.

The Quinsigamond Electric Power and Light Company was organized on the twenty-fifth day of January, 1892, by three well-known citizens of Worcester, with a proposed capital of \$10,000. No portion of the capital had been paid in, but it was understood that if this appeal should be dismissed a plant which for some years had been used to supply electric power, and was owned by the same parties, would be transferred to the new corporation in lieu of a cash payment for stock. It appeared at the hearing that it was the purpose of the promoters of the enterprise to establish a plant upon the extreme eastern boundary of the city and about two miles from its centre, on the shore of Lake Quinsigamond, and from that point to supply lights throughout the city.

Since the year 1883 the city has been supplied with electric lights by the Worcester Electric Light Company. This corporation has established its station within a short distance of the principal mercantile and manufacturing section, and upon the shores of a pond of about five acres in extent. Its plant, which has been recently constructed, includes compound condensing engines of about 1,600 horse-power, and dynamos capable of supplying 820 high candle-power are lights and about 4,000 incandescents. It was actually supplying 675 are lights and 4,153 incandescents, and had about 135 miles of wire and 2,200 poles in the public streets at the time of the decision.

This appeal is made pursuant to the provisions of chapter 382 of the Acts of 1887, which requires the Board to hear all parties interested, and that its decision shall be final. From this it would seem to be the duty, as it has been the practice, of the Board to make such an appeal the subject of careful inquiry, as if it were a new case not previously heard elsewhere. This appears to have been expected by the aldermen, as from their records it would seem that but little time was given to the consideration of the application. It was apparently understood that, whatever their action, an appeal would be taken, and their course indicated that they believed the public interest demanded that their time and attention should be given to other pressing and perplexing questions, whose final settlement was wholly within their jurisdiction, rather than to this.

The parties interested in an application of this character are the general public, the consumers, and those who have invested or desire to invest their money. The number of companies which can conveniently engage in this business must be necessarily limited, owing to the nature of the work and the fact that its conduct involves an extensive use of the public streets for the poles and wires. These lines must necessarily be charged with dangerous currents of high intensity, and, in combination with wires for other purposes, are a constant menace to life and property wherever they exist. While above the highway they may offer serious obstruction to a successful contest with fires; and if underground they become, through necessity for the frequent opening of the streets,

a fruitful source of interference with travel. The sections where the greatest volume of trade and travel exist are sought first by all companies as the most profitable field for the business, with the result that wires become most numerous where they are the most likely to be troublesome and dangerous. Attempts to regulate or control the construction of these lines by official supervision have met with only limited success. There is a general public demand that such a use of the streets should be restricted, that the number of these wires should be kept at the minimum needed to properly supply the public needs, and that they should be multiplied only when some substantial advantage is to be acquired or the public convenience to be served thereby. For these reasons some probability should exist of either a saving of cost or an improvement of service to justify encumbering the streets with the poles and wires of another company.

In many respects the case under consideration differs from any which the Board has previously been called upon to consider.

At the hearings but few witnesses were introduced and but little evidence presented. The persons interested in the enterprise are respected residents of the city and are entitled to the most careful consideration. The capital mentioned in the charter is obviously too small to effect the purposes of the corporation, but it is as sumed that it may be increased to any needed amount.

Some of the witnesses expressed the opinion that the city afforded a fair field for two companies, but no facts or arguments were submitted in support of this view. It did not appear that these persons had given the question much consideration or had any particular knowledge of the business itself. They probably intended to express their individual belief that there was sufficient undeveloped business to support a second company with a fair profit, or that it would receive public support because it could give the consumers some advantages not now within their reach.

This comes very near assuming the whole case, and it would seem that those who take this view should be prepared to submit some facts or arguments upon which the opinion may be based, but none were attempted. The specific testimony presented at the hearing and the facts in the possession of the Board seem to oppose this view rather than to favor it.

There was no claim nor pretence made by the representatives of the new company that they would be able to supply lights for any less price or of any better quality than those of the existing company, or that in any particular respect the service would be improved. It did not appear that the present company had unreasonably failed or refused to supply any lights for which request had been made. The company, indeed, expressed its willingness and demonstrated its ability to supply both are and incandescent lights to any extent that might be desired, wherever the nature of the business would permit and at reasonable rates. No criticism of its prices or its service was offered. In the year 1890, in refusing to allow the consolidation of this company with the Worcester Gas Company, the Board referred to its plant and policy in the following terms:—

Every advantage in construction known to the best engineering skill seems to have been employed, and all its appliances rank with the best. It has just completed and equipped with a plant a building of ample size for all probable needs of the city for some years to come. Its affairs have been managed with strict economy. Its policy has been conservative and free from speculative features

The evidence as presented to the Board seems to afford no reasonable ground for the expectation that the proposed company could afford its lights for less than the existing company. The location suggested would undoubtedly enable it to manufacture the electricity at as low cost, but its greater distance from the centre of consumption would increase the cost of distribution. It does not possess and probably does not expect to acquire the exclusive control of any invention by which special saving in cost may be effected, and it cannot reasonably be expected to possess any higher technical or business talent than lies within the reach of the existing company.

It is the duty of the Board and its only purpose to secure to the people of Worcester, so far as it lies within its power, the best service at the lowest reasonable price. There is some reason to believe that the admission of the proposed company might seriously impede, perhaps wholly defeat, this object. It must be recognized that both companies are to be promoted and to be conducted for

the sake of profit, and that they will be governed by the same laws as other companies in similar business. The capital account of the existing company is low, and the amount required for a fair dividend is less than in most companies of its size and character. It is important to the consumers that this condition should be maintained, as no single item contributes more to the cost of lights than a proper charge for dividends. The present company can add 10,000 or 20,000 lights to its present output, with a much smaller investment of new capital than could possibly be done by a new company. The history of corporations doing an electric lighting and similar business in competition in various parts of the country affords strong ground for believing that a new company, if allowed to engage in business, would not long remain by itself, as competition for a period would probably be followed, as elsewhere, by consolidation or absorption. Whether or not such union would be for the public good, the companies would see a gain thereby, and no power rests in this Board or elsewhere, under existing laws, which could effectually prevent some form of consolidation. If the advantages incident to the growth of population and the development of business are to be secured and retained for the benefit of consumers, every reasonable effort must be made to prevent unnecessary development of the capital chargeable upon the business. But combinations and consolidations, as is well known, afford the opportunity and usually a temptation to stock development too great to be resisted. Such needless outlay should be avoided and saved, for when it has once been incurred or the money expended in an enterprise not required to supply the public wants, so great is the expectation of gain, and so persistent and unvielding the demands of capital for dividends, the remedy is not then easily found or applied, and the better policy avoids the evil at the outset by preventing the expenditure.

It may properly be noted that in the early history of electric lighting in this city an illustration was afforded of the results of an attempt by two interests to supply the light. The principal promoter of the new company was then engaged in the supply of electric light upon a small scale, and the business itself was new. Very soon after the advent of the existing company, he found it

for his interest to enter into an arrangement with them. For a portion of his plant and the good will of his business, and an agreement not again to enter it for a term of years, he received the sum of \$20,000, by far the greater portion of which was not for the plant. Every dollar of this amount the consumers of electric light in Worcester have been compelled to refund in the shape of higher charges for their lights. Is it desirable or wise that this course should be repeated, with a much larger amount involved?

The principal promoters of the new company are the owners of a large tract of land upon the shores of Lake Quinsigamond and of another tract midway between the lake and centre of the city, well adapted and partly occupied for manufacturing purposes. In the sections of the city where these tracts are located there is probably little or no other demand for electric lights. Situated upon the lake shore are numerous private residences and pleasure grounds which attract great numbers of people during the summer months. There is some demand there for lights for about three months in the year, and although this service is special in its character and perhaps unprofitable, it appeared that all the lights requested had been supplied there and at regular rates. In either of these locations if sufficient lights were desired it is not unlikely that some advantage could be gained by the construction of separate plants to supply them. Such a plant already exists in one of them. As they could probably be constructed and maintained in either place without crossing the highway, the permission of the mayor and aldermen for them would not be necessary, and they would not be affected by the decision in this case.

No request was made for a franchise limited or restricted in any way. It was particularly stated that such was not desired and would not be accepted. The grant from the aldermen contains no restrictions or limitations whatever. No authority exists in this Board to modify or in any way restrict the order upon which the appeal is based, but the appeal must be sustained or dismissed and the order affirmed or annulled without qualification.

If to sustain this appeal shall seem to secure to the existing company a monoply of the business, it must be remembered that it can only retain this as long as the public interest is best served thereby, and that such monoply is conditional and restricted. The company claims and exercises a general franchise throughout the city. It may be compelled to meet all reasonable demands. If it unreasonably fails or neglects to supply light when requested, this Board has power to compel such supply and has frequently exercised this authority in other localities. Consumers have a right to the lowest remunerative rates, and if they believe the prices charged are too high they can petition for a reduction, and the order of the Board as to price is binding upon the company. While the interests of the shareholders, present or prospective, ought not to be overlooked, the convenience, comfort and pecuniary benefit to the community are surely of the first importance.

For the reasons suggested, the Board deemed it unwise to grant the Quinsigamond Electric Power and Light Company the prayer of its petition. It was therefore ordered that the appeal be sustained and that the permission of the aldermen be revoked and annulled.

### BROOKLINE PETITIONS.

These were petitions by the selectmen of Brookline, and numerous consumers of the Brookline Gas Light Company, residing in Brookline and that part of Boston known as Brighton. Hearings were given at the office of the Board, and all the petitioners were represented by counsel. Few witnesses were presented by either side, and but little evidence offered, except such as was drawn from the public reports of the Board. It was understood, however, by all the parties, that in considering the application, the Board would make careful examination of the records and accounts of the company, and a thorough investigation of all its affairs. It appeared that the Brookline company began to supply gas in the town of Brookline in the year 1853. In 1854 it obtained an amendment of its charter allowing it to distribute gas in Brighton and in Boston, and some years later it began to lay its pipes in Brighton, and to supply gas to that town and its inhabitants. Portions of Brookline were annexed to Boston in 1870 and 1874, and the town of Brighton became Ward 25 of the city of Boston in 1873. The Brookline Gas Light Company has continued to supply gas within the entire territory formerly known as Brookline and Brighton, and has been the only company supplying gas within these boundaries, up to the present time.

In 1887, under chapter 385 of the Acts of that year, the company was authorized to supply electric light in the town of Brookline, and in that part of Boston formerly included in Brookline and Brighton. It entered at once upon the supply of such light, and has continued to be the only company supplying electric light in that territory up to the present time. Since September 30, 1889, the price of gas supplied by the company to ordinary consumers has been \$1.90 per thousand feet. On the twenty-seventh day of February, 1893, the company entered into a contract with the city of Boston, by the terms of which it undertook to supply after July 1st, within certain sections of the city, gas for street lights at 70 cents, and to private consumers at \$1.00, and in the Brighton district at \$1.25 for street lights and \$1.50 to private consumers. At the same time, the company voted to supply gas to private consumers in Brookline at \$1.50. Shortly after the terms of that contract were made public, the petitions of the selectmen and of consumers in Brighton were filed with this Board.

The works of the company have, for many years, been located near the eastern boundary of the thickly settled portion of the town of Brookline. Early in 1891 work was begun upon the erection of entirely new works at the north-eastern portion of what was formerly Brighton, on the Charles River, and about three miles from the former location. The works were completed and the manufacture of gas begun at the new location in April, 1892. The old works at Brookline have been dismantled and abandoned, and it is understood the company does not intend to again use them for gas purposes.

The electric lighting plant located at the old station has also been sold or removed, and a new plant for that purpose erected at the new gas works.

The petitioners urge that they should have gas at not more than \$1.00 per thousand feet, and base their claim to this upon the ground that the discrimination against them in the lower price made for Boston was both illegal and unjust; and, further, that

the price named in the Boston contract being a voluntary act of the officers of the company, was ample and conclusive evidence of its ability to supply gas at that rate, with a fair profit. Different rates by the same public corporation for a similar service always causes discontent among those least favored. The lines of demarkation are of necessity drawn arbitrarily rather than by any rule capable of logical demonstration and the grounds relied upon for their justification generally yield under the test of close examination. But little effort was made by the company to justify the discrimination in this case, except by an intimation that it was fairly based upon a difference in cost of distribution caused by the difference in density of the gas-consuming population. It is very doubtful if any such difference in cost could be shown to exist, and if any did appear, it would probably be found too small to have any appreciable effect upon the selling price of the gas. It would be a theoretical difference rather than a practical one. Certainly the difference in this case is too great to be justified upon such grounds, since it is more than three times the entire cost for distribution. A distinction of this character between customers has been generally regarded as contrary to a sound public policy and has never been employed except as a temporary expedient.

But while such discrimination may appear to be unjust, it is by no means clear that it is illegal, and it is not every case of discrimination that either this Board or the courts can interfere to prevent or adjust. A few years ago the Consolidated Gas Company of Baltimore undertook to supply the same quality of gas to consumers in one section at 50 cents per thousand feet, and in another at \$1.00. Upwards of seven thousand consumers united in an appeal to the courts to compel the company to supply them at the lower price, upon the same grounds as urged in this case. It appeared at the trial, that gas was being sold at the lower price at a loss, and that the higher price was not unreasonable. The court said that it had not the power, therefore, to require a sale at the lower price, and dismissed the petition.

There is no law to prohibit a company from selling gas at less than cost, or, perhaps, from giving it away, if it considers such course desirable, and no power lies with this Board to increase the price unless upon application of the company itself. Whether the Board can prevent this discrimination depends upon whether it has the power to reduce the price in the territory named to \$1.00 per thousand feet, — whether, in fact, the Brookline company can supply gas at \$1.00 per thousand feet, and pay a fair dividend upon the capital necessary for the business. Unless it can do this, no power exists, either in this Board or elsewhere, to compel it to supply it at that price. In the recent contest between the city of Cleveland and the Cleveland Gas Light and Coke Company, in the United States Court, it was held that when regulation makes the price so low as to make it impossible to pay a reasonable dividend it was but another name for confiscation, and a violation of the Constitution of the United States.

The Board cannot assume, merely because the company offers to supply gas under existing conditions in Boston at \$1.00 per thousand, that it can fairly afford to supply it at that price, either there or elsewhere. It would be as reasonable to assume that it could not afford to supply in Brighton at less than \$1.50, since that is the price named in the contract for that district. It is well understood that in the management of corporate enterprises at the present day, profits are often made by parties interested, in other ways than directly from the sale of their products in the open market. All the evidence in the possession of the Board tends to show that until the conditions shall be greatly changed the company cannot be legally required to supply gas in any portion of its territory for \$1.00 per thousand feet. All its accounts show that this price is less than cost, and would provide nothing for either interest or dividends.

The Board has considered its duty to be to ascertain, without reference to any of the prices named in the contract, at what price the company might fairly be required to supply gas within the territory of the petitioners. It was contended that this district should not be chargeable with the capital invested in the prosecution of the recent Boston contract, the electric light business of the company or in the property formerly used for the gas business, but now abandoned. This seemed to the Board to be a fair position and in harmony with its previous policy.

If the company sees fit to carry, for any length of time, real estate not suitable for the business of supplying gas, and which it never intends or expects to use for such business, it would seem fair that the burden of such ownership should be borne by the property itself, and not by the consumers of gas. It may well be claimed that the company is under obligation to its consumers, having disposed of such property, to apply the proceeds to a reduction of its capital. There seems to be no good reason why the surplus profits of the gas business should be used to support the electrical enterprise, or that gas consumers should, in any way, be asked to bear the burdens properly belonging to those who desire the luxury of the electric light.

It was admitted that the success of the supply of gas in Boston by this company was problematical, and that this feature of its business was purely speculative and its results uncertain. No pretence has ever been made that it would be profitable unless the company should succeed in so far dividing the business of this territory with the Boston company as to secure a consumption many times larger than its present output. The only fair inference to be drawn from the position of the company in this contract in respect to price is simply that the shareholders or a majority of them are willing to enter upon an experiment which they expect will, in some way that may not appear upon the face of the transaction, perhaps indirectly, become profitable to them.

Prior to entering upon the expenditure necessary under the Boston contract, the bond and share capital of the company was \$1,000,000. Deducting from this the investment in the electric business, and in the property abandoned, the capital employed is still high relative to the company's output; very much higher, indeed, than in the case of any other company within the Commonwealth with which it may fairly and properly be compared; higher with one or two exceptions, than any other dividend-paying company. The time available for the examination of this case has not been sufficient for such a study of the history and affairs of the company as will enable the Board to determine definitely how this condition has been reached. Apparently the company has been burdened through a considerable portion of its history by a lack of economy

in its management, since the prices charged for gas in the past seem to have been sufficient to provide a liberal profit. Several years ago the company acquired a portion of the land upon which their new works have been built and for a long time apparently it had been the intention to erect new works in that location; but when the time arrived for their construction, there were no funds whatever available for the purpose, and it was necessary to provide the entire cost out of new capital.

In view of these facts the company does not expect to pay and would not claim to be entitled to pay as large a dividend as those companies which have pursued a different and more conservative course with respect to development of their capital. Consumers have a right to claim that management shall be no less efficient and no more costly, and that the charges for improvements and profits shall be no larger in this company than in others that are similar and successful. Gas in the holder costs in this case but little if any more than in the best managed companies similarly situated in the State. It is doubtful whether this item can be appreciably reduced by the new apparatus now building at the company's works although the candle-power may be thereby increased. In other departments of the company's work the same closeness of expenditure and supervision does not seem to exist. The cost of leakage and for management is high, and in the interest of the corporation and of the consumers may well be reduced.

The price suggested is based upon these considerations, and in view of the entire history of the company seems fair and just to all concerned. The Board confidently believes that with the proper improvement possible in respect to management and leakage, and with the entire cost of the gas thereby reduced to the lowest point which can reasonably be demanded of the company, it will be able to earn a fair, though moderate dividend upon the capital actually invested for the supply of gas in Brookline and Brighton. The Board recommended that from and after the first day of October next the net price for gas supplied by the Brookline company should not exceed \$1.40 per thousand feet.

On August 3, notice of this recommendation was sent to the company, by whom it was adopted on August 12.

# CHELSEA PETITION.

This was a petition by the mayor of Chelsea and numerous consumers of the Chelsea Gas Light Company for an improvement in quality and a reduction in the price of gas to \$1.50 and in the price of electric light.

Public hearings were given to the parties interested, in the city hall in Chelsea. The petitioners and the company were represented by counsel.

After this petition was filed with the Board, but before the hearing was ordered, the company voted to reduce the price of incandescent electric light to one cent per lamp hour, and this price went into effect on the first day of July last. At the hearing the petitioners expressed themselves as generally satisfied with this, and waived their request for any further reduction in that department of the company's business.

Very much of the evidence submitted related to the quality of the gas. From the reports of the State inspector it appeared that the candle-power had been invariably above that required by the statute, and that for more than a year the company had in only a single instance failed to comply with the provisions of law respecting impurities. There was, nevertheless, much complaint of poor light, which seemed to be well founded. The testimony showed, however, that this did not exist through the city generally, but was confined to a limited area upon both sides of the mercantile portion of Broadway. The trouble was evidently a local one; a complaint of poor light rather than of poor gas. Early in the hearing the Board became satisfied that this was due to a lack of pressure in certain mains, the capacity of which was not sufficient for the territory which they were intended to supply. The company recognized this fact and before the hearing closed purchased for this section additional pipe, which has since been laid and is now in use. This new main is believed to be fully equal to all the demand likely to be made upon it. If the consumers within the territory referred to shall now fail to secure sufficient gas it will probably be found that the trouble is caused by defective piping or fixtures upon their own premises.

1894.7

In considering the request for a reduction in price of gas it was necessary to note that in answer to a former petition against this company the Board in 1891 fixed the price at \$1.80, and that this price went into effect July 1 of that year. The report accompanying the decision showed that this price was made after an exhaustive examination of the entire history and affairs of the company. The Board was then of the opinion that the cost for management and distribution, as well as the capital charge, might be reduced, and suggested to the company the necessity of improving its plant and the expediency of a temporary reduction in its rate of dividend. The price, in fact, was fixed at a point which was intended to compel the introduction of improvements in the works and economies in the management.

In this case the Board was asked to again examine the affairs of the company and determine whether, owing to new conditions or otherwise, another reduction might fairly be required. At the hearing the desire for this was strongly expressed, but very few facts or arguments were presented by the petitioners. The company protested, submitted its records and accounts, and urged that another reduction at this time would be neither reasonable nor just. The amount of output is a most important factor affecting the cost of gas to the company and the price to the consumer, and it seems neither fair nor just to demand the same prices for Chelsea as prevail where the output is from three to five times as great. It was urged by the petitioners that a lower price would secure a much larger output for the company. The same proposition was urged at the former hearing. As this is usually the rule, the Board seemed to be warranted in assuming that it would be the case in Chelsea. and this factor was influential in fixing the price after the former hearing. This expectation, however, has not been met in the case of this company. In the five years prior to July, 1893, the company had reduced the price of gas nearly twenty per cent., but the increase in output during the entire period was only two per cent. The last reduction went into effect on July 1, 1891, and the output for the year following was in fact less than for the preceding year. During the period named the profits steadily diminished, and for the year ending July 1, 1893, were about \$10,000 less than for

the year ending July 1, 1888. There is but one city in the State of similar size where the consumption of gas is so small, although in some of them the price is as high or higher. These facts are important and compel serious consideration. They afford strong ground for the company's position that the field which it occupies is governed by exceptional conditions. It is difficult for the Board to understand or account for this, and no attempt to explain it was made at the hearing. There was no criticism upon the attitude of the company toward its consumers, but the witnesses were agreed that it had been attentive to the complaints of its customers and courteous in its treatment of them.

In the performance of its duty to the petitioners, and in view of the earnestness of their request, the Board carefully examined the methods employed by the company. After a careful scrutiny of its accounts, it was satisfied that they correctly exhibited the company's transactions and condition. It was apparent that any reduction in the existing price could only be secured through some decrease in the cost of production or distribution of the gas. In the cost of distribution and management no extravagant expenditures for salaries or other items were included, and this department seems to be conducted in a legitimate and economical manner. There is no reason to believe that these items could be appreciably reduced by any change of management. The Board believed, however, that the cost of manufacture might be somewhat reduced by a closer and more intelligent attention to that portion of the business. It found that this had been increased by a percentage of leakage or lost gas, much greater, probably, than would be allowed under careful management. It was claimed by the company that much of this was due to the extraordinary interference with the company's pipes by the construction of sewers. If the loss be due to this fact, it is not likely to be repeated; and if it is due to lack of proper supervision, the burden of it should not be borne by the public. Included also in the cost of gas for the last year was a considerable sum for extraordinary repairs and improvements. No similar call is likely to occur in the immediate future. Some saving must, therefore, accrue from an improvement in these two features of the company's business, and this gain, although of necessity small, may properly accrue to the public.

The ratio of capital to output in the Chelsea company is much higher than in other companies of similar size in the State. This is largely attributable to the imprudent policy pursued by the company in former years in relation to the issuance of stock, as was pointed out in the report of this Board alluded to above. The over-capitalization resulting from this policy should not be permitted to operate as a medium of burdensome dividend charges; this may be obviated by a price which contemplates a low rate of dividend. The reduction proposed is based upon these considerations.

The Board recommended that on and after the first day of January, 1894, the price of gas supplied by the Chelsea Gas Light Company should not exceed \$1.65 per thousand feet.

### PETITION OF CHELSEA GAS LIGHT COMPANY.

This was a petition by the Chelsea Gas Light Company filed Dec. 1, 1893, for a revision of the action of the Board by which, on Nov. 10, 1893, it recommended that the price of gas supplied on and after Jan. 1, 1894, to the consumers of that company should not exceed \$1.65 per thousand cubic feet.

This petition was presented to the Board under the provision of chapter 350 of the Acts of 1888, and, as therein required, a public hearing was given, at which all the parties to the original petition were represented. The company, by the introduction of certain new evidence not presented at the previous hearing, sought such modification of the vote referred to as would permit it to offer to its customers a discount for prompt payment of bills and to charge a net rate higher than that in the vote of the commission.

As the question of permitting the allowance of such a discount is important, it seemed proper that the Board should hear fully all the evidence and arguments on the subject which the parties interested desired to present for its consideration. After such a hearing, the Board decided to permit the Chelsea Gas Light Company to offer a discount for prompt payment of bills, for the reason that it seems that such a discount operates to diminish the expense of administration. Every substantial saving, particularly in the case of a company doing a moderate business, is appreciably felt

in the cost of production of its gas, and the Board feels that the consumers should have the advantage of every reasonable economy. In practice, almost all the consumers avail themselves of net rates, and the amounts collected from those who pay gross rates is proportionately very small.

The price fixed in the former vote assumed that there would be no diminution in the company's output and no demand for extraordinary expenditures for repairs at the works, upon which considerable sums have recently been expended; but it appeared at the hearing that the condition of the distributing plant was such that large sums must soon be spent for its improvement. The company's recent loss by fire at the works, which has occurred since the last hearing, will also entail an increased expense for repairs.

Further new evidence was introduced that, owing to the reduction of the business of large manufacturing establishments since the former hearing, there has been a substantial decrease in the company's output of gas, and it is possible that such a condition may continue. It seemed clear from this new evidence and the figures presented that such a price would entail a further reduction in the rate of dividends, which has already been reduced by the company to five per cent.

Upon careful consideration of all the evidence the Board has considered that under the present conditions some modification of its former order is necessary to enable the company to pursue its business for the best interests of the community in which it is placed, and it was voted that the net price of gas supplied on and after Jan. 1, 1894, shall not exceed \$1.70 per one thousand cubic feet, if paid on or before the twenty-fifth day of the month in which the bill is presented.

The price of gas has since been fixed by the company in compliance with this vote.

### NORTH ANDOVER APPEAL.

This was an appeal of the Lawrence Gas Company from the decision of the selectmen of North Andover permitting the Merrimac Valley Horse Railroad Company to erect and maintain poles to operate its road by electricity and to maintain free of expense to the town incandescent lights on their poles for public lighting. This petition was filed Dec. 30, 1890. Neither party asked for a hearing, and Dec. 28, 1893, the chairman of the board of selectmen of North Andover informed the Board that no hearing would be required, as the decision of the selectmen had been withdrawn.

### MALDEN AND MELROSE PETITION.

This was a petition of more than twenty consumers of the Malden and Melrose Gas Light Company for a reduction in the price of gas, filed Aug. 9, 1893. On the 25th of September the directors of the company reduced the price of gas to \$1.90 per thousand feet, allowing a discount of 30 cents per thousand feet from this price if payment is made within twenty days of date of bill. The counsel for the petitioners then withdrew their petition, and a communication, in which they stated that they considered this to be a fair and equitable reduction, was received by the Board.

## MUNICIPAL OWNERSHIP.

Official reports relative to town action in the direction of the acquisition of gas or electric light plants to be owned by the town for municipal or commercial use have been received from all the towns and cities in the State whose population exceeds 1,500. These are 205 in number and it appears that in 181 of them the proposition has not been considered during the year. The towns of Lexington, Manchester, Middleborough and Stoneham and the cities of Cambridge, Lawrence, Medford and Newton have acted in reference to the question for the first time during the current year. On pages 38 and 39 is submitted a tabular statement which contains a summary of all action within the Commonwealth in relation to this subject up to the beginning of the year 1893.

[Jan.

The town of Braintree, on Jan. 11, 1893, voted yes 223, no 27, that the electric lighting committee appointed June 2, 1891, make such additions to the electric lighting plant "as will enable it to furnish electricity for the town buildings and for commercial and domestic uses." It was also voted to issue bonds to an amount not exceeding \$16,600 for this purpose, bonds to run for fifteen years from date, with interest at five per cent.; upon this the vote was, yes 134, no 14.

On March 13, 1893, it was voted to make this appropriation \$16,500, and the town treasurer was authorized to issue ten notes of the town instead of the bonds, as voted on January 11, these notes to be of the face value of \$1,650 each, and to run one, two, three, four, five, six, seven, eight, nine and ten years, respectively, bearing interest at the rate of not more than four per cent. per annum. The selectmen were instructed to raise by taxation each year the sum of \$1,650, together with a sum sufficient to pay the accrued interest on said notes remaining unpaid, until all said notes are liquidated. It was also voted to appropriate \$125 for the purpose of placing four more arc lamps or their equivalents in incandescents in such location as the selectmen may determine. Six arcs and eleven incandescents were located, 17,400 feet of wire run and 30 poles set, at an expense of \$666.32. The appropriation for maintenance and operation for the year ending Dec. 31, 1893, was \$5,000.

At a meeting on November 28 the selectmen were instructed to have the town hall wired for electric light and \$300 was appropriated therefor. At the same meeting it was voted "that the sum of \$1,300 and the receipts from electric lighting for the current year be appropriated for the purpose of connecting houses and stores to the electric light system." The rate of taxation for the year was \$16.80. The above appropriations for the commercial extension, amounting to \$19,053.29, were intended to be in addition to the \$30,853.85 previously expended.

The cost of operation from Oct. 15, 1892, to June 30, 1893, according to the return, was \$2,266.10, this amount including no charges for interest or depreciation. The number of lights oper-

ated was 80 twelve hundred candle-power arc and 77 twenty-five candle-power incandescent. These lamps were run 14 days in October, an average of 5.86 hours per day, and from November 1 to June 30 an average of 22 days per month and 6.12 hours per night.

The plant for domestic and commercial purposes was not completed until October 31, but an arrangement was made so that about thirty customers were supplied from July 1. The new plant consists of two alternating current dynamos with a capacity of 600 and 1,200 lights, respectively: 43 transformers and 62 meters: one engine of 125 horse-power and one boiler of 140 horse-power; 231 miles of wire are used. The total expenditure is given as \$19,950.54, including \$878.79 charged customers for expense of connecting them with the system and \$685.87 for materials not used. No rules and regulations have vet been printed. On January 1 the town was supplying seventy customers and had 1,500 sixteen-candle-power lamps connected; 62 of these are supplied by meter at the rate of six mills per sixteen-candle lamp hour. Eight customers pay from \$3.50 to \$5 per sixteen-candlepower lamp per year, according to contract. The receipts for commercial lights to December 31 were \$1,253.29.

In the city of *Brockton*, on Nov. 9, 1893, both branches of the city council by unanimous votes adopted the following:—

Resolved, That it is expedient for this city to exercise the authority conferred in section I of chapter 370 of the Acts of 1891, in relation to the construction, purchase, leasing or using and maintaining within its limits a plant for the manufacture and distribution of electricity, for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same.

This was approved by the mayor on November 13. A vote that it is expedient to exercise such authority passed both branches of the city council by unanimous vote in 1892. The question, "Is it expedient for this city to exercise the powers conferred in section 1 of chapter 370 of the Acts of 1891, entitled 'An Act to enable cities and towns to manufacture and distribute gas and electricity'?" was duly submitted to the voters at the annual municipal election in December and it appears from the records of such elec-

tion that upon this question there were 1,142 yes, 3,085 no, and 1,051 blank votes.

In the city of Cambridge, on April 11, 1893, a resolve "That it is expedient for the city of Cambridge to exercise the authority conferred in section 1 of chapter 370 of the Acts and Resolves of the year 1891, being 'An Act to enable cities and towns to manufacture and distribute gas and electricity," was referred to a joint special committee with instructions "to investigate the probable cost of electric lighting and report thereon." On November 21 the report of this committee was accepted, and, in accordance with its general tenor, the resolve was adopted in the common council by a vote of 18 to 0 and in the board of aldermen 10 to 0. It was approved by the mayor on November 23. In concluding its report the committee said: "If the question before the city council was for final action in the matter, we should feel it our duty to make yet more extended investigation at this time; but, as final action must be taken by the next city council, we do not deem it necessary." By an order adopted by both branches of the city council on December 26 and approved the following day, the mayor was authorized to request the Cambridge Electric Light Company and the Cambridge Gas Light Company, respectively, to file the schedules of their property and plant, as required by section 3, chapter 454, Acts of 1893.

In the board of aldermen of the city of Chicopee, on Nov. 22, 1893, an order was offered directing that the question of establishing an electric light plant by the city be submitted to the people at the ensuing municipal election, but the order failed of passage by a tie vote, one alderman and the mayor not voting. Both branches of the city council, in each of the years 1891 and 1892, had voted unanimously in favor of owning and maintaining an electric plant for municipal and commercial use.

At an adjourned session of the annual meeting of the town of Danvers, on April 27, 1893, upon further consideration of the report of the committee on commercial lighting, made in April, 1892, it was voted that no franchise to supply electricity be granted to the Danvers Electric Light Company or any other private electric light corporation, "but that the town would reserve to itself all

rights to furnish general electric light and power." The town then voted, 75 yes, 25 no, to appropriate \$11,000 for the enlargement of the present electric light plant for the purpose of commercial lighting. The effort to make this appropriation conditional upon "some assurance that nine hundred lights would be sold" and that "the annual rate per light should not be less than \$6.00," was defeated. The treasurer was authorized to issue twenty town notes of \$550 each, bearing interest at four per cent., and it was voted that "one of these notes be made due and payable next year and one each year thereafter until all are paid." The vote upon this proposition was 55 yes, 3 no. A committee of five was then authorized, in harmony with the foregoing votes, "to add to the present electric light plant for the purpose of street lighting and furnish light and power to any citizen on the line of the streets proposed and recommended by the committee at rates per light hereafter to be fixed, and that full authority to contract and bargain for said additional plant, to erect and place same and put in complete and full operation, keeping always within the appropriation voted by the town." The vote upon this was 54 yes, 0 no. In the report of the committee referred to it appears that such a plant as they had believed desirable would involve an expenditure of \$20,000, although one large enough to meet the present demand might be installed for \$15,000. The committee recommended also that the cost of wiring buildings should be borne by the customer, that lights should be supplied by meter, except that in some cases, such as stores, lights might be sold by the month or year.

The appropriation made for the year ending Feb. 1, 1894, for maintenance and operation was \$3,250. The total cost of the plant up to Feb. 1, 1893, had been \$16,555.68. The operating expenses for the year ending with that date were \$3,553.61. No interest or depreciation charges are included in this sum. During the year 78 lights were run 267 hours, on an average of 5.58 hours per night; 199½ tons of coal, 4½ cords of wood, 22,500 carbons, are reported as used during the year. The rate of taxation for the current fiscal year of the town is \$16.60 per thousand. The plant consists of two Brush dynamos, with a capacity of 90 are lights of 1,200 candle-power each; one 60 horse-power engine and

one 80 horse-power boiler. No additions have been made to the plant since the last report.

No definite action has been taken during the year in regard to installing a plant for commercial lighting. Estimates have been obtained as to cost, however, and a canvass of the town to determine, if possible, the number of lamps that may be taken is partially completed.

In the city of *Everett* both branches of the city government have adopted the following: —

Resolved, That it is expedient for the city of Everett to exercise the authority conferred in section 1 of chapter 370 of the Acts of the year 1891, entitled "An Act to enable cities and towns to manufacture and distribute gas and electricity."

The vote upon this in the common council Feb. 28, 1893, was yes 17, no 0; and in the board of aldermen on March 15, yes 5, no 1. It was approved by the mayor on March 18.

In the board of aldermen of the city of *Haverhill*, on Dec. 28, 1893, a vote that it is expedient for the city to exercise the authority conferred by section 1 of chapter 370 of the Acts of the year 1891 was adopted by 5 yes, 2 no, but was laid upon the table in the common council on December 30. This vote was in the same form as that passed unanimously by both branches in 1892.

In the town of *Hingham*, on March 13, 1893, it was voted, 305 yes, 21 no, "that it is expedient for the town to exercise the authority conferred by chapter 370, Acts of the year 1891." On July 26 the same vote was passed a second time, 114 yes, 43 no. Previous to the meeting of March 13 the committee appointed in 1892 reported in favor of the establishment of an electric light plant by the town and recommended the passage of the votes cited. A committee was appointed to construct a plant. The Weymouth Light and Power Company has pole lines in the town and supplies the town and private consumers with electric lights. Negotiations have been carried on by the committee and this company looking to the purchase of its poles, wires, fixtures, etc., within the town; these negotiations have not yet matured and no plant has yet been constructed.

In the city of Lawrence, by concurrent vote of both branches of the city council, a joint special committee was appointed "to inquire into the present system of electric lighting now in use in this and other cities of the Commonwealth with a view to ascertaining the cost of the same, also to inquire into the feasibility of establishing a municipal system of electric lighting, or to make such other recommendations as may be for the best interests of the city on the termination of the present contract." No report has been made by this committee.

In the town of *Lexington*, at the annual meeting on March 6, 1893, a committee was appointed to examine into the matter of a plant for municipal and commercial lighting and report with recommendations at the next annual town meeting.

In the town of Manchester, at the annual meeting in March, 1893, the subject-matter of a system of electric lighting for the town highways was referred to a committee to investigate and the sum of \$400 was appropriated for the use of the committee. No report has been made, but one is expected from the committee at the next annual town meeting.

The town of Marblehead, on April 3, 1893, appointed a committee to investigate respecting an electric light plant for municipal and commercial use. No report has been made by this committee.

Both branches of the city council of *Medford* have voted "that it is expedient that the city of Medford exercise the authority conferred upon cities by chapter 370 of the Acts of 1891 and under the limitations of said act construct, purchase, lease or establish and maintain within its limits one or more plants for the manufacture and distribution of gas or electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same, as by said act provided." This was adopted by the common council April 10, 1893, by vote of 16 yes, 1 no; and in the board of aldermen April 11; 6 yes, 0 no. It was approved by the mayor April 15. The mayor was also requested on April 17, by concurrent vote of both branches of the city government, "to petition the General Court for authority and permission for the city of Medford to provide and maintain a plant or system for municipal lighting."

The town of Middleborough, at a special meeting on March 25, 1893, voted, ves 252, no 97, "that it is expedient for said town to exercise the authority granted by chapter 370 of the Acts of the year 1891." The lighting committee was instructed "to confer with the party offering the Middleborough gas and electric plant for sale and ascertain the price of said plant, its condition and such other facts as they may be able, and report to the town at the second meeting if the first meeting should vote that it is expedient to purchase the plant." This committee reported that the entire plant of the company could be purchased for \$63,000 and recommended that the town take it at that price. They also reported in favor of an additional expenditure upon the plant of about \$7,500. The recommendations contained in the report of this committee, submitted in print at a special meeting on October 28, were accepted and it was voted, -601 yes, 116 no, - that it is "expedient for the town to purchase the property and plant of the Middleborough Gas and Electric Company for a sum not exceeding \$63,000." At the same meeting it was voted, 120 to 0, to appropriate \$75,000 for the purchase and equipment of this plant, and an issue of bonds was authorized for the sum of \$75,-000, all of said bonds to be dated Nov. 1, 1893, and to be payable according to the following schedule: -

\$1,000 in one year from date.
1,100 in two years.
1,200 in three years.
1,300 in four years.
1,400 in five years.
1,500 in six years.
1,600 in seven years.
1,700 in eight years.
1,200 in nine years.
1,200 in ten years.
2,100 in eleven years.
2,100 in eleven years.
2,200 in twelve years.
2,300 in thirteen years.
2,400 in fourteen years.
2,500 in fifteen years.

\$2,600 in sixteen years.
2,600 in seventeen years.
2,700 in eighteen years.
2,800 in nineteen years.
2,900 in twenty years.
3,000 in twenty-one years.
3,100 in twenty-two years.
3,200 in twenty-three years.
3,200 in twenty-four years.
3,400 in twenty-five years.
3,500 in twenty-six years.
3,600 in twenty-seix years.
3,700 in twenty-sight years.
3,700 in twenty-eight years.
3,900 in twenty-nine years.
5,300 in thirty years.

The first nine bonds, amounting to \$12,000, to be at a rate of interest not exceeding four and one-half per cent. per annum and the remaining bonds, amounting to \$63,000, at a rate not exceeding four per cent. per annum.

1894.7

A committee was appointed to negotiate with the company and to make purchase of its plant and property for not more than \$63,000. Authority was also given the committee "to carry into effect the recommendations contained in the report of the special committee on lighting, at an expense not to exceed the amount appropriated for equipping said plant." The vote upon the proposition to issue bonds was 101 to nothing, and upon the question of appointing a committee to purchase, 106 to nothing.

At a special meeting held on December 9 it was voted "to adopt, in place of the schedule of bonds provided to be issued by the vote of October 28, in payment for the purchase of the property and plant of the Middleborough Gas and Electric Company, the following schedule of bonds, and that the town treasurer be empowered to issue bonds in accordance therewith to the amount of \$75,000, to be signed by him and countersigned by the selectmen, of such denominations as they approve, bearing date Nov. 1, 1893, with interest payable semi-annually on the first days of May and November, all said bonds to bear interest at the rate of four per cent.:" \$1,000 to be due on November 1 in each of the years 1894, 1895, 1896, 1897, 1898; \$1,500 in each of the years 1899, 1900, 1901, 1902, 1903; \$2,000 in each of the years 1904, 1905, 1906, 1907, 1908; \$3,000 in each of the years 1909, 1910, 1911, 1912, 1913; \$3,500 in each of the years 1914, 1915, 1916, 1917, 1918; \$4,000 in each of the years 1919, 1920, 1921, 1922, 1923. Upon this the vote was: yes 12, no 0. It was also voted "that, for the purpose of extinguishing the municipal lighting bonds as they mature, the town hereby establishes a sinking fund, to which it will contribute the following sums each vear, viz.: \$1,000 each year from 1894 to 1898, inclusive: \$1,500 each year from 1899 to 1903, inclusive; \$2,000 each year from 1904 to 1908, inclusive; \$3,000 each year from 1909 to 1913, inclusive; \$3,500 each year from 1914 to 1918, inclusive; \$4,000 each year from 1919 to 1923, inclusive; the same to be paid from the income of the lighting department if sufficient, otherwise from the town taxes, and that provision for the payment of interest and the contributions to sinking funds shall be included in each annual assessment of taxes." On this the vote was: yes 14, no 0.

The committee appointed October 28 completed the purchase of the plant for the price named on December 15, and bonds have been issued to the amount of \$70,000. The work of putting the plant in the condition recommended by the original committee is in progress. The tax rate for the fiscal year ending Dec. 31, 1893, was \$15.50 per thousand.

In the town of Needham, on March 20, 1893, the selectmen were instructed to "contract with some company to light the streets with electricity, town to own poles and wires, expense not to exceed \$3,000 per year." On June 23 the selectmen made a verbal report and it was voted to adopt an incandescent system for street lighting. The sum of \$10,000 was appropriated, to be expended under the direction of the selectmen " for the purpose of constructing and establishing a plant for the distribution of electric light in the town." It was also voted to raise this money by an issue of bonds to the full amount, to be dated Sept. 1, 1893, bearing interest at four per cent. per annum, payable in thirty years and in denominations of \$1,000 or \$500, at the discretion of the selectmen. The town treasurer was also authorized to borrow money needed in anticipation of the issue of bonds, and commissioners of sinking fund were chosen. At a meeting on Sept. 15, \$3,500 additional was appropriated for the construction of the plant. Bonds to this amount were authorized, of the same date and tenor and to be issued in the same manner as those authorized at the former meeting. At this meeting the sum of \$300 was directed to be paid to the selectmen as "compensation in full for their extra services in the construction of a plant, the same to be charged to construction account, and the selectmen were authorized to further extend the electric lighting system. It was also voted that "the selectmen be authorized to grant the Eliot Falls Electric Light Company the right to supply the inhabitants of Needham with electric light for domestic and commercial purposes upon such terms and conditions as they shall determine, and that any income received by the town therefrom be applied to the running expenses of the electric lighting plant."

In accordance with the votes of the town, a distributing plant has been constructed, consisting of about 37 miles of wire, extend1894.7

ing over 20 miles of streets; 490 new poles have been used and 359 fire-alarm telegraph and telephone poles used; 300 twenty-five candle-power incandescent lamps are in use; \$14,095.65 have been expended for construction. The bonds authorized have not yet been issued, the money having been provided by temporary loans. A contract for a term of five years has been made with the Eliot Falls Electric Light Company to supply the electricity for the lights upon a moonlight schedule until 12.30 a.m. for \$1,870 per year for 240 lights and \$6 per year for every additional light. For this sum the company is to do all repairs and renew the lamps, the town furnishing the materials and the new lamps. The lights have been in use since November 6. The tax rate in the town for the last year was \$14.60 per thousand.

The city council of Newton, by an order approved Oct. 12, 1893, voted "that, in view of the expiration of the street lighting contract, the committee on fuel and street lighting is hereby requested and authorized to consider and report, with recommendations, at its earliest convenience, in print, upon the matter of establishing a plant for gas and electric lighting, to be owned and operated by the city." By an order approved Nov. 14, the council requested the mayor to petition the General Court for anthority to "establish, maintain and operate an electric light plant for lighting the streets, ways, parks, places and buildings of the city." The committee referred to in the order of Oct. 12 reported Nov. 27, recommending immediate action whereby the city might avail itself of all the privileges contained in chapter 370 of the Acts of 1891 and all amendatory acts. On the same date this report was accepted and it was unanimously voted by both branches of the city council "that the city council of the city of Newton do hereby determine and adjudicate that it is expedient for the city of Newton to exercise the authority conferred by chapter 370 of the Acts of the year 1891, entitled 'An Act to enable cities and towns to manufacture and distribute gas and electricity,' and all acts in amendment or in addition thereto." This was approved by the mayor on December 4.

In the town of North Attleborough, at a meeting on March 25, a committee of three was appointed with authority to construct an

electric light plant, "at an expense not to exceed \$50,000, to include the cost of the whole plant now in town." The sum of \$50,000 was appropriated for the purpose and the treasurer was authorized to borrow this amount. On April 22 the treasurer was authorized to issue bonds for \$50,000, to be known as the North Attleborough electric light loan, these bonds to run for thirty years, at four per cent. The North Attleborough Steam and Electric Company filed a schedule of its property, as provided by law, but the town plant is nearly completed and none of the plant of the private corporation has been used or bought.

From the return of the town of *Peabody* it appears that the total cost of plant to June 30, 1893, had been \$48,238.42. The appropriations made during the year for maintenance and operation were \$8,300 and for the sinking fund \$800. The total operating expenses for the year ending June 30 were reported as \$5,725.35; no interest or depreciation charges are included in this amount.

A description of the plant for street lighting is contained in the report of this Board for 1893. In September, 1892, the lights were run four days and from October 1 to June 30, 238 days, a total of 2,415\(^3\_4\) hours. In September, 1892, 136 lamps were in use; in October, 142; in November and December, 148; for the succeeding six months, 149, all of nominal 1,200 candle-power.

At an adjournment of the annual meeting on March 30, 1893, a committee was appointed to investigate and report on the subject of commercial lighting. At a meeting on June 13, in accordance with the recommendation of this committee, the town voted, — 105 yes, 1 no, — to "install an incandescent machine and apparatus in connection with the present plant, to consist of one 1,000-light alternating machine, with all necessary station apparatus, also for suitable meters and transformers," and for wires to extend through certain of the principal streets of the town. For this purpose \$5,500 was appropriated. In the report of the committee it was stated that it had "cost the town the last year to light the town-house, central engine house and pumping station \$841, besides the allowance for lighting the other engine houses." It was then voted to "wire the town hall, the pumping station and engine houses, except hose 5, and to furnish necessary and suitable lamps

and other apparatus therefor." For this \$1,200 was appropriated. It was further voted "that the town furnish wire to carry the current to the consumer, as the gas companies furnish pipes for gas, but that the consumer be required to furnish lamps and house wire." It was then voted that for the increased expense for running the plant, as enlarged for the balance of the municipal year, \$800 be appropriated. The \$8,300 above mentioned includes this sum.

To carry out the recommendations presented, a committee was appointed and notes of the town for \$6,700 were authorized, payable, \$1,000 per year for six years and the balance in seven years from date, the money for these notes to be included in the tax levy for each year. In accordance with this vote a plant has been secured and installed. It includes one Westinghouse alternating-current 1,200-light dynamo, about 14 miles of wire and 21 transformers. Fourteen meters are in use, two of these being in the town house and the central engine house. The town began to supply commercial lights on November 10. At the close of the calendar year it had installed about 800 sixteen-candle-power lights; about half of these were town lights; there were seventeen private consumers. The rates at which these lights are supplied will be found in the rules and regulations adopted by the selectmen, which are contained in an appendix to this report.

In the town of Reading, at the annual meeting on March 6, under an article "to see what action the town will take with regard to obtaining a plant for the manufacture and distribution of electricity for furnishing light for municipal use and for the use of its inhabitants, and how much money they will raise and appropriate for that purpose or what they will do in relation thereto," and an article "to see if the town will take any action for the purpose of securing control, by purchase or otherwise, of that part of the property of the Citizens' Gas Light Company of Reading, South Reading and Stoneham which is located within the limits of the town of Reading and supplying the town or its inhabitants with gas for municipal and commercial use," the subject-matter of both articles was referred to a committee to report at a future meeting. This committee has not yet reported. The committee

appointed in 1892 have submitted a printed report covering the points mentioned, but without specific recommendations. No action has been taken on this report.

In the city of Springfield, on January 23, 1893, the committee on lighting streets were instructed to investigate and report upon the expediency and advisability of the establishment of a municipal lighting plant. On December 26 the report of this committee was accepted, in which they stated as their opinion "that under the statutes, as they stand at present in this Commonwealth, it would not be expedient nor profitable for this city to engage in municipal lighting on its own account."

In the town of Stoneham, at a special meeting on December 5, the warrant included an article "to see if the town will vote to accept the provisions of section 1, chapter 370, of the Acts of 1891, entitled "An Act to enable cities and towns to manufacture and distribute gas and electricity." When this article was taken up it was voted that the subject-matter be inserted in the warrant for the annual meeting to be held in March, 1894.

In the town of Stoughton, on May 16, 1893, a committee was appointed "to take legal counsel as to certain points connected with the 'establishment of the plant for gas and electricity' and to report at a future meeting to be held in three weeks." This committee reported accordingly that they had been advised to the effect that the votes passed in 1892, contained in the last report of this Board, constituted a decision to establish a gas and electric plant for municipal and commercial uses; that the town was bound before establishing a "public plant" to purchase the plant of the Stoughton Gas and Electric Company, since said corporation had elected to sell the same and had filed the notice of such election. as the statute required; that since the town and company had been unable to agree upon the price to be paid and by reason of the fact that neither the company nor the town had applied to the court to determine the terms of the sale and the purchase, the company had lost its right to compel the town to buy, and the town had lost its right to proceed to establish such plant and could only exercise the same by commencing de novo and again passing the votes required under the statute. At a special meeting

on June 29 the town voted — 51 yes to 17 no — "that it is expedient for the town to exercise the authority conferred under section 1, chapter 370, of the Acts of 1891, to establish and maintain one or more plants for the manufacture and distribution of electricity or gas for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for the same, as is provided in said act."

In the town of Winchester the following article was inserted in the warrant for the meeting of March 6, 1893: "To see if the town will accept of the provisions of chapter 370 of the Acts of the year 1891, entitled 'An Act to enable cities and towns to manufacture and distribute electricity," and to pass any votes in connection therewith which may be deemed expedient." Under this article it was voted—yes 188, no 8—to accept the provisions of the act. At a meeting held June 15 the same article was inserted in the warrant, stating it to be for the second vote. This meeting adjourned to June 22, when the vote upon accepting the act was: yes 37, no 0. The electric light committee were instructed to make further investigations and report at a future meeting. This committee has not yet reported.

In the city of Woburn, on Nov. 14, 1893, both branches of the city council adopted unanimously the following:—

Be it resolved, That the city of Woburn exercise the authority conferred in chapter 370, Statutes of 1891, relative to establishing a municipal lighting plant.

This was approved by the mayor on November 15. No proposition was introduced into the city council looking to a submission of these votes for ratification at the annual municipal election. No schedule of its property has been demanded of either of the companies supplying light in the city, nor any filed by either, as the statute allows.

At the annual meeting of the town of Wellesley, held on March 6, 1893, the electric light committee appointed in 1892 submitted its report, from which it appeared that \$13,345.29 had been expended for the construction of the plant and that about \$500 more would be needed for its completion; that the contract had been concluded with the Eliot Falls Electric Light Company of Natick,

under which that company had agreed to furnish the current for \$6 per lamp per year, the contract to run for two years with the option in the town to renew the same for two years more at the same price. This committee was continued and the matter of the extension of the electric lights was referred to it with instructions to report at some future meeting as to the best methods to be pursued. At a special meeting on October 23, under an article "to see if the town will authorize the selectmen to grant the Eliot Falls Electric Company the right to use the town poles and supply the citizens with electric light for domestic and commercial purposes upon such terms and conditions as the selectmen shall determine, and to do and act anything respecting the same," it was voted "that the selectmen be instructed to apply to the next Legislature for an act under which the town of Wellesley may safely contract with an electric light company to furnish electric light for domestic and commercial lighting in said town for a term of years."

A description of the town plant was included in the last report of this Board. The appropriations during the year ending June 30, 1893, for maintenance and operation were \$3,500. The cost of running the plant, including amount paid for current, as appears by the return of the town, was \$3,604.40. No additions or alterations appear to have been made in the plant during the year. Three hundred and seventy-five 25 candle-power lights have been in use. These were first lighted on Dec. 13, 1892, and to June 30, 1893, had been run 160 days and a total of 933 hours. The tax rate in the town for the year ending Dec. 31, 1893, was \$11.00 per thousand.

#### VIOLATIONS OF LAW.

Notices have been sent to the Attorney-General, as required by the statutes, of violations of law in the following cases:—

By the Brookline Gas Light Company, a violation of section 4 of chapter 104 of the Acts of 1854, and of section 75 of chapter 106 of the Public Statutes, in proceeding to dig up the ground in the streets, lanes and highways of the city of Boston, for the purpose of laying gas pipes therein, without obtaining the consent in writing of the board of aldermen of said city.

The following, from the communication of the Board to the Attorney-General, will explain the facts and the law in this case, as found by the Board: —

"The Brookline Gas Light Company was incorporated by special act of the Legislature, being chapter 17 of the Acts of the year 1853. By the terms of that act the powers of the company were confined to the town of Brookline exclusively. By chapter 104 of the acts of 1854, in section 4, it is provided, referring to the Brookline Gas Light Company, that 'Said corporation, with the consent of the mayor and aldermen of the cities of Boston and Roxbury, respectively, shall have power and authority to open the ground in any part of the streets, lanes and highways in said cities for the purpose of sinking and repairing such pipes and conductors as it may be necessary to sink for the purpose aforesaid.' By the phrase 'purpose aforesaid' reference seems to be made to the provisions in section 2, which declares that 'Said corporations are hereby authorized to extend their pipes within the limits . . . of the cities of Boston and Roxbury and to sell gas on the line of such extension.' It is further stated in said section 4 that -

"The said company, after opening the ground in said streets, lanes and highways, shall be held to put the same again in repair under the penalty of being prosecuted as a nuisance: Provided, further, That said mayor and aldermen for the time being shall at all times have the power to regulate, restrict and control the acts and doings of said company which may in any manner affect the health, safety or the convenience of the inhabitants of said cities.

- "By section 75 of chapter 106 of the Public Statutes it is provided that —
- "Gaslight companies may, with the consent in writing of the mayor and aldermen of a city, dig up and open the grounds in any of the streets, lanes and highways thereof so far as is necessary to accomplish the objects of the corporation. They shall put all such streets, lanes and highways which are opened into as good repair as they were when opened, and upon failure so to do within a reasonable time shall be deemed guilty of a nuisance.
  - "By section 77 of the same chapter it is further provided that -
- "The mayor and aldermen of a place in which pipes or conductors of such a corporation are sunk may regulate, restrict and control all acts and doings of such corporation which may in any manner affect the health, safety, convenience or property of the inhabitants of such place.

- "By section 3 of the same chapter it is provided that -
- "All corporations established by special charters subsequently to the twenty-third day of February in the year eighteen hundred and thirty for the purpose of carrying on any kind of a manufacture shall be governed by the provisions and be subject to the liabilities prescribed in this chapter.
- "It appears that no consent in writing or other formal consent has been obtained by the Brookline Gas Light Company from the board of aldermen of the city of Boston at any time, or that any application has ever been made for such consent. The Brookline Gas Light Company, however, has laid and is proceeding to open and dig up the streets for the purpose of laying a large extent of pipes within the limits of the city of Boston. We understand that said company is pursuing this course under a claim that they have received permits therefor from the superintendent of streets of the city of Boston, and that such permits are issued under the ordinances and regulations of said city; and it therefore becomes necessary to examine said ordinances and regulations, for the purpose of ascertaining whether the same are sufficient to support the claim of the company; and whether, in fact or in law, the permits of the superintendent of streets issued under said ordinances and regulations are such a consent of the board of aldermen as the statute requires.
- "At a conference with the Board of the parties interested, it appeared that the company claimed to have received its permits under section 8 of chapter 36 of the Revised Ordinances of 1892 of the city of Boston. This section provides that 'Said superintendent' referring to the superintendent of streets 'may issue permits to persons having authority in the premises to open, occupy, obstruct and use portions of the streets, and every such permit shall specify the time, place,' etc. It is further provided in said section as to the conditions which shall be inserted in this permit. The regulation referred to and under which the claim was made is that contained in chapter 5, relative to streets and their uses, of the Revised Ordinances of 1892 of the board of aldermen of the city of Boston. Section 1 of this chapter provides that —

<sup>&</sup>quot;The superintendent of streets may issue permits for opening, occupying, obstructing and using portions of the public streets and for other purposes

in the manner and on the terms, specifications and conditions and for the purpose stated in the ordinance of the city, subject, however, to any permission, control, regulation, obstruction or revocation which the board of aldermen may make.

"Section 8, it will be observed, is general in its character, and must be subject in its construction to other sections of the same chapter wherever they fairly or necessarily apply thereto. It appears to us that whatever permits the superintendent of streets may issue under the ordinances of the city with respect to gas pipes must be issued, not under section 8 referred to above, but under section 14 of the same chapter, which provides that —

"Said superintendent shall, when authorized thereto by an order of the board of aldermen, issue permits to open and occupy portions of the streets for the purpose of laying, maintaining and using wires, railway tracks or rails therein, or wires, pipes or conduits under the surface thereof, on a condition the terms of which shall be those stated in section 8 of this chapter.

"Attention is called to the words ' persons having authority in the premises' in section 8, and to the words 'when authorized thereto by an order of the board of aldermen' in section 14. It would appear clearly that some authorization or order under one or the other of these sections in favor of the persons having rights in the premises was a condition precedent to the issuance by the superintendent of streets of the permits contemplated by these sections; but it is not pretended that any action has been taken or any order passed by the board of aldermen authorizing the issuance of permits from the superintendent of streets to the Brookline Gas Company for the carrying on of the purposes of its incorporation. For these reasons it appears to the Board that the permits referred to above as issued to the company by the superintendent of streets are not issued in the manner required by the ordinances; neither are they with the consent in writing of the board of aldermen which the statute requires. It seems to us to be clear from section 14, referred to, that the aldermen did not intend to allow streets to be opened and dug up for the purpose of laying new pipes or conduits for gas unless they took some formal action and passed some clear order respecting the same. It was claimed, however, that under the revision of the charter of the city of Boston, made by the Legislature in 1885, the consent required by the statutes above referred to has been taken from the board of aldermen of Boston; and it therefore becomes necessary to examine the statute under which this claim is made.

"By section 6 of chapter 266 of the Acts of 1885, being 'An Act to amend the charter of the city of Boston,' it is provided that —

"The executive powers now vested in the board of aldermen as such, as surveyors of the highways, etc., or otherwise, shall be and hereby are vested in the mayor, to be exercised through the several officers and boards of the city in their respective departments under his general supervision and control.

"This section proceeds to more specifically illustrate and describe the executive powers referred to, and it is made the duty of these officers, under the direction of the mayor, to make contracts for labor and materials in the construction and repair of all public works, to have the entire care, custody and management of the same, and of the city's property, and the direction and control of the executive and administrative business of the city. And the mayor is charged with securing 'the honest, efficient and economical conduct of the entire executive and administrative business of the city.'

"It will be observed that this statute transfers to the mayor only the executive powers of the board of aldermen. From the footnote on page 197 of the Revised Ordinances of 1885 (which note we understand is by the editor and compiler of the ordinance, and is a foot-note to the ordinance respecting the power of the superintendent of streets in reference to permits for opening the streets) it is recognized expressly that the general powers of the board of aldermen are not disturbed by the act of 1885, and that the ordinary judicial or legislative powers it formerly had remained vested in the board of aldermen subsequent to the enactment of that statute. In the opinion of the Board, the determination of the question as to whether the streets generally shall be dug up for the purposes of a gas corporation, such a consent as the statute requires is not an executive power, but one which is judicial in its character. Certainly the whole history of the exercise of this power has tended to the support of this proposition. It has been regarded as a broad and general question of public policy, and in many cases long and extended hearings have been held, with the testimony of many

witnesses, and the question to be determined has been whether the general public interest required that a company should receive the general admission to its streets such as the law contemplates. It will be observed that, under chapter 106, section 75, when this consent in writing is given it extends 'so far as is necessary to accomplish the objects of the corporation.' The question as to what is the full force and effect of this consent has not been specifically determined, as we understand it, in the courts of this Commonwealth, but similar language has received the construction of the courts in other States, and it has been held that after the consent is once granted it cannot be revoked; that it lasts during the life of the corporation, if the corporation sees fit to exercise it; and that, having once been given, it need not be repeated; in fact, that the corporation derives its powers to open and dig up the streets from the Legislature, but that the consent of the aldermen is the condition precedent to the exercise of that power, and that having once been given, the condition is fulfilled. On this point see the case of the City of Brooklyn vs. Jourdan, 7 Abbott, New Cases, 23; State of Ohio vs. Cincinnati Gas Light and Coke Co., 18 Ohio State, 262.

4 It would seem that this construction existed in the minds of the legislators when chapter 106, above referred to, was passed, since they have, in section 77, extended to the aldermen the power to, in every reasonable and needed respect, exercise full control so far as the public convenience should require of those streets in respect to which general powers were acquired by the consent contemplated by section 75. These broad statutes are similar in nearly all the States, and the powers of the city with respect to the kind of ordinance possible under such a statute were fully considered in the case of The Commissioners, etc., of Northern Liberty vs. Northern Liberty Gas Co., 12 Pennsylvania St., 318, where it was held that although the gas company might possess general authority to dig up the streets, yet that an ordinance which prohibited the opening of paved streets during the winter was valid and binding upon the company and within the general authority to do all things necessary for the preservation of the public convenience.

"Respecting the general powers of the board of aldermen, and as to what ones have passed to the mayor under the words "executive and administrative" in the statute of 1885, above referred to, reference is made to the case of the Attorney-General vs. Boston, in 142 Mass., 200, from which it appears that the right to declare whether the public necessity and convenience required the maintenance of a sidewalk on a portion of Boylston Street remained in the aldermen. We are not aware of any other case in which any effort has been made to construe that portion of that statute."

Notices have also been sent to the Attorney-General, as required by the statutes, of violations of law in the following cases:—

By the -

Amherst Gas Company; Bridgewater Electric Company: Cambridge Electric Light Company : Chicopee Electric Light Company: Chicopee Gas Works: Cottage City Gas and Electric Light Company; Easthampton Gas Company: Edison Electric Illuminating Company of Brockton; Eliot Falls Electric Light Company; Franklin Electric Light Company; Hull Electric Light and Power Company; Jamaica Plain Gas Light Company; Milton Light and Power Company; Millis Company; Nantucket Electric Light Company; Newburyport Gas and Electric Company; Northampton Electric Lighting Company; Northampton Gas Light Company; North Attleborough Steam and Electric Company; Orange Electric Light Company; Pittsfield Electric Company; Pittsfield Coal Gas Company; South Hadley Falls Electric Light Company; Stoughton Gas and Electric Company; Taunton Electric Lighting Company; Union Electric Light Company; Ware Electric Company; Weymouth Light and Power Company; Whitman Electric Company; Woburn Electric Light Company -

in not making returns to the Board within the time required by law.

By Alonzo W. Perry of Boston, in erecting wires, for use in conveying electricity for lighting, over Arch, Federal and South streets in Boston, without the consent of the board of aldermen. 1894.7

By the North Adams Gas Light Company and Salem Gas Light Company, in supplying gas containing sulphuretted hydrogen.

### ACCIDENTS.

In accordance with section 2, chapter 350, Acts of 1888, it is the duty of the Board to present herewith an abstract of cases wherein persons sustained bodily injury from gas and electricity manufactured and sold for light and fuel during the year 1893. The Board is but little helped in performing this duty by the reports which are required by law to be rendered to it by the various companies, as only a small percentage of the accidents seem to come to the knowledge of these companies.

The Board has received reports from the medical examiners of the State, from hospitals and other sources, of fifty-two accidents from illuminating gas in the State during the year. There were twenty-five deaths, all but two in Boston; ten in hotels, usually of an ordinary class; five in lodging-houses, and one in an institution. There were nineteen cases where escaping gas caused the death of one or more persons; of these fifteen were isolated cases. There was one case where two were found dead and a third recovered; there were two cases where two were found dead and one case where one was found dead and the other recovered. Three of the isolated cases were undoubtedly suicides, and there was an attempted double suicide, successful in the case of one of the parties. Nine of the isolated cases appeared to be accidental and three of the collective ones. In four of the isolated cases it was doubtful whether the turning on of the gas was intentional. Of the nine accidental isolated cases, four were probably due to ignorance, one to intemperance, one to bad gas fixtures, three to carelessness. Of the three collective accidental cases two were probably due to ignorance and one to carelessness. Fifteen of the fatal accidents occurred in hotels and lodging-houses.

Since April 30, 1890, when the State took off the limit of ten per cent. from the amount of carbonic oxide allowed in gas, the number of fatalities has increased alarmingly. In 1889 there were two deaths reported by this Board; in 1890, eight; in 1891, sixteen; in 1892, eighteen. It is noteworthy that many of these accidents from gas take place in lodging-houses and hotels of an ordinary class, frequented by people unacquainted with the use of illuminating gas. It seems advisable that the proprietors of hotels and lodging-houses should inspect their gas fixtures and that they should place in each room a conspicuous notice, warning guests of the danger of blowing out the gas or leaving it burning with a low flame.

## ACCIDENTS FROM GAS.

## Fatal Cases in Boston.

George Wilson of Rowley, aged 24, took a room at the Hotel Falmouth, on Causeway Street, on March 1. A strong smell of gas being observed, the door of his bedroom was broken in and the occupant found to be dead. The unlighted gas was turned on full force. His property was found intact beneath his pillow. In the opinion of Medical Examiner Harris, it was a case of accident to a man unfamiliar with the deadly nature of the gas and the proper method of extinguishing it.

At 7.10 P.M., March 9, 1893, Susan B. Warner registered at the Hampden House, Haymarket Square. She was observed by its proprietor to be somewhat under the influence of liquor. At 2.30 P.M., on the following day, the porter entered the room by the fire-escape and found the body lying on the floor, face downward. The gas was turned "full on."

A woman, a native of Malden, at the Columbus Hotel, Commercial and Prince streets, was found dead in bed on March 13. She had been asphyxiated, the gas having either been blown out or imperfectly turned off.

An unknown man was found in an unconscious state on March 13 at the Columbus Hotel, Commercial and Prince streets. He was occupying the same room with the above. He was taken to the City Hospital, where he died.

Wm. McMullen and wife of Pawtucket, R. I., who had been reduced from comfortable circumstances to barely enough to pay

1894.7

for the rent of their room, took lodging at the Bay State House, Hanover Street, on April 8. The next morning, with the gas turned on, both were found unconscious, and were then taken to the City Hospital, where the woman died at 9 A.M. The man recovered.

Otto Anderson, aged 24; Oscar Swenson, aged 24; Sophia Mobery, all of Boston, all Swedes and all unmarried, April 9, at house 36 Fleet Street. The three were employed in the saloon of Charles Williams and lived there, the two men sleeping in the room on one side of the kitchen and the woman in the room on the other side. At 10 o'clock A.M. the rooms were entered and Miss Mobery was found on the floor of her room, unconscious. Both men were dead in their room. The gas jet in this room was turned on half way. All three rooms were filled with gas. Miss Mobery recovered entirely from this accident.

John F. Gleason, aged 37, 28 Hanson Street, was found dead in bed at 8 a.m., May 12, 1893, undressed, in a natural position, door locked on inside. The room was full of gas and the key at the single bracket fixture was turned on; the key turned easily, and the supposition was that, having undressed and turned out the gas, he accidentally turned it on again, but was asleep before he noticed the odor of escaping gas. There seemed to be no motive for suicide.

Louise Preston, aged 30, 103 Falmouth Street, was found dead at 7.15 A.M., May 14, 1893, lying upon the floor of a room which she had occupied alone the previous night. The room was full of gas and the key of the fixture was turned on full. She had been mentally depressed for some time through dread of penury and had attempted suicide three times, once by shooting in the head, once by inhaling ether, and recently by inhaling illuminating gas.

James Graney of Willimantic, Ct., in a room at a lodging-house, 46 Beach Street, on July 13. The man hired the room the night before and retired in a sober condition. In the morning another inmate of the house smelled a strong odor of escaping gas. The locked door of the room was forced open and the occupant found undressed in bed, dead. The windows were closed, one key of the chandelier was turned on full and the other was partly turned on. There was little to show whether this was a case of suicide or accident.

Rachel Waas, aged 7, and Martha Lippold, aged 15, at 10 Kensington Street, Roxbury, on September 1. One was the daughter of the occupant of the house, the other was the nursery girl, who was engaged at an intelligence office the day before the accident. Mrs. Waas saw the two girls to bed and left the gas burning slightly; she shut the door. At 6 A.M. Mr Waas noticed a smell of gas and opening the door of the girls' room, found both lying dead on the floor.

Katrina Bingtzen, aged 51, 10 Willard Park, was brought to the City Hospital at 8.30 A.M., September 9, in the state of asphyxia. Stimulants and transfusion were resorted to, but she died on September 13. She was thought to have blown out the gas.

Mary Tuttle, aged 65, lodging at 342 Tremont Street, was found September 21, dead on her bed, door and window closed and gas turned on.

William F. Adair, aged 38, reported as very intemperate and drinking immoderately since September 16; admitted to Washingtonian Home, 7.30 p.m., Sept. 25, 1893. Nervous and shaky; seen at midnight apparently sleeping; attendant left door ajar and a small turned-down light at single gas fixture over head; windows partly open for ventilation. At 4 a.m. attendant found door shut tightly, room dark and full of gas; the key at gas fixture was turned on full, windows shut. Adair was dead when found.

David F. Williams, aged 56, a commercial traveller, went to bed at the Coolidge House, in Bowdoin Square, on September 27.

In the morning he was found dead in his bed and the gas turned on. There were some minor things in the case suggestive of suicide, especially his entire familiarity with gas and its handling; but, on the other hand, the stop-cock was so easily turned that it was entirely possible that after he had turned it he might have hit the key and turned it on, and he may have fallen asleep and been gradually poisoned to death in consequence of accident alone.

Adelard Le Blanc, aged 23, came to the hotel 200 Friend Street, on the night of September 30. In the morning he was found, after the room had been forcibly entered, lying on his bed, partly dressed, quite dead and the gas turned on unlighted.

Jose Francisco d'Oliveira, at the Hotel Eastern, 127 Causeway Street, on November 17. The man was found at 7 o'clock in the morning unconscious, and taken to the Massachusetts General Hospital, where he died on November 19.

J. M. Baxter, aged 55, at the Hampden House, Haymarket Square, December 21. The man was found dead in his bedroom, suffocated by gas.

John McLean of Quincy, aged 60, at the Hampden House, Hay-market Square, on December 21. Hired his room the night before. At 1 o'clock P.M. on the 21st he had not come down, and the chambermaid knocked on the door to arouse him. She received no answer. The door was broken in and Mr. McLean was found dead in bed. His clothes were on. The room was full of gas, which had escaped from the jet turned on.

Prudence Derrig, aged 85. Mrs. Derrig went to bed at 160 Center Street, Roxbury, between 11 and 12 p.m., December 23, 1893. The gas was lighted for her and turned down low, to be left for the night. The key was turned on about one-quarter. At 9.30 A.M., December 24, gas was smelt in the entry outside her room. Her chamber door (locked) was broken open

and she was found dead lying on floor. The room was full of gas, light was out at fixture, the key as it had been left. The presumption was that the gas was accidentally extinguished.

Conrad Highwood, aged 69, 95 Regent Street, Roxbury. Mr. Highwood had been sick for two years with paralysis, heart disease and insomnia. He slept alone and habitually left his gas burning with the key one-half on. At 7 A.M., December 29, his wife smelled gas in the hall outside his door; going in found him dead in bed in a natural posture. The room was full of gas, the key at fixture was turned half on as usual, and gas was escaping freely. There was no evidence of suicidal intent.

William Blackburne, aged 45, was found dead on the lounge in his room at 112 West Concord Street, where he had lived for the past two years. The gas was turned on; doors and windows closed. Mr. Blackburne had been very despondent since the death of his wife, which occurred in January. A letter found in his room showed suicide to have been premeditated.

#### Other Cases in Boston.

Lizzie Melrose, Annie Darling and Lizzie Darling, occupying a bedroom together at the Richwood Hotel, on January 2, retired for the night at 12.30. There was a defective key which was turned around so as to let the gas on again. At 8 o'clock the Misses Darling awakened, feeling badly, and Miss Melrose got up and fell unconscious. Physicians were summoned; Miss Melrose was unconscious until 1 o'clock in the afternoon and all three were kept walking in the corridor. The next day all three were well.

On February 1 two policemen were passing the store of George E. Allen, at 12 Winter Street, when they discovered a strong smell of gas escaping from the building. They notified Gas Inspectors C. A. Hamlin and John Griffin, at the office of the Boston Gas Company, and the two men entered the basement of the building through a window in an alley and succeeded in turning off the gas

at the meter. Before they could get out Griffin was overcome by the gas, and Hamlin shouted for help. The officers, who had been standing in the alley, heard his cries and went in and found him leaning over the unconscious body of his companion. Griffin was taken out and carried to the company's office, where he was resuscitated. The whole building and its contents were saturated with gas.

Henry Gowan, aged 30, a gasfitter, while repairing a leak in the gas pipe in the house 17 Cambridge Street, on the afternoon of March 4, was rendered unconscious by the escaping gas. He was found in this condition by a resident of the house. A physician was sent for and Gowan was taken home, where he recovered.

On November 14 a strong smell of gas was perceived in the building bounded by Pleasant Street, Shawmut Avenue and Cabot Place. The whole house was filled with gas. The names of those who were affected are: T. D. Monast, 56 Shawmut Avenue; Mrs. Monast, his mother; Lottie Ella Bates and Wilhelmina Bates, Mrs. William L. Tharby and Augustus Tharby of 52 Pleasant Street; Quong Lung, Lee Chung and Lee Sing, 60, and Wong Soo, 63½ Shawmut Avenue. The gas came from a broken street main. The mains of the Boston Gas Light Company and the Brookline Gas Light Company go down Shawmut Avenue.

On November 20, Frank Monahan, 30 years of age, 1485 Tremont Street, employed by the Brookline Gas Company, while making a connection with a street lamp on Mount Pleasant Avenue, Roxbury, was overcome by escaping gas and rendered unconscious. He was taken to the City Hospital, where he recovered.

A severe gas explosion occurred in the house owned by William Faunce, 475 Columbus Avenue, on November 31, by which several persons were injured, one probably fatally. Mr. Faunce, together with Mr. George H. Duncan and two gasfitters, went into the cellar in search of a gas leak. Mr. Faunce had with him a lighted

[Jan.

lantern, and when he reached the cellar an explosion took place. He was badly burned about the face, neck, hands and arms. Mr. Duncan was badly burned about the face. Fred Walters, a gasfitter, of 117 Northampton Street, was also badly burned about the face, and the sight of his left eye nearly destroyed. William Sperry, gasfitter, was slightly burned about the face. The damage to the building was slight. It was believed that the gas leaked from a main in the street.

John McCarthy of Roxbury, aged 51, employed at the store at 760 Washington Street, at 9 o'clock on the morning of December 2, smelt leaking gas and went to the basement to find where the leak was. He lighted a match when he got down to the basement and at the instant there was a loud explosion. He was badly burned about the face, arms and hands and was taken to the City Hospital, where he recovered.

One fatal case has been reported in Lowell and one in Worcester, both due to ignorance, and four other cases in places outside of Boston.

## Fatal Case in Lowell.

John Berg of South Chelmsford, at a room in the Franklin House, in Middlesex Street, December 3. On the night of December 2 he retired at 10.30 o'clock. At 10.30 o'clock the next morning the bedroom door was opened. The gas was turned three-quarters on, and Berg, who had blown it out, was lying unconscious on the bed. The room was small and the window closed. A physician was called and every effort made to save the man, but he stayed unconscious and died at 9 o'clock on the night of December 4. The doctors agree that the man died of heart failure, superinduced by excessive inhalation of illuminating gas; but they also agree that it is a most extraordinary thing for a person, especially one of such a healthy and rugged nature, to live for thirty-six hours and finally, without a perceptible change in his condition, die.

1894.7

#### Fatal Case in Worcester.

Nellie Powers, aged 17, was found unconscious on October 24, in the morning, in a room at 44 Front Street, Worcester, where she was employed as a domestic. She was lying on the bed and the gas was turned on full force. She went to bed in cheerful spirits. She had been in this country but six months and was unfamiliar with the use of gas. She was sent to the Worcester City Hospital, where she died two days after admission.

### Other Cases.

Joseph Goodreault and family, his wife, two children and grown son, Zeph Goodreault, were, during the night of November 22, nearly asphyxiated by illuminating gas in the house, 88 Loomis Street, Haverhill. They were awakened and saved themselves by opening the windows. The gas pipe in front of the house had broken during the night, and, the ground being frozen, the gas found its way into the house. All recovered.

Daniel Conners, a workman at the New Bedford Gas and Edison Light Company, was on the evening of December 10 engaged with the foreman and another man in stopping a leak in the condenser. Feeling that he was getting too much gas he came out of the condenser room and fell unconscious outside the door, bruising and cutting his face. He was brought to consciousness by being walked around by his fellow-workmen and resumed work that evening.

Asa T. Pratt, occupying a room at the house of George W. Norris on Hurd Street, in Lowell, retired on December 16, having turned the key in the gas jet so far around that the gas was turned on again. In the morning he was found insensible and was taken to St. John's Hospital, where he recovered the next day.

# ACCIDENTS FROM ELECTRICITY.

Five persons were injured by electricity from electric light wires, three of them fatally. The cases were as follows:

Stephen Willey, a patrolman of the Boston Electric Light Company, was found on the evening of July 18 in the yard of the New York & New England Railroad Company in an unconscious condition and was taken to the Emergency Hospital, where he died on the evening of the following day. It is supposed that he found some trouble with a lamp located near where he was found and that he had fallen from the pole. There were no witnesses as to the cause of the fall.

Thomas Wall, roofer, employed by Moore & Ward, Province Court, on Friday, August 25, while at work on the roof of the building 490 Washington Street, came in contact with a live electric light wire of high voltage and was killed.

Joseph Corcoran of Boston was, on January 8, running up Dorchester Street, South Boston, to catch a car, and when near the bridge which crosses the track of the Old Colony Railroad, ran against a wire which had been left suspended from one of the poles. He was knocked down and blood poured from his mouth and ears.

A boy of 14, named Timmins, on September 2, while at play on Somerville Avenue, near Medford Street, Somerville, tried to swing on a broken-down telephone wire that reached to the sidewalk. The telephone wire swung against a live wire and the boy received the shock. He fell unconscious, but was taken to a drug store, where he recovered.

George P. Goddard of Brockton was returning from Cary Hill with two companions. In crossing a bridge Goddard placed his hands on a high board fence to pull himself up to see what was behind the fence. Close to the top of the fence ran a live wire, attached to the boards, and the whole charge was received at once by him. He struggled to free himself, but the current was so strong that he was prevented. Each of his companions took hold of an arm and succeeded in releasing him, both receiving severe

shocks. Goddard's hands were burned in a terrible manner, necessitating the amputation of two fingers.

Richard Bates was walking in Watertown on the evening of September 7. The night was dark and rainy, and Bates, carrying an umbrella, walked into a telephone wire that had been detached from its pole and lay coiled up on the crossing. The telephone company reported to Medical Examiner Mead that this wire was crossed with an arc light wire at a distance of two miles from the place of accident. Bates lived about fifteen minutes.

# GAS COMPANIES.

The following table shows the corporate name, the localities supplied, the capital and the par value of the shares of the gas companies in active operation on the thirtieth day of June last:—

CORPORATE NAME.	Localities Supplied.	Capital.	Par Value.

	\$2,001,008 04	\$1,905,501 6
Leaving a surplus for the year of	\$312,198 14	\$429,886 0

Two 1 of the companies appear not to have earned expenses, and thirteen 2 others have not earned sufficient to warrant the declaration of any dividend.

The receipts for gas sold by meter show an apparent increase of \$131,184.75; but there has been a decrease of \$79,926.37 in the sales made by the Boston companies to one another, which makes the actual increase in sales to general consumers \$211,111.12. For the six years ending with June, 1892, the receipts from public lamps regularly decreased at the average rate of about \$28,000 per year. This year the decrease has been only \$467.91.

In the appendix will be found, under date of June 30, 1893, the separate balance sheets, profit and loss and manufacturing accounts of the gas companies, as taken from the annual returns, with corrections as made by the Board after examination and correspondence with the officers of the several companies.

<sup>1</sup> Three last year.

<sup>&</sup>lt;sup>2</sup> Sixteen last year.

Aggregates from these balance sheets and those in the returns of 1892 show the following facts:—

Lexington, .			:	13,213					\$16,679,182

Included in the above are certain companies which have electric light plants, and the following shows the assessed value of such wherever separately returned:—

Amherst,			\$5,500	Lynn,			\$165,500
Athol, .			5,500	Middleborough,			22,000
Beverly, .			34,900	New Bedford, .			203,700
Charlestown,			110,000	North Adams,			12,550
Chelsea, .			60,800	Southbridge, .			17,600
Clinton, .			60,800	Webster,			21,500
Holyoke,			160,000	Westfield, .			16,500
Lawrence,			90,000			_	
Lexington,			6,000	Total,			\$986,850

The value of the gas plants, as assessed by the local assessors, is then in round numbers \$15,400,000, as the electric plants of the Brookline, Chelsea, Cottage City, Easthampton, Fitchburg, Newburyport, Stoughton, Wakefield and Waltham companies are not given in the above table.

The following table shows the amount paid by each company for taxes after deducting the amounts belonging to the electrical departments and the amount for each thousand feet of gas sold:—

									\$282,244 39	

The total sum paid by the companies for taxes, including State Inspection, after apportioning to electric account that part of the gas companies' taxes belonging to their electrical departments, was \$282,244.39, an average of 6.6 cents per thousand feet of gas sold; being an increase over the previous year in the total amount of \$7,863.47, and a decrease of .2 cents per thousand feet sold.

DIVIDENDS.

# PRICE OF GAS.

The following companies have reduced the price of gas during the year ending June 30, 1893:—

Arlington,	Fall River,	Salem,
Bay State,	Gloucester,	Springfield,
Boston,	Jamaica Plain,	Waltham,
Cambridge,	Lawrence,	Ware (Otis Co.),
Charlestown,	Manufacturers' (Fall	Woburn,
Chicopee,	River),	Worcester.
East Boston.	Nantucket.	

The following pages show the price charged by the several companies, June 30, 1893; the average candle-power, as shown by the tests made by the State inspector of gas; and the average price, per thousand feet sold by meter, received in the two years ending June 30, 1893.

<sup>&</sup>lt;sup>2</sup> Extra dividend of 30 per cent.

Norwood,	Pittsfield, .	•	Plymouth,	Roxbury,	Salem,		South Boston, .	Southbridge,	)	Spencer, .	Springfield,	Stoughton,	Taunton, .	Waltham,	Ware,	Webster, .	Westfield,			Williamstown,			Woburn,	W OF CESTOR

The average price paid by consumers for coal gas, to the companies selling annually more than 30,000,000 feet each, is \$1.27 per thousand feet. If the Boston and Bay State companies be excluded the average is \$1.49. The average price received by the remainder of the coal-gas companies is \$1.94, making an average for all of \$1.32 per thousand. The average price for oil gas is \$3.74 per thousand feet.

The average price paid for coal gas in 1886 was \$1.72; in 1887, \$1.66; in 1888, \$1.56; in 1889, \$1.45; in 1890, \$1.39; in 1891, \$1.31; in 1892, \$1.38; and in 1893, \$1.27.

The following table shows the amount of gas made in the year ending June 30, 1893, and in the year ending June 30, 1892; the amount sold by meter and to public lamps in both these years; the amount used at works and offices, with the amount of gas unaccounted for during the year ending June 30, 1893, and the percentage of unaccounted-for gas in both years.

NOTE. — The terms "coal gas" and "coal-gas companies" whenever used in the report are intended, unless otherwise qualified, to include all the companies except those that make their gas entirely from oil distilled in closed retorts externally fired.

\* Used in water gas only. No enricher used.
 Used only in water gas apparatus and included in quantities given on page 100.
 Not including quantity used for water gas.
 Made wood gas for a portion of the year.

87519

The following tables show the materials and quantity of each used in the manufacture of water and oil gas, also the process used and the quantity of water gas made:

# STREET MAINS.

The returns by the various companies of their street mains are still somewhat deficient in detail. During the year forty-nine companies laid about sixty-two miles of mains, varying in the several cases from about two hundred feet to nearly seventeen miles.

The following table shows the lengths and sizes of the mains, as returned by the companies: —

Ase Year.	Incre Incre		515	750	,	,	2,287	4 000	9,200	3.260	84,128	14,255	4,727	000	0,000	1,400	266	200			1.228	12,070	1,268		1,314	6,617	2,536	1	2,640	680	5,257	17,900

# HIGH-POWER GAS LAMPS.

The following table shows the number of Lungren or other highpower gas lamps in use June 30, 1893:—

Adams,				67	Lowell,	•		20
Amesbury, .			•	6	Malden,		•	150
Athol,				6	Milford, .		•	120
Attleborough,				13	Natick,			4
Beverly,		•		12	New Bedford,			30
Brockton, .				109	Newburyport,			1
Cambridge, .				33	Newton, .	•	•	112
Citizens' (Quin	cy),			3	North Adams,			125
Clinton, .	•			14	Northampton,			22
Cottage City (				2,270	North Attlebor			31
Dedham, .		•		9	Pittsfield, .	•		16
East Boston, .				150	Plymouth, .			41
Fall River (W	elsba	ch),		486	Salem,			6
Fitchburg, .				7	Spencer, .			4
Framingham (	Wels	bach)		1,509	Springfield, .			6
Gloucester (Al	bo-ca	rbon)		150	Taunton, .	•		29
Greenfield, .		•	•	22	Waltham, .			10
Haverhill, .				198	Ware,			5
Holyoke, .				. 4	Westfield, .			25
_ •				188	Worcester, .			10

The companies reporting more than fifty gas-stoves in use on June 30, 1893, are as follows:—

Beverly, .					105	Malden, .						61
Chelsea, .			•	•	75	Natick, .						60

# PURITY OF GAS.

The law provides that when the gas of any company is found on three consecutive inspections to give less light than sixteen standard English candles, or to contain more than twenty grains of sulphur or ten grains of ammonia per hundred cubic feet of gas, or any sulphuretted hydrogen, a fine of one hundred dollars shall be paid by such company to the city or town supplied by it.

The following table shows the amount of impurities found on the dates stated, and the whole number of inspections during the year, of the gas of the several companies named, as reported to this Board by the State Inspector of Gas:—

Kind of Impurities.	СОМРА	NY.			Amount of Impurity.	Date when found.	Total Number of Inspections during the Year.
Deficient candle- power.	Danvers, North Adams, Salem, Westfield,	:	:		15.8 15.9 15.4 16.3	Mar. 25, Dec. 13, Oct. 28, Dec. 13,	2 4 8 3
Ammonia, grains per 100 cu. ft.	Chelsea, Citizens' (Quincy) Citizens' (Quincy), East Boston, East Boston, Greenfield, Holyoke, Holyoke, Jamaica Plain, Malden, Malden,				15.4 14.6 20.0 18.5 11.2 13.2 10.9 11.2 35.7 16.4 12.1 26.8	Dec. 30, Mar. 10, Oct. 13, Feb. 3, Apr. 12, Oct. 4, June 28, Aug. 9, July 28, July 28, Apr. 27, Mar. 10,	7 3 -9 -2 10 -9 8 -4
Sulphur, grains per 100 cu. ft.	Pittsfield,		•	•	21.4	Sept. 12,	4
Sulphuretted Hydrogen.	Amesbury,	•	:		Trace. " " " " " " " " " " " " " " " "	June 14, Nov. 4, Dec. 13, Feb. 2, Mar. 7, Apr. 14, Mar. 16, Nov. 23, Feb. 8, Nov. 24, Dec. 14,	3 4 8 - 3 - 16

Of the quantities of ammonia cited above the two at East Boston, Holyoke, Malden and Quincy were consecutive; as was also the case with the three instances of sulphuretted hydrogen at Salem and the two in Spencer and Springfield.

A study of the inspections of the coal-gas companies made during the five years from 1889 to 1893, inclusive, shows the following facts:—

							1589.	1899.	1801,	1502.	1802.

1894.7

The following show the aggregate results of the operation of the electric light central stations in the State for the year ending June 30, 1892, and for the year ending June 30, 1893:—

	YEAR ENDING JUNE 30.		
	1892.	1893.	
RECEIPTS.			
For light and power,	\$2,947,199 64 23,438 30	\$3,427,576 84 10,790 67	
Expenses.	\$2,970,637 94	\$3,438,367 51	
For manufacture,	\$1,156,320 69 386,084 45	\$1,376,946 15 463,535 46	
office expenses and management,	194,999 25 107,291 15	254,245 01 123,448 96	
miscellaneous,	170,707 32	161,076 59	
	\$2,015,402 86	\$2,379,252 17	
Leaving a balance of	<b>\$</b> 955,235 08	<b>\$</b> 1,059,115 34	
Of this profit, the gas companies made in their electrical departments,	189,225 74	188,139 90	
Leaving for the electric light companies,	\$766,009 34	\$870,975 44	
rents, jobbing, etc., amounting to	195,280 73	107,512 17	
Making a total of	<b>\$</b> 961,290 07	<b>\$</b> 978,487 61	
Interest,	\$195,094 15 323,581 00	\$220,175 43 434,328 00	
Depreciation.	210,168 79	214.729 89	
Sundry items,	32,227 49	104,086 47	
	<b>\$761,071 43</b>	\$983,319 79	
Leaving a surplus for the year of	\$200,218 64		
Leaving a deficit for the year of		\$4,832 18	

Six of the companies appear not to have earned expenses, and twenty-six others have not earned sufficient to warrant the declaration of any dividend.

Profits in the operation of the business have increased over the previous year by \$104,966.10, but interest charges and dividends have increased yet more, making a deficit when the entire transactions of all the companies for the year are considered.

In the appendix will be found, under date of June 30, 1893, the separate balance sheets, profit and loss and manufacturing accounts of the electric companies, as taken from the annual returns, with corrections as made by the Board after examination and correspondence with the officers of the several companies.

Aggregates from the balance sheets of the electric companies only, taken from the returns of 1892 and 1893, show the following facts:—

	June 30, 1892.	June 30, 1893.
Assets:—	.	
Construction accounts, including patent		
rights and franchises,	\$11,097,808 20	<b>\$13,030,611</b> <i>53</i>
Cash on hand,	419,639 53	238,539 80
Due for light and power,	238,708 79	301,233 79
Other accounts due,	68,026 85	135,323 15
Materials, etc.,	460,153 63	369,042 45
Notes receivable,	69,229 09	5,810 55

Cases pending before the Board Jan. 3, 1894.

In all the following cases the parties have been notified that by by agreement, or at the request of any party, each case will be set down for a hearing by the Board.

### CLASS A.

Including all cases pending more than one year, upon which no action has been taken or requested by any party thereto.

These cases will be considered as suspended, and will not be hereafter reported unless some party interested shall make a request for a hearing or some other final disposition of the case.

Appeal of the Braintree Electric Light Company from the decision of the selectmen of Braintree, granting permission to A. S. Morrison and others to run wires over certain streets in Braintree.

Appeals of the Randolph and Holbrook Electric Company, and of Edward H. Galligan and others, from the decision of the selectmen of Randolph, granting permission to the Randolph and Holbrook Light and Power Company to erect poles and wires in the streets of Randolph.

Appeal of the Bristol County Electric Company from the decision of the aldermen of Taunton, refusing to grant permission to said company to erect poles and wires in the streets of Taunton.

Appeals of the Boston Electric Light Company and the Edison Electric Illuminating Company from the decision of the aldermen of Boston, granting permission to certain parties to run wires over Summer Street.

Petition of the Natick Gas Light Company for authority to supply electric light.

Appeal of the Framingham Gas, Fuel and Power Company from the decision of the selectmen of Framingham, granting permission to the Framingham and Ashland Gas Light Company to lay pipes in the streets. 1894.7

Appeals of the Edison Electric Illuminating Company, and Boston Electric Light Company, from decision of aldermen of the city of Boston, granting to D. Webster King permission to run electric wires over certain streets in Boston.

Appeal of the Westborough Gas and Electric Company from the decision of the selectmen of Westborough, granting to Henry S. Jackson and others permission to lay gas mains and pipes in the streets of Westborough.

Appeals of the Boston Electric Light Company, and Edison Electric Illuminating Company, from the decision of the aldermen of Boston, granting to the Suburban Light and Power Company permission to maintain electric wires in the streets of Boston.

Petition of consumers of Citizens' Gas Light Company of Reading, South Reading and Stoneham for improvement in quality and reduction in price of gas supplied in Reading.

Petition of consumers of the Jamaica Plain Gas Light Company for improvement in quality and reduction in price of gas.

### CLASS B.

Including recent cases in which no action has been requested by either party.

Petition of consumers of the Haverhill Gas Light Company, for reduction in price of gas.

Petition of mayor of Worcester for reduction in price of gas supplied by Worcester Gas Light Company.

Petition of mayor of Cambridge for reduction of price of gas supplied by Cambridge Gas Light Company.

Appeal of Chelsea Gas Light Company from the decision of the aldermen of Chelsea, granting permission to the Champlin-Babson Electric Company to lay underground electric light wires in certain streets in the city of Chelsea.

Appeal of Cottage City Gas and Electric Company from the decision of the selectmen of Cottage City in granting permission to H. S. Kemp and others to construct, maintain and operate an electric plant in said town of Cottage City.

### CLASS C.

Including cases heard and decisions not rendered up to Jan. 3, 1894.

Petition of selectmen and consumers for reduction in price of gas supplied by the Arlington Gas Light Company.

Petition of mayor of Boston for reduction in price of gas supplied by the Charlestown Gas and Electric Company.

Petition of customers of Malden Electric Company for improvement in quality and reduction in price of electric light.

Petition of Edison Electric Illuminating Company of Boston for increase of capital stock.

JOHN T. WHEELWRIGHT, FORREST E. BARKER, MORRIS SCHAFF.

Jan. 3, 1894.

## APPENDIX B.

## [CHAP. 454, Acre or 1888.]

An Act relative to the Establishment of Municipal Gas and Electric Lighting Plants.

## Be it enacted, etc., as follows:

SECTION 1. In case of the purchase by a city or town, under and in pursuance of the provisions of chapter three hundred and seventy of the acts of the year eighteen hundred and ninety-one, of a gas or electric light plant, or both, having mains, poles, wires or other distributing apparatus, lying or being in any adjoining city or town, said purchasing city or town shall have the right at its election, if there be no other private company engaged in the same kind of lighting business in such adjoining city or town, to purchase the outlying mains, poles, wires and other distributing apparatus in any such adjoining city or town, in the manner and subject to the provisions specified in sections twelve, thirteen and fourteen of said chapter.

Section 2. Any city or town having acquired a main gas works or central electric lighting station, and having acquired, as hereinbefore provided, outlying plant, means of distribution or property, in an adjoining city or town, used for the supply or distribution from such works or station to said city or town or inhabitants thereof, of gas or electricity, may thereafter manufacture, sell, distribute and supply to said city or town or inhabitants thereof, gas, if such outlying plant be a gas plant, or electricity, if it be an electric light plant; and shall succeed to, have and enjoy in said city or town, the same rights and franchises respecting such sale and distribution and extensions of its plant as the person, firm or corporation selling such outlying plant would have had if such sale had not been made, and be subject to the same limitations and obligations in the use and exercise of such rights and franchises; and such adjoining city or town within the limits of which such

outlying plant is located shall, if it shall establish a gas or electric lighting plant of its own, under the provisions of said chapter three hundred and seventy, be held to purchase and shall purchase the plant and property owned by the other city or town and used for like purpose within its limits, under the provisions of sections twelve, thirteen and fourteen of said chapter, in like manner as if the same were the plant of a private person, firm or corporation: provided, further, that in such case the city or town owning such outlying plant or property shall have no right to refuse to sell the same to the city or town within the limits of which the same is located, when requested thereby, but shall, within thirty days after a demand therefor, filed with its clerk by the latter city or town, file with the clerk of the latter city or town a schedule of said property and plant located within the limits of the latter, as provided for in said section thirteen; and thereafter said city or town owning the same shall sell, and said city or town within the limits of which the same is located shall buy, the same, under the provisions of said sections twelve, thirteen and fourteen; and thereafter the rights of the selling city or town to maintain a gas or electric light plant, or to sell gas or electricity within the limits of the purchasing city or town, shall cease and determine as to the plant sold.

SECTION 3. When the first of the two votes provided for in section seven of this act shall have been passed in any city, or the first of the two votes provided for in section three of said chapter three hundred and seventy shall have been passed in any town, any person, firm or corporation owning a plant in such city or town, of the nature of that to be established if the city or town shall complete its decision, and desiring to retain the right to enforce the obligation of such city or town to purchase such plant, under section thirteen of said chapter, shall, within thirty days after written request therefor, authorized by the city council and made by the mayor, if such plant be in a city, or authorized and made by the selectmen, if in a town, make and file with the clerk of the city or town wherein the central lighting plant is located, a detailed statement of all the property and plant of such person, firm or corporation then existing, which such person, firm or corporation may propose to sell to such city or town if it shall

complete its decision to establish a plant, with the terms of sale proposed therefor. If any of said plant or property lies or is in an adjoining city or town which, under the terms of section one of this act, the city or town would after its said decision have the right to buy, a separate schedule of the plant or property in each adjoining city or town shall be filed as aforesaid, with the terms of sale proposed therefor: and such person, firm or corporation filing such schedule in a city shall, at all reasonable times thereafter, allow examinations of all the property scheduled or used in business in connection with the scheduled property, to the mayor thereof and any committee of the city council selected by him, with any experts deemed by him necessary to determine the value of such property. and submit to inspection such property when called for by said mayor; and the same examination and inspection shall be allowed to the selectmen of any town wherein such schedule is filed, and to such experts selected by them. The reasonable expenses of making such detailed statement or caused by such examination or inspection shall be paid by the city or town requesting the same.

Section 4. The city or town required by the party filing the schedule to make the purchase, as provided in section three of this act, may, at any time within sixty days after the filing thereof, by vote of its city council, in case of a city, or of its legal voters at a town meeting duly called for the purpose, in case of a town, decide as to the property in either city or town adjoining it which it shall have the right to buy under this act, as to whether it shall be included with the property concerning which the questions of purchase are to be decided, under said chapter three hundred and seventy, and, upon said vote, said city or town shall be under the same obligations and have the same rights as to the purchase of such outlying property as if the same were within its limits; but such vote shall not prejudice the right of the city or town voting to deny or resist its obligation under the law to purchase any property, except that it shall not refuse to buy the property concerning which it has so voted, on the ground that it is not within its own limits. If such city or town required to make the purchase shall not pass such vote within said sixty days, as to the outlying property in any adjoining city or town, its right to buy the same

shall be precluded and no obligation thereto shall accrue. Before the expiration of sixty days after the filing of said schedule no commissioner shall be appointed under the provisions of section thirteen of said chapter unless such vote has been passed, or it shall appear that the party filing the schedule owns no plant in an adjoining city or town which may be the subject of adjudication.

SECTION 5. Section twelve of said chapter three hundred and seventy is hereby amended by striking out in lines thirty-one to thirty-four of said section, inclusive, the words "the earning capacity of such plant based upon the actual earnings being derived from such use at the time of the final vote of such city or town to establish a plant and also," and inserting in line thirty-seven thereof, after the word "town," the words: - unless it shall refuse or neglect to purchase the same, - and striking out in lines fortyeight to fifty-five, inclusive, the words "when any capital has been paid in in property instead of in cash the valuation placed upon such property in estimating it as paid-in capital shall not be conclusive in estimating its value under the foregoing provisions. but may be disputed by a city or town, and if shown to have been excessive may be reduced by the authority fixing the price of the plant and property as hereinafter provided," and adding at the end of said section the words: - No city or town shall be obliged to buy any property added to a plant unnecessarily after the passage of its first vote that it is expedient to exercise the authority conferred in section one, nor any property except such as shall be suitable for the ordinary business of the vendor which the city or town may assume; and if any property or plant which the city or town shall be entitled or obliged to buy under this act will not be available to the city or town if purchased, by reason of liens, interests of third parties, private contracts or other cause, whereby the city or town purchasing would be at a disadvantage in the use of the same as compared with the vendor, the city or town may be released from buying the same, or a discount may be made from the price to be paid for the plant, as the commissioner or commissioners provided for in section thirteen shall determine to be equitable under the circumstances, - so as to read as follows: - Section 12. When any city or town shall decide as hereinbefore provided

to establish a plant, and any person, firm or corporation shall at the time of the first vote required for such decision be engaged in the business of making, generating or distributing gas or electricity for sale for lighting purposes in such city or town, such city or town shall, if such person, firm or corporation shall elect to sell and shall comply with the provisions of this act, purchase of such person, firm or corporation before establishing a public plant, such portion of his, their or its gas or electric plant and property suitable and used for such business in connection therewith, as lies within the limits of such city or town. If in such city or town a single corporation owns or operates both a gas plant and an electric plant, such purchase shall include both of such plants; but otherwise such city or town shall only be obliged to purchase the existing gas plant or plants if it has voted only to establish a gas plant, and shall only be obliged to purchase the existing electric plant or plants if it has only voted to establish an electric plant. If the main gas works, in the case of a gas plant, or the central lighting station, in the case of an electric light plant, lie within the limits of the city or town which has voted to establish a plant as aforesaid, such city or town shall purchase as herein provided the whole of such plant and property used in connection therewith lying within its limits, and the price to be paid therefor shall be its fair market value for the purposes of its use; no portion of such plant to be estimated however at less than its fair market value for any other purpose, including as an element of value any locations, or similar rights, acquired from private persons in connection therewith, plus the damages suffered by the severance of any portion of such plant lying outside of the limits of such city or town, unless it shall refuse or neglect to purchase the same, and minus the amount of any mortgage or other incumbrance or lien to which the plant so purchased, or any part thereof, may be subject at the time of transfer of title; but such city or town may require that such plant and property be transferred to it free and clear from any mortgage or lien, unless the commissioners appointed under the provisions of section thirteen of this act shall otherwise Such value shall be estimated without enhancement on account of future earning capacity, or good will, or of exclusive

privileges derived from rights in the public streets. If the main gas works or central lighting station of such a plant do not lie within the limits of the city or town which has voted as aforesaid. then such city or town shall only purchase that portion of such plant and property which lies within its limits, paying therefor upon the basis of value above established, but without allowance of damages on account of severance of plant. No city or town shall be obligated by this section to buy any apparatus or appliances covered by letters patent of the United States or embodying a patentable invention, unless a complete right to use the same and all other apparatus or appliances necessary for such use within the limits of such city or town, to such extent as such city or town shall reasonably require such right, shall be assigned or granted to such city or town at a cost as low as the cost of such right would be to the person, firm or corporation whose plant is purchased. No city or town shall be obliged to buy any property added to a plant unnecessarily after the passage of its first vote that it is expedient to exercise the authority conferred in section one, nor any property except such as shall be suitable for the ordinary business of the vendor which the city or town may assume; and if any property or plant which the city or town shall be entitled or obliged to buy under this act will not be available to the city or town if purchased, by reason of liens, interests of third parties, private contracts or other cause, whereby the city or town purchasing would be at a disadvantage in the use of the same as compared with the vendor, the city or town may be released from buying the same, or a discount may be made from the price to be paid for the plant, as the commissioner or commissioners provided for in section thirteen shall determine to be equitable under the circumstances.

SECTION 6. When any city or town shall acquire, under the provisions of this act or of said chapter, a plant theretofore used for the manufacture or distribution of gas or electricity for the purposes of heating or power, it may continue to use the same for such purposes.

SECTION 7. No city shall exercise the authority conferred in section one of said chapter until a vote that it is expedient to exercise such authority shall have passed each branch of its city

council by a two-thirds vote in each of two consecutive municipal years, and thereafter have been ratified by a majority of the voters present and voting thereon at an annual municipal election. When such a vote has failed to secure such ratification no similar vote shall be submitted for ratification until the expiration of three years thereafter. The mayor of any city shall have the power to veto any vote passed under authority of this act, but nothing in this act shall be construed to prevent the city council from passing any such vote, in the usual manner, over the veto of the mayor.

Section 8. Any city or town having established a plant for the distribution of gas or electricity for lighting purposes, under the provisions of said chapter three hundred and seventy, without a plant for manufacturing the same, may, if such plant be a gas plant, purchase gas, and if an electric lighting plant, electricity, to be distributed by means of the same, from any adjoining city or town or any corporation manufacturing the same.

Section 9. In lieu of issuing bonds under the provisions of section four of said chapter three hundred and seventy, a town or city may issue notes or scrip, subject in all other respects to the provisions of said chapter.

Section 10. Any town voting to establish or having established a gas or electric light plant, or both, under and in accordance with the provisions of chapter three hundred and seventy of the acts of the year eighteen hundred and ninety-one, may, at a town meeting called for that purpose, or at a regular annual town meeting, choose from its citizens three persons, to be known as the municipal light board, one of whom shall be chosen for one year, one for two years and one for three years, and at each annual town meeting thereafter one for a term of three years, who shall have full power and authority to construct, purchase and establish a public lighting plant in accordance with the vote of the town, and to maintain and operate the same; and they shall in all other respects possess the powers and perform the duties conferred and imposed upon the selectmen of such towns by sections eight and nine of said chapter, and the manager referred to in section eight of said chapter shall be appointed by and act under the direction of said board.

Section 11. This act shall take effect upon its passage. [Approved June 9, 1893.

## [CHAP. 474]

An Act relating to the Bay State Gas Company.

Be it enacted, etc., as follows: .

SECTION 1. The charter of the Bay State Gas Company is hereby revoked and annulled, and said corporation shall be subject to the provisions of sections forty-one to forty-five, inclusive, of chapter one hundred and five of the Public Statutes, so far as the same are applicable, and subject to the provisions hereinafter contained.

SECTION 2. The supreme judicial court shall, on application made as provided in section forty-two of chapter one hundred and five of the Public Statutes, or on application of the mayor of the city of Boston, appoint a receiver of the said Bay State Gas Company, who shall hold and distribute the estate and effects of the said company as provided in sections forty-two to forty-five, inclusive, of said chapter one hundred and five of the Public Statutes.

Section 3. Sections one and two of this act shall take effect on the first day of December in the year eighteen hundred and ninety-three; unless the said Bay State Gas Company, shall, prior to said day, procure or cause a certain obligation for four million, five hundred thousand dollars, dated the eleventh day of March in the year eighteen hundred and eighty-five, and issued by said company as part consideration for a contract for the construction of its works, to be legally cancelled and discharged, and shall surrender and deliver the said obligation thus legally cancelled and discharged to the commissioner of corporations.

Section 4. The said Bay State Gas Company may, for the purpose of procuring such cancellation and delivery of said obligation, issue to the holder or holders of said obligation upon the said delivery, stock to an amount equal to the excess of the actual market value of the property of said company over five hundred thousand dollars, not including therein any value for its franchises. The said value of said property shall be determined by three disinterested persons to be appointed as commissioners by the supreme judicial court, upon application of the said company, after notice to the mayor of the city of Boston, who shall be a party to all

proceedings before the said commissioners. Stock may be issued under the provisions of this act only after the findings of said commissioners have been approved by the court, after due notice to all parties interested, and only in the event that the aggregate amount of stock, bonds, notes and other liabilities of said company outstanding at the time of such issue shall not exceed the said value of the property found and approved as aforesaid.

Section 5. It shall not be lawful for the said Bay State Gas Company to issue any stock or bonds or to assume any liabilities or to pay any consideration for or on account of the principal of the said obligation, or for the purpose of procuring the cancellation and delivery thereof, except as provided in this act.

Section 6. Sections four and five of this act shall take effect upon its passage. [Approved June 10, 1893.

## APPENDIX C.

## RATES FOR PEABODY INCANDESCENT LIGHTS, Adopted Sept. 21, 1893.

### LIGHTS BY YEARLY CONTRACT.

Running 5 lights or less, 75 cents per month.

Running 5 lights to 15, 65 cents per month.

Running 15 lights to 25, 60 cents per month.

Running 25 lights and upward, by special contract.

Prices for running three nights per week, 75 per cent. of the above.

Houses, by meter, 3 cent per hour, each light.

Houses burning less than \$20 worth per year, to be charged \$2 per year for use of meter.

Halls and buildings using 50 or more lights by meter,  $\frac{1}{2}$  cent per hour each.

Buildings requiring one light to burn all night, \$5 per year extra. All bills to be paid quarterly.

This calls for lamps of 16 candle power.

Contracts for other lights in proportion.

Arc lights, special contract.

## RULES AND REGULATIONS FOR PEABODY INCAN-DESCENT LIGHTS.

Арортер Ост. 19, 1893.

1. The Peabody Electric Light Department will place upon the premises of the consumer the meter and other appliances necessary to connect the consumer's installation with the main line without

cost to the consumer, and keep in repair and maintain all its appliances; provided that, if damage is done its property, the consumer shall pay the value of the property so damaged or destroyed, or the cost of repairing the same.

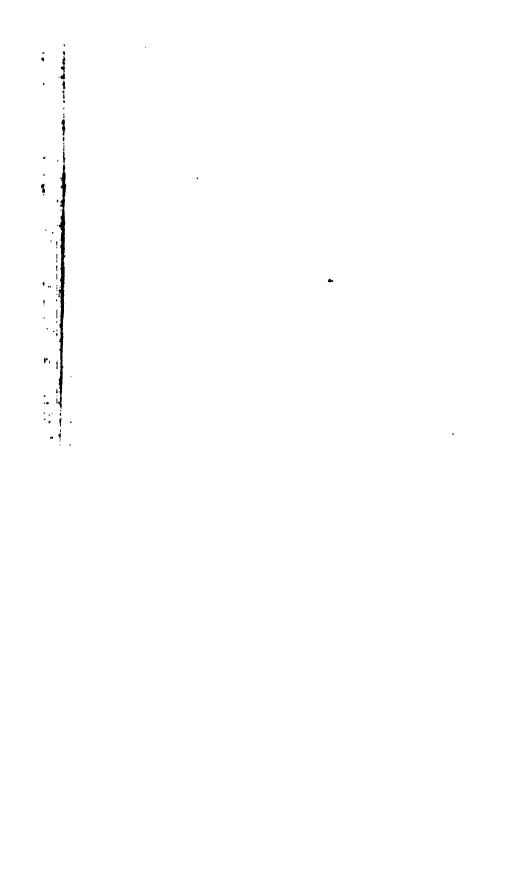

- 2. The consumer is strictly forbidden to interfere with any meters or other appliances of the Peabody Electric Light Department, but in case of defective service should immediately notify the manager.
- 3. The department agrees to use reasonable diligence and care to provide a regular, sufficient and uninterrupted supply of current during the running hours of the plant; but in case the supply should fail or be interrupted by reason of accident or any other cause except the neglect of the department, the department or the town shall not be liable for any damage for such failure or interruption, nor shall any claim be made for rebate or allowance therefor.
- 4. Consumers will not be permitted to use the current for any other purpose or in any other place than that provided for in the contract, without first having received written consent from the manager.
- 5. All employees of the department are strictly forbidden to demand or accept any personal compensation from consumers for any service rendered in connection with their duties.
- 6. Bills are payable quarterly on the first days of January, April, July and October, and will be considered in arrears if not paid before the 15th of said months.
- 7. The department reserves the right to discontinue the current without notice, in case the consumer is in arrears in payment of bills, or fails to comply with all rules and regulations of the department.
